Workshop on 'SDS-PAGE, Western Blotting and Immunofluorescences'

13.09.2022 to 17.09.2022

Western blotting is a gold standard molecular biological technique, used for validating the presence of specific protein in the sample. Western blotting has a broad range of applications, including diagnostics, protein expression analysis, and so on. In this context, this course will cover protein lysate preparation from tissues and cells, Total Protein Quantification, SDS-PAGE (Bio-Rad electrophoresis system), protein transfer (Bio-Rad transfer unit), western blotting (Bio-Rad ChemiDoc XRS+ System) and data analysis. This workshop will provide hands-on experience to learn the molecular biology tools. Furthermore, this platform will help participants design antibody-based diagnostic kits.
