1.3.3 VALUE ADDED COURSES [2022-2023]

S. No.	Title	Events Date	No. of Students enrolled	No. of Students attended	Page. No.
1	Insights On Robots	16-02-2023 to 05-04-2023	36	36	2
2	Cybug's GO Programming	13-02-2023 to 05-04-2023	32	32	9
3	Python Programming	20-02-2023 to 10-04-2023	24	24	15
4	Deep Learning	15-02-2023 to 03-04-2023	24	24	21
5	Yoga for Life	22-02-2023 to 22-03-2023	19	19	27

1. INSIGHTS ON ROBOTS

The Value Added Course in Insight to Robot was organized at School of Computing, Department of Computer Science and Engineering, in Association with Kalam Institute for Technical Education, at Sathyabama Institute of Science and Technology, in Sathyabama Centre for Advanced Studies - from 16th Feb 2023 to 05th April 2023. Around 30 students from various discipline has participated in this VAC program. The students are divided into 5 different teams and based on the problems given; one among the team is selected as best. From the program all the students learned to build the robots using Advanced Robotics Kit based learning.

COURSE CONTENT

OBJECTIVES:

- To understand the functions of the basic components of a Robot.
- To study the use of various types of End of Effectors and Sensors
- To impart knowledge in Robot Kinematics and Programming
- To learn Robot safety issues and economics.

INTRODUCTION

6 Hrs.

Definition and scope of Robotics – Historical overview of robotics – Application of Robotics in various fields- Working modules of bots - Co ordinate Systems- Work Envelope Types and Classification- Specifications-Pitch- Yaw, Roll, Joint Notations- Speed of Motion.

ROBOT DRIVE SYSTEMS AND END EFFECTORS

6 Hrs.

Pneumatic Drives-Hydraulic Drives-Mechanical Drives-Electrical Drives-D.C. Servo Motors, Stepper Motors, A.C. Servo Motors-Salient Features, Applications and Comparison of all these Drives, End Effectors-Grippers-Mechanical Grippers, Pneumatic and Hydraulic- Grippers, Magnetic Grippers, Vacuum Grippers; Two Fingered and Three Fingered Grippers; Internal Grippers and External Grippers; Selection and Design Considerations.

SENSORS AND MACHINE VISION

6 Hrs.

Requirements of a sensor, Principles and Applications of the following types of sensors- Position sensors - Piezo Electric Sensor, LVDT, Resolvers, Optical Encoders, pneumatic Position Sensors, Range Sensors Triangulations Principles, Structured, Lighting Approach, Time of Flight, Range Finders, Laser Range Meters, Touch Sensors ,binary Sensors., Analog Sensors, Wrist Sensors, Compliance Sensors, Slip Sensors.

ROBOTS KINEMATICS AND ROBOTS PROGRAMMING

6 Hrs.

Forward Kinematics, Inverse Kinematics and Difference; Forward Kinematics and Reverse Kinematics of manipulators with Two, Three Degrees of Freedom (in 2 Dimension). Lead through Programming, Robot programming Languages-VAL Programming-Motion Commands, Sensor Commands, End Effector commands and simple Programs.

IMPLEMENTATION AND ROBOT ECONOMICS

6 Hrs.

RGV, AGV; Implementation of Robots in Industries-Various Steps; Safety Considerations for Robot Operations - Economic Analysis of Robots.

COURSE OUTCOMES

On Completion of course student will able to

CO1: Understand Fundamental Principles.

CO2: Analyse Robot component and system.

CO3: Apply Kinematics and Dynamic concepts.

CO4: Implement Robot perception Techniques.

CO5: Design robot control systems.

CO6: Develop robot programming skills and robot motion planning.

Date	9.00 am to 10.00 am	10.00 am to 10.15 am	10.15 am to 12.15	12.15 Noon to 1.00 pm	1.00 pm to 04.00 pm

2. CYBUG'S GO PROGRAMMING

The Value Added Course in Cybug's GO programming was organized at School of Computing, Department of Computer Science and Engineering, at Sathyabama Institute of Science and Technology, in Sathyabama Centre for Advanced Studies - from 13th Feb 2023 to 05th April 2023. More than 30 students from various discipline has participated in this VAC program. The students were given different programs based on Go programming. From the program students learned to write GO programs for different problems.

COURSE CONTENT:

COURSE OBJECTIVES

- To setup and install Go language.
- To understand Go basics programs.
- To understand Functions and Packages in Go language.
- To implement the Pointers and memory management techniques.
- To Implement Error handling functions.

INTRODUCTION TO GO

6 Hrs.

Overview of Go and its history- Installation and setup of Go development environment- Basic code testing and running- Fundamental language, features and syntax of Go programming.

GO LANGUAGE BASICS

6 Hrs.

Data types(int , float, Bool, string)- Variables and Constants- Operators and expressions- Control structures(If statements, loops)

FUNTIONS AND PACKAGES

6 Hrs.

Defining and calling functions- Function parameters and return values- Types of functions (Built in functions and user define functions)-

Packages and modules- Modules types.

POINTERS AND MEMORY MANAGEMENT

6 Hrs.

Pointers in Go- Pointers with address- Memory management system- Understanding pointers in Go- Automatic memory management- Thread catching MALLOC- Garbage collector

ERROR HANDLING

6 Hrs.

command line arguments, errors and exceptions, handling exceptions, modules, packages; Illustrative programs: word count, copy file, Voter's age validation, Marks range validation (0-100)..

COURSE OUTCOMES

On completion of the course the student will be able to:

CO1: Develop algorithmic solutions to simple computational problems

CO2: Develop and execute simple GO programs.

CO3: Write simple GO programs using conditionals and looping for solving problems.

CO4: Decompose a GO program into functions.

CO5: Represent compound data using GO pointers and memory management

CO6: Implement techniques to solve error handling exceptions.

SCHEDULE:

Date	9.00 am to 10.00 am	10.00 am to 10.15 am	10.15 am to 12.15 Noon	12.15 Noon to 1.00 pm	1.00 pm to 04.00 pm
13.02.2023	Introduction	BREAK	Go language Basics	LUNCH	Operators and expressions
27.02.2023	Functions		Function parameters		Types of function
06.03.2023	Go Programming		Execution of Go Programs		Packages and modules
27.03.2023	Pointers		Memory management		Thread Catching Malloc
05.04.2023	Automatic Memory management		Error handling		Illustrative programs

COURSE CONTENT:

COURSE OBJECTIVES

- To understand why Python is a useful scripting language for developers.
- To learn how to use lists, tuples, and dictionaries in Python programs.
- To build and package Python modules for reusability.
- To understand how to read and write files in Python.
- To learn how to use exception handling in Python applications for error handling.
- To design and program Python applications.

INTRODUCTION

6 Hrs.

History of Python- Introduction to the IDLE interpreter (shell) - Data Types - Built-in function – Conditional statements - Iterative statements- Input/output functions - Compound Data Types - Nested compound statements

OBJECT ORIENTED CONCEPTS

6 Hrs.

Class – Objects – Constructors –Getters and Setters- Polymorphism – Encapsulation -Inheritance -Data Abstraction- Method Overloading-Method Overriding-Data Hiding-Import Class

FILES AND EXCEPTIONS HANDLING, MODULES, PACKAGES

6 Hrs.

File Operations –Iterators - Exception handling - Regular Expressions- Creating Modules-Import Statement Introduction to PIP-Installing Packages via PIP-Using Python Packages.

GUI PROGRAMMING

6 Hrs.

GUI Programming in Python - Introduction to GUI library - Layout management - Events and bindings - Fonts – Colours - Canvas - Widgets (frame, label, button, check box, entry, list box, message, radio button, text, spin box.

DATABASE AND NETWORK

6 Hrs.

Database (using NoSQL): Connector Module –Cursor – Statements - Exceptions in database. Network connectivity: Socket module - Client – Server –Email – URL Access.

COURSE OUTCOMES

On Completion of course student will able to

CO1: Describe the Numbers, Math functions, Strings, List, Tuples and Dictionaries in Python.

CO2: Do the decision making and write functions in Python.

CO3: ExplainhowtodesignGUIApplicationsinPythonandevaluatedifferentdatabaseoperations.

CO4: Design and develop Client Server network applications using Python.

CO5: Ability to design real life situational problems and think creatively about solutions of them.

CO6: Apply the best features of mathematics, engineering and natural sciences to program real life problems.

SCHEDULE:

Date	9.00 am to 10.00 am	10.00 am to 10.15 am	10.15 am to 12.15 Noon	12.15 Noon to 1.00 pm	1.00 pm to 04.00 pm

Certificate will be provided after successful completion of the course

COURSE CONTENT:

COURSE OBJECTIVES

- To introduce Deep Learning concepts.
- To understand Linear regression and predictive models.
- To understand classification and clustering techniques.
- To understand the ensembling of models and its techniques.
- To apply reinforcement learning techniques.

INTRODUCTION TO DEEP LEARNING

6 Hrs.

What is Deep Learning – Examples of Deep Learning Applications -Types of Deep Learning Techniques - Learning a class from Examples - Vapnik-Chervonenkis Dimension - Probably Approximately Correct Learning – Gradient Descent – Bias and Variance- Overfitting- Underfitting-Confusion Matrix.

ARTIFICIAL NERON NETWORKS (ANN)

6 Hrs.

ANN -with one variable-with multiple variables--Multiple Linear regression-Non linear regression-Regression analysis-Predictive models - Prediction using Logistic Regression- Classification Models-KNN Classification- Naïve Bayes Classification- Decision Tree Classification-Support vector Machine- Random Forest- Classification vs Regression.

UNSUPERVISED LEARNING

6 Hrs.

Clustering-K Means Clustering-Supervised Learning after Clustering-Density Based Clustering Methods-Hierarchical Based clustering methods-Partitioning methods- Grid based methods. Dimensionality Reduction: Linear Discriminant Analysis -Principal Component Analysis.

ENSEMBLING MODELS

6 Hrs.

Need of Ensembling- Applications of Ensembling – Types of Ensembling : Basic Ensemble Techniques-Advanced Ensemble Techniques : Bagging, Boosting, Stacking, Blending - Techniques of Ensembling - AdaBoost.

REINFORCEMENT LEARNING

6 Hrs.

Introduction- RL Framework- Temporal Difference Learning -Active Reinforcement Learning- Markov Decision Process Model - Learning Expectations-Learning Algorithms-Q learning Algorithm-Case Study: Implementation of Q learning in automotive games.

COURSE OUTCOMES

On completion of the course the student will be able to:

CO1: Reduce the dimension of the dataset with Deep Learning techniques

CO2: Implement the predictive analytics for any real scenario

CO3: Implement applications with clustering and classification techniques

CO4: Implement the ensembling models.

CO5: Learn and apply reinforcement techniques.

CO6: Design a case study on the business/automotive data and compare the performance of the Classifiers and algorithms.

Date	9.00 am to 10.00 am	10.00 am to 10.15 am	10.15 am to 12.15 Noon	12.15 Noon to 1.00 pm	1.00 pm to 04.00 pm
15.02.2023	Introduction	BREAK	Deep Learning methods	LUNCH	Application of Deep Learning

SCHEDULE:

29.02.2023	Intro to Artificial Nueron Network		ANN's methodologies		Types of Regressions
12.03.2023	Differences between various regressions		Supervised Learning		Depths of Supervised Learning
29.03.2023	Unsupervised Learning		Clustering		Ensembling models
03.04.2023	Stacking models		Reinforcement Learning		RL learning methods

(SPECIALIZATION)

Yoga For Life

2023

CHIEF GUEST

Dr. Mariazeena Johnson, Chancellor
Dr. Marie Johnson, President

FACULTY COORDINATORS :

Ms. Abinaya.K, Asst. Prof, CSE

Date: 22nd FEBRUARY to 22nd MARCH 2023

Time: 10 a.m

Venue: Advanced studies

COURSE CONTENT:

Syllabus of Yoga Education(Theory &Practical)

The course content has been broadly divided into two parts. In the first part of the program it was conducted for the various department students. In the second part of the program both staffs and students have been formulated.

(A) Main Recommendations:-

Yogamay betaught informally to develop physical and moral values through simple Sukshma Vyayama and interesting stories based on Yama and Niyama. Yoga teacher may be entrusted with the responsibility to train the teachers for this purpose during the In-service courses.

Physical Yogic Activities:-

1. Yogic Sukshma Vyayama (exercise No. 1-10)
2. Vajrasana, Tadasana
3. Walking on straight line to develop concentration
4. Relaxation

Value Education Based on Yama & Niyama:-

1. Lesson on personal and general hygiene.
2. Clean the teeth every day morning and evening.
3. Take a bath every day if weather permits.
4. Change clothes every day.
5. Oil and comb the hair every day.
6. Wash hands with soap before and after taking meals.
7. Do prayer before the meals.
8. Emphasize on telling truth, non-violence and non-stealing.
9. Obey the parents, teachers and elders.
10. Inspire to do at least one good turn (help/ service) every day.
11. Be courteous and don't abuse.
12. Develop the habit of keeping things at proper place.
13. Avoid littering.
14. Learn your lesson every day.
