Internship Completion Certificate

This is to certify that **AMMISSETTY NAGASAI**, a student of **Sathyabama Institute of science and Technology, Chennai** has successfully completed her Internship in Our Organization **FWD Architects** during the period of 02-01-2023 to 02-05-2023.

She is good, responsible and dedicated to her work. She works at her best in detailing and quick learner. She was able to perform well with a heavy workload given. We appreciate the efforts that she has put in.

She had worked in typologies like:

- Low-rise and High-rise Residential projects
- Commercial
- Mixed use projects
- Competitions

(which includes designing, making of approval drawings, presentations, working drawings, RERA area details)

We **FWD Architects** wish her all the very best for a successful career ahead.

finding inspiration in every turn

FWD Architects, with offices in Bangalore, Hyderabad, Chennai, And Raipur, is a team of Young Architects, Interior Designers, and Project Managers with a sound background in the international building trends. At FWD sustainability along with economic feasibility has always been the pivot. With a lot of modern construction technologies flowing into the country with unprecedented requirements, FWD is standing up to the expectations of the clients in terms of providing an “easily marketable solution” along with the expected returns. The right mix of international trends, the requirements, the client’s expectations, and the site condition gives birth to the architecture fit for emerging India Nearly 13 years of Practice, FWD Architects has established a reputation for excellence in the designs of small and large scale Residential, Hospitality, Commercial and Institutional projects.

ABOUT FIRM

About Us

Finding Inspiration in Every Turn

FWD Architects, with offices in Bangalore, Hyderabad, Chennai, And Raipur, is a team of Young Architects, Interior Designers, and Project Managers with a sound background in the international building trends. At FWD sustainability along with economic feasibility has always been the pivot. With a lot of modern construction technologies flowing into the country with unprecedented requirements, FWD is standing up to the expectations of the clients in terms of providing an "easily marketable solution" along with the expected returns. The right mix of international trends, the requirements, the client's expectations, and the site condition gives birth to the architecture fit for emerging India.

Nearly 13 years of Practice, FWD Architects has established a reputation for excellence in the designs of small and large scale Residential, Hospitality, Commercial and Institutional projects. A team of 40 professionals, we are still a hands-on, design-oriented firm at heart. Our identity lies in balancing the connection to the client, integrity in design, and well-organized work culture. Site responsive design has always been a hallmark of our firm for a decade. We strive to honor the site with design solutions inspired by the vernacular ideology and the international knowhow. We advocate sustainability with the right mix of profitable and practical design methodologies in all our projects.

Our Story

As an architect, each and every design is done as a step-up of learning. Designs are done to satisfy clients' need for space and optimization of it not for architects ego. Each design has unique characteristics depending on requirements of space.

CONCLUSION & OBSERVATIONS

In my opinion, The purpose of 13 weeks practical training is to expose the student to the real world tasks and allow students to work in a team with trained professionals. It is also a chance for the student to apply the theories into practice. I have learnt some very useful skills in FWD Architects.

At the start of my internship I had certain uncertainties and doubts concerning my practical skills. I had some difficulties in trusting my decisions when it came to concept developments and I felt the need to ask others whether what I was doing was right or wrong. However, by the end of my internship, I can say that this has completely changed; I have learned to trust my work. I got to know the working environment in the office and behaviour of my colleagues. My inter-personal and corporate communication skills have improved a lot. The experience that I have obtained at FWD gave me a big push on design knowledge with-in the practical field that I know for sure will have an impact on my career and will help me to become a better architect in my future plans.

During the past 90days of internship, several different tasks have been assigned to me and I have completed and understood them. I am sure this knowledge will be used in the future work situations. I have learned about project development, interaction between co-workers, clients, and contractors. I was involved in design, producing working drawing and as well as service coordination of projects.

In the end I can conclude that this internship has bridged the gap between my academic concepts and professional practices upto a large extent.

KEY LEARNING

1. This training widened the horizons of my designing ability. Understanding of Concept development process and its stages.
- 2 Importance of working in systematize format to be able to easily incorporate changes in future in the drawing.
3. Advanced AutoCAD commands for preparing working drawing.
4. Photoshop skills for effective presentation drawings.
5. Ability to present designs effectively, smoothly and professionally.
6. Effective Corporate communication skills, specifically written communication.
- 7 The training facilitated me to acquire inter-personal skills.
8. Time management by working simultaneously on different projects. Technical
9. terms used by architects in service coordination in a project
