ACKNOWLEDGEMENT

I am pleased to acknowledge my sincere thanks to the **Board of Management of SATHYABAMA** for their kind encouragement in doing this practical training and for completing it successfully. I am grateful to them.

I convey my thanks to **Dr. Devyani Gangopadhyay**, Dean, School of Building and Environment and **Ar.Sarath Chandra Kanth**, Design Chair, Department of Architecture for having been a constant source of support and encouragement.

I wish to express my thanks to all Teaching and Non-teaching staff members of the Department who were helpful in many ways for the completion of the project.

I also wish to thank **Ar. T.R. Palaniappan, Forum Architects Private Limited, Kottur gardens, kotturpuram, Chennai**. For his invaluable guidance, encouragement, and support, all of which set my path for my career accomplishment during my practical training session. Additionally, I want to express my gratitude to my entire firm for providing me with a stimulating environment in which to learn and absorb our concern.

FIRM HISTORY;

I aAn Architectural Practice Organisation of Over 20 Years of Existence With a thorough knowledge, Experience and Expertise In Varied Kind And Scale Of Architectural, Space Planning, Campus/Master Planning Projects Pan South India.

The Founder Director, Architect T.R. Palaniappan with a Flair for Design, Attitude for Excellence, Commitment for Ethics and Conviction for Time is the backbone of the Organisation, amply supported by a vibrant team of junior Architects, Engineers, Illustrators, AutoCAD operators & administrators and strongly backed by Associated Engineering Consultants, all of whom share the equal Aptitude and Diligence with him.

ANY AND EVERY CLIENT AND PROJECT IS PASSED THOUGH:

- o A systematic design approach well suited to their or it's requirement,
- o Finalisation Of Intensive Construction Details & Techniques Befitting the Usage.
- o Selection Of Finishing & Other Materials Contextual to The Environment & Longevity.
- o Incorporation Of Engineering Services to Gel Well with The Overall Architecture.
- o More Importantly a Control Mechanism to Realise All Above During and After The Stages Of Execution

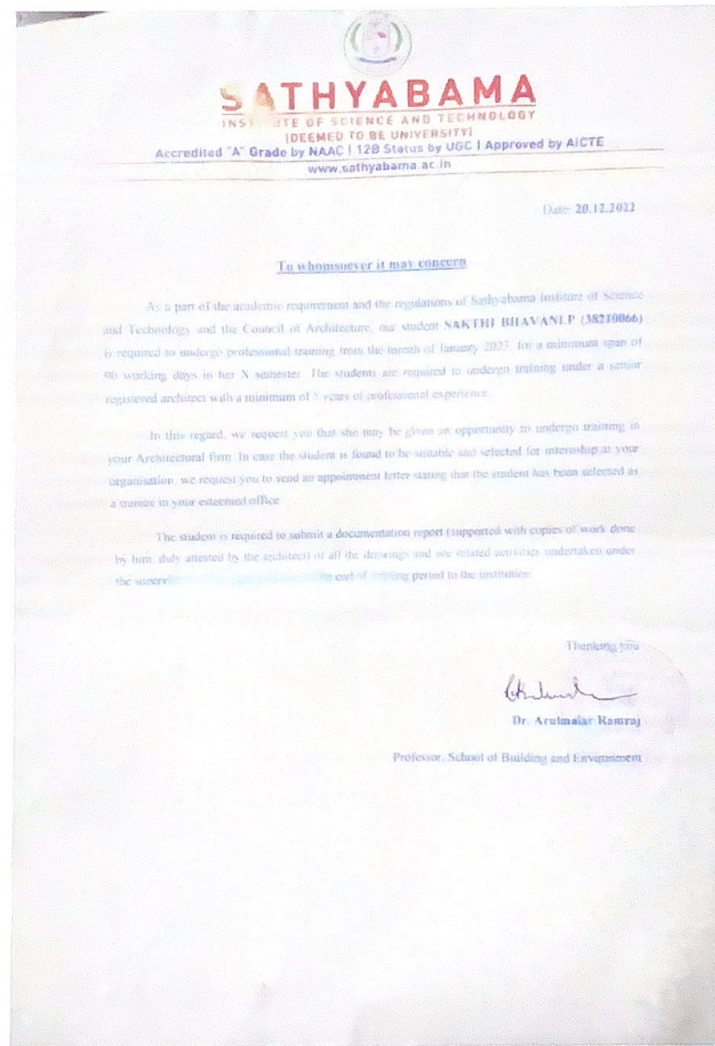

GENERAL:

I wanted to intern at a company where I could develop my project management skills while concentrating more on practical solutions. I began working there as an intern on Jan 9th for Forum Architects Private Limited. Because of the approach they teach, I don't experience any pressure for my lack of knowledge. That encourages me to think about new problems and learn more.

I get the possibility to learn the topics I really wanted to master thanks to this firm. Each project requires a specific strategy and team of professionals. Working on several projects at once is a unique experience.

The training period aided me in understanding the process and time required for a design process to change from a 2d form to a structure that is in real time to profound exercise with various constraints and broad spectrum of people's thoughts and to merge with the projects.

BONAFIDE

SHOOTING RANGE

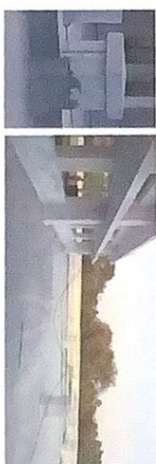

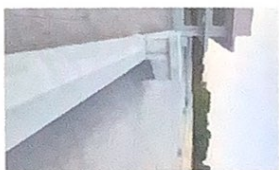

SAFETY Baffles are yet to be finished, this side you can see the column and beams whereas that side the baffle is covered with fingerjoint wood to protect the bullet from reciprocate.

WAITING LOBBY which connect the 50m range and the service wire are provided through ground.

EXPANSION JOINT which is highlighted in the plan with rectangle is 6 in gap between structure because there should be a breathable space for building to contract and expand that expansion joint closed in terrace, how the column is closed.

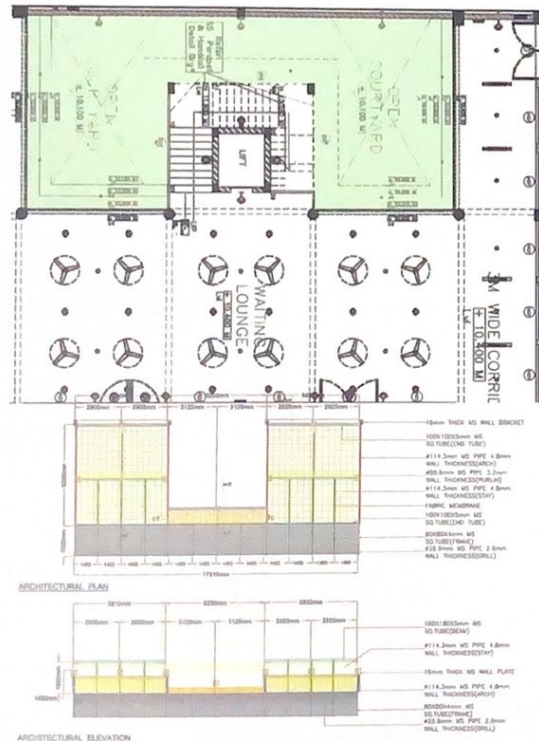

MATERIALS
noted
which are
used
currently
seen in the
sifted
coramend
cement.
The tiles
which are
going to be
laid on the
floor. The
pavement
tiles to do
the outer
landscape
pavement.

[illegible]

TENSILE STRUCTURES

Tensile Structure is proposed above the Central Courtyard to protect from the Rains. The Tensile structure is cantilevered from the courtyard beams upto 6.10m with stray supports from the Additional Truss from the Terrace.

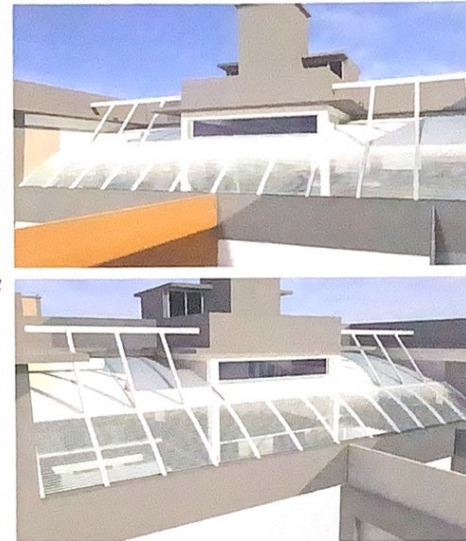

THE SHADED GREEN AREA INDICATES THE TENSILE STRUCTURE VIEW IN PLAN & THE STRUCTRES MEMBERS DETAIL PLAN

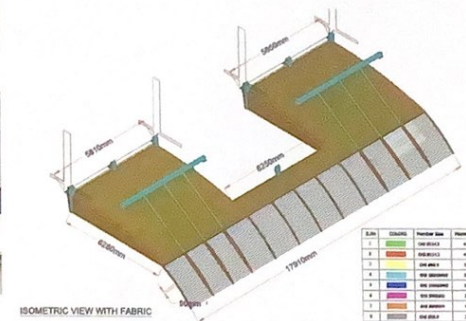

The Sides of the canopy are covered Tensile fabric upto Lintel Height.

INTERIOR TENSILE VIEW FORMK
