SOUTH INDIAN TEMPLE ARCHITECTURE

- The South Indian temple consists essentially of a square-chambered sanctuary topped by a superstructure, lower, or spire and an attached pillared porch or hall (mandapa, or matapam), enclosed by a peristyle of cells within a rectangular court.
- The site-plan is to be regarded as the body of the Vastu-purusha whose height extends from Pithah (in the bottom left corner) to Agni (top right corner). The Vastu purusha mandala is in some ways a development of the four pointed or cornered earth mandala having astronomical reference points. The mandala of 81 squares has 32 squares around the border representing the four cardinal points and the lunar constellations. It is the representation of all cyclical time: lunar and solar. Brahma is the God of the centre.
