AT DESIGNWORKS

we believe that design is what works
efficiently

DESIGNWORKS

ARCHITECTS | INTERIOR DESIGNERS | PLANNERS

ABOUT THE FIRM

Design works is a multi-disciplinary firm that has evolved over the years in the architecture and interior design industry. We offer superior design, value construction and certainty of outcome for over 20+ years.

The firm was established in the year 2002 in the name of DESIGNWORKS by Ar. Sathish kumar Jayabalan. The firm, today, continues to operate under the same name and is managed by Ar. Sathish kumar Jayabalan as the chief architect.

Design works provides consultancy services in architecture, interior design & master planning . We design a wide range of : Residential buildings – Villas, Individual residences, Row houses, Flats, Apartments, Gated communities, Townships ; Commercial buildings – Showrooms, Offices, Complexes ; Hospitality buildings – Resorts, Hotels, Restaurants, Club houses, Wedding halls, etc.

We use creativity, imagination and knowledge of our entire team to design buildings & spaces of the highest quality. Above all, Client is the soul of the project. Our main goal is to give clients peace of mind that their project will be completed the way it was perceived and planned.

CRITICAL OVERVIEW OF THE FIRM

DESIGNWORKS extended a great opportunity and an overall delightful experience for me to work with. I had a lot to grasp and learn from each and every project there. The warm and amicable environment in the firm gave me an opportunity to experience good work culture and explore so much with regards to not just interior design, but also civil & architecture.

The amount of dedication, hard work and passion towards every single project, each and everyone shows on the project, inspired me a lot and gave me a chance to understand how an architectural/designer firm actually works, how an architect/designer work, the types of works one has to work on as a designer/architect and how to work in an efficient way together as a team. From concept development, client meetings, the amount of importance given to a client and their requirements, site visits, the drawings, presentations, detailings, materials selection, vendor meetings, to deadlines & project completion there was so much for me to discover and learn.

I understood that along with the theoretical knowledge, one has to actually step deep down into the field; work on numerous projects, meet clients and vendors, visit sites, should have good communication skills and networking with people, keep oneself updated with the new design trends, materials, fittings and fixtures related to the field, be in touch with other architects/designers to acquire practical knowledge and experience.

I'm thankful and grateful to all my senior & junior architects/designers who took time to listen, teach me without judging and for helping me in all possible ways to obtain the required skills and knowledge to the utmost.
