About the Firm

Murali architects, one of the innovative design practices in Tamil Nadu, offers services in Architecture and Interior design.

An excellent team of Architects, Interior Designers, Civil engineers headed by the chief architect M.Murali, M.Arch., (Mc Gill –Canada) creates innovative and inspiring residential, commercial, institutional and hospital projects.

Architectural / site planning, structural, plumbing, water supply & sanitation, Electrical, Fire fighting, Air conditioning, Interior design/ landscaping, detail estimation, Project reports, tendering, project management and supervision

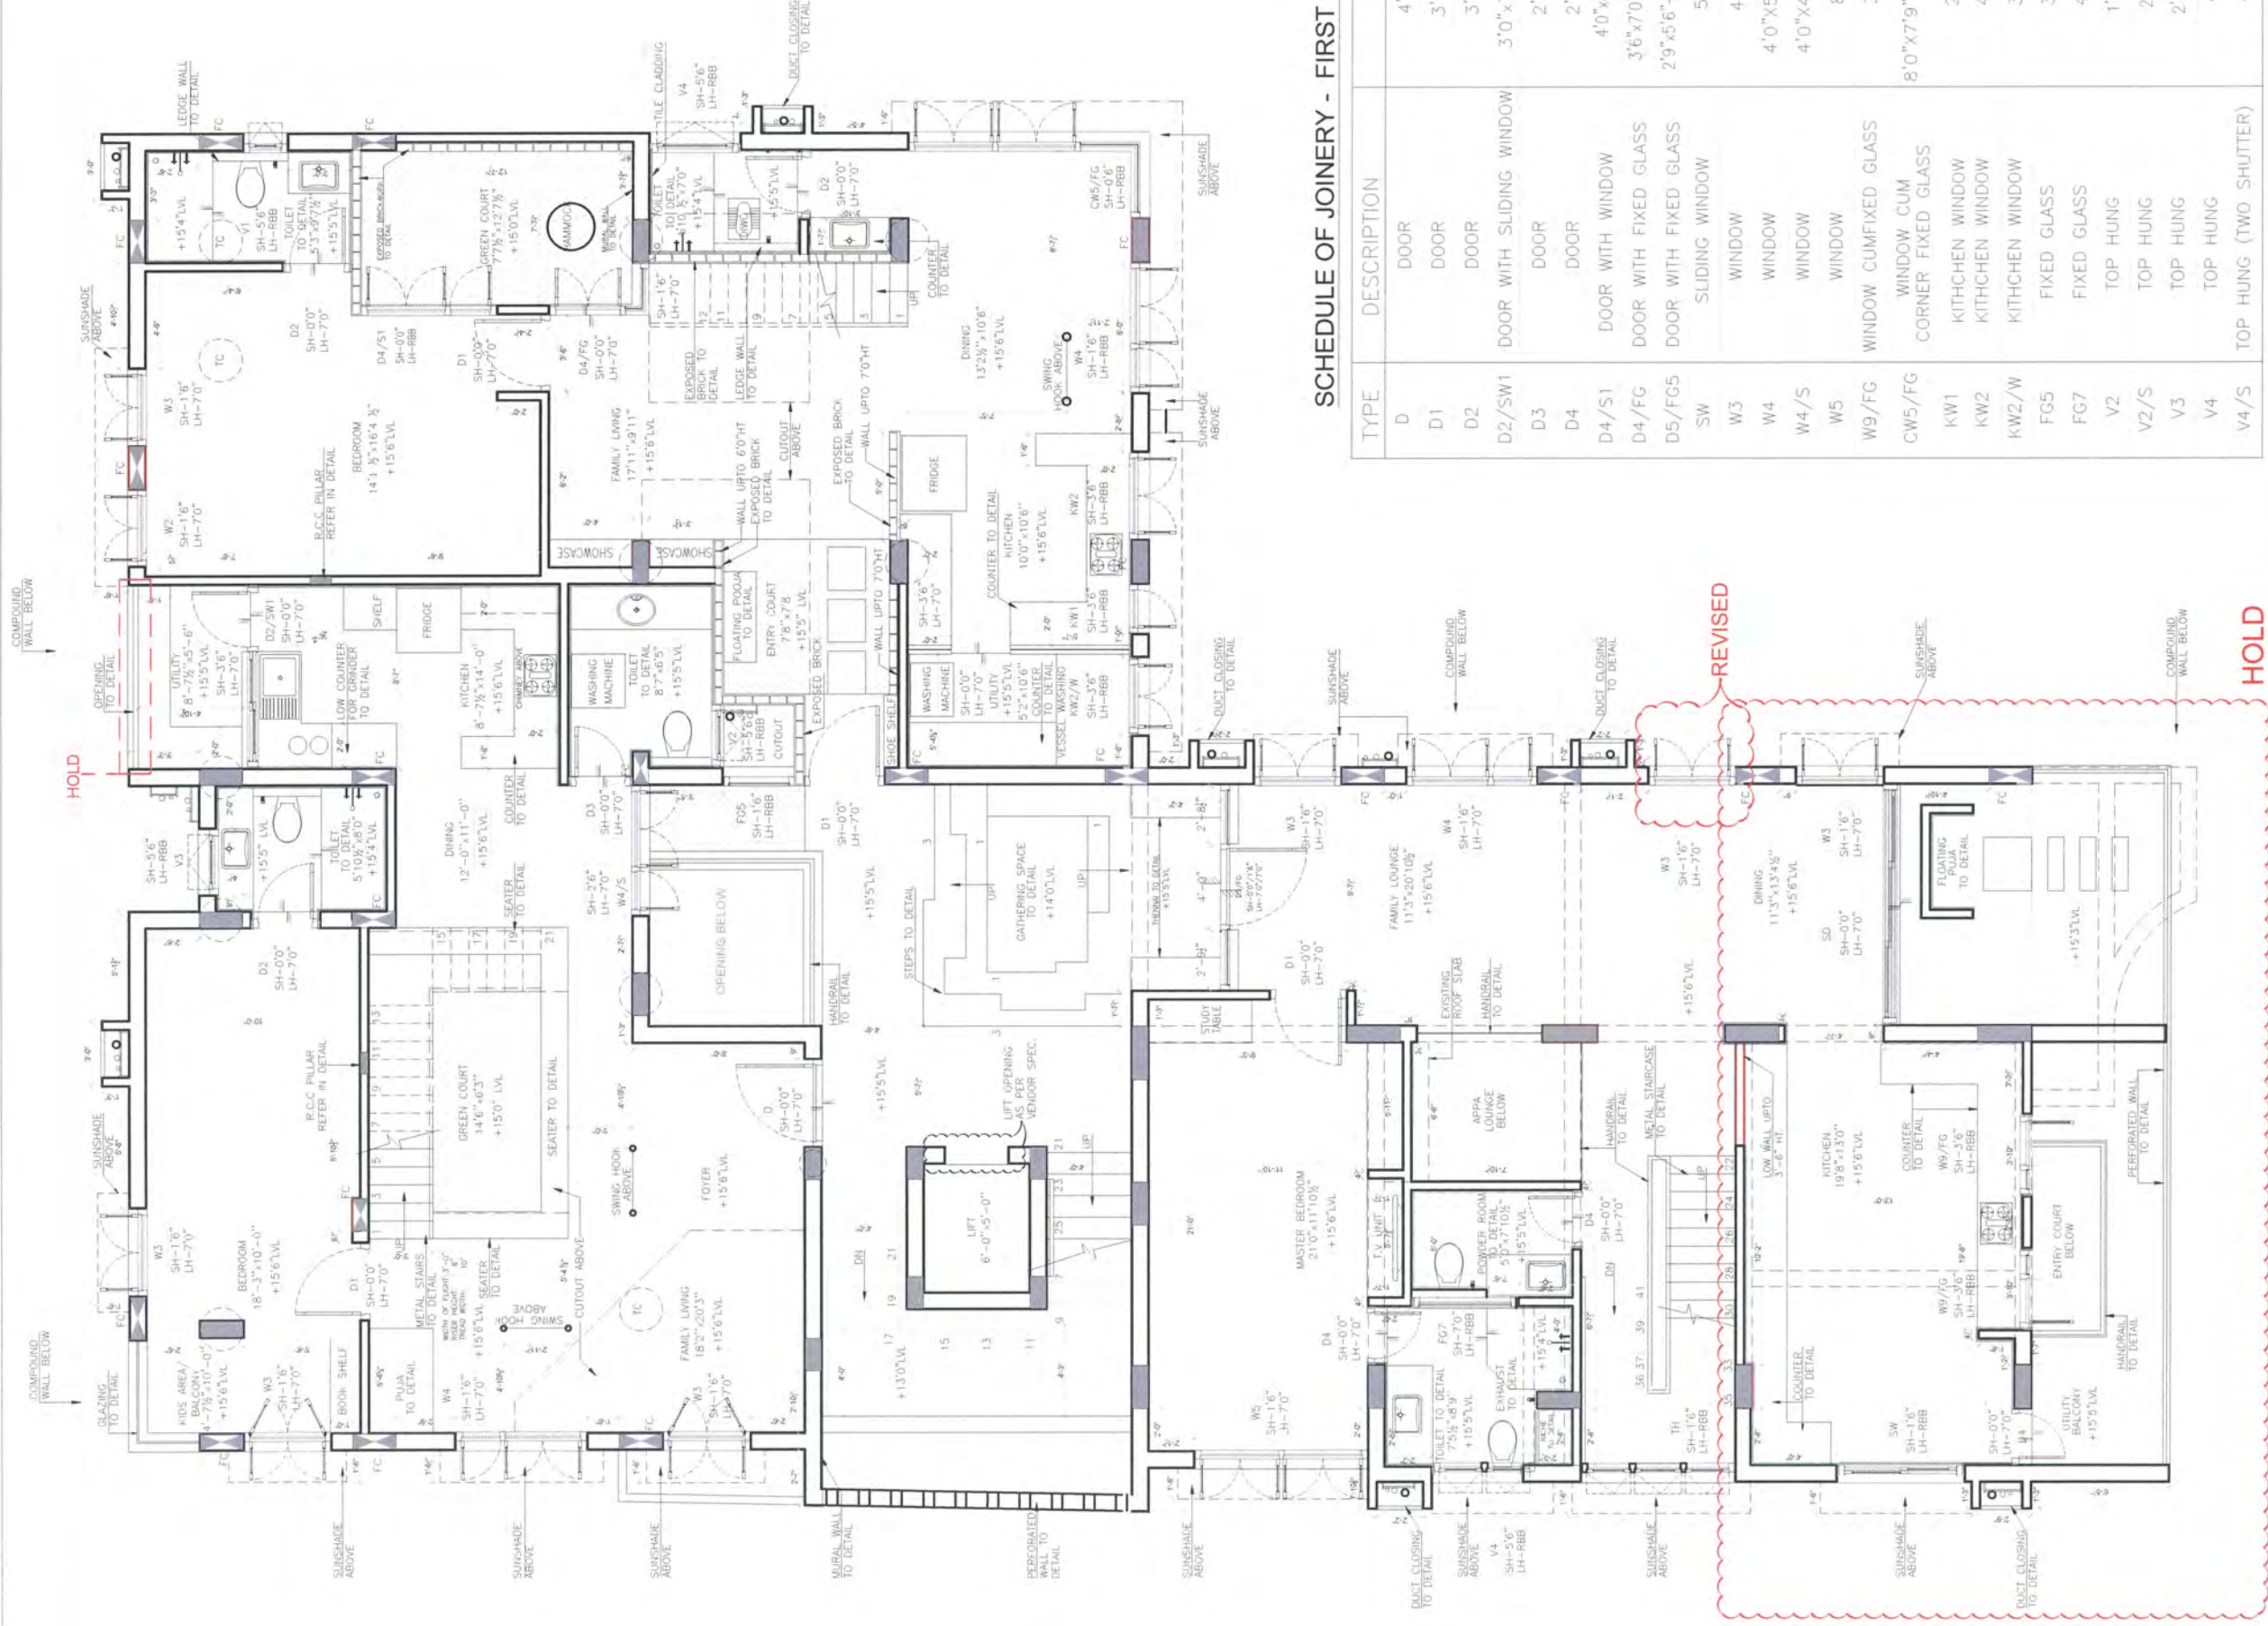

Manickaraj Residence

Mr. Manickaraj's humble home is situated in the midst of Vyasarpadi's urban sprawl. He and his family lived in the house, including a son, a daughter, and three brothers. The client is a cancer patient who constructs it for himself and his family's enjoyment; the rear area is for the brother, and the front section is for the family. As his death pangs approached, he strove to hasten to build while simultaneously pleasing Vastu, his love of animals, and his family's need for interactive space. Hundreds of birds will congregate and enjoy themselves on the patio. There is also a grilling and BBQ area with seating. To meet all of his requirements, a house is quickly erected for him and his family.

My Contributions:

Plan-Changes, Part Sections, Jornerly Elevations, Proposed Beam layout, Beam sections, Electrical layout,

Door opening near the bed in Appa's bedroom to be closed

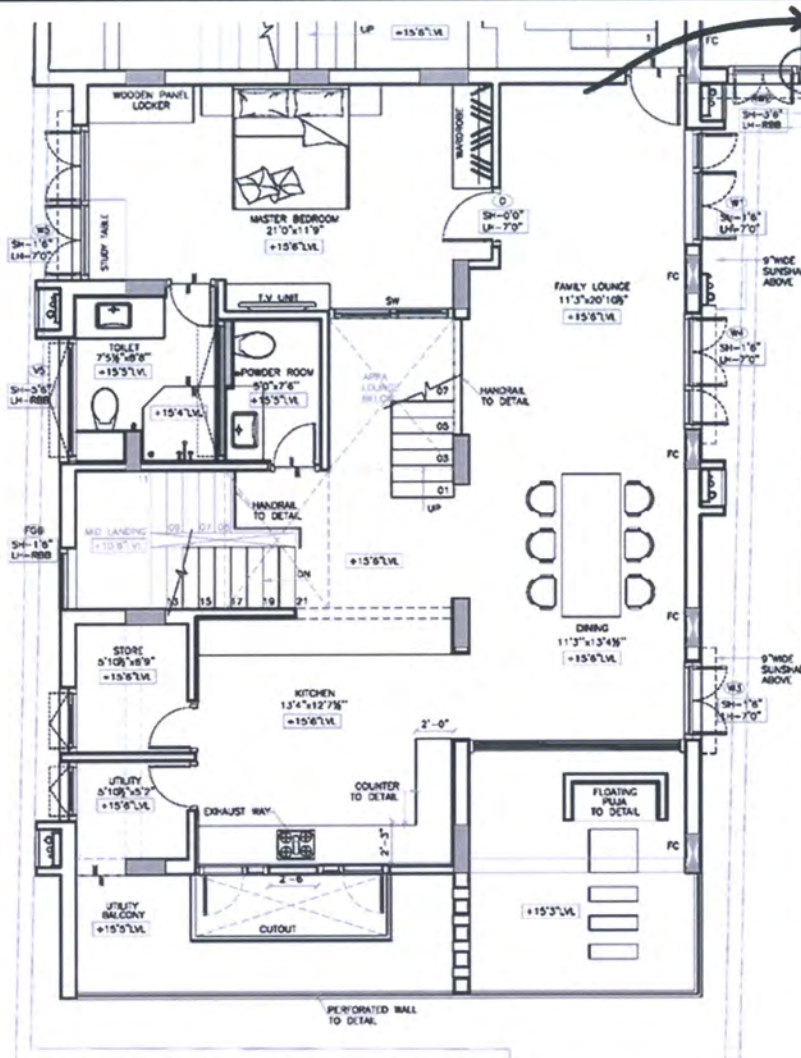

Toilet to be shifted at the door closed area. Toilet area to be converted into a thinnai, an extended portion of appa's lounge. Green lawn to be given outside the thinnai.

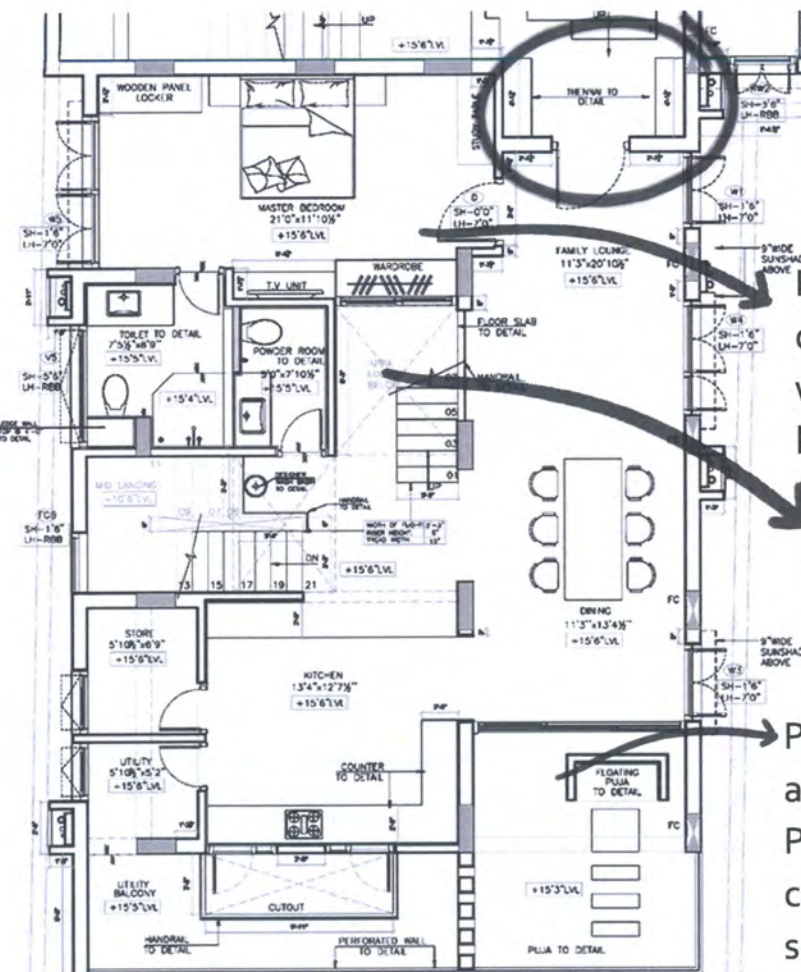

The staircase landing to be brought in as the headroom for the walkway is not comfortable

This is the final plan decided, as per the client's requests.
(The staircase is brought in and the appa's lounge has a thinnai/seater added)

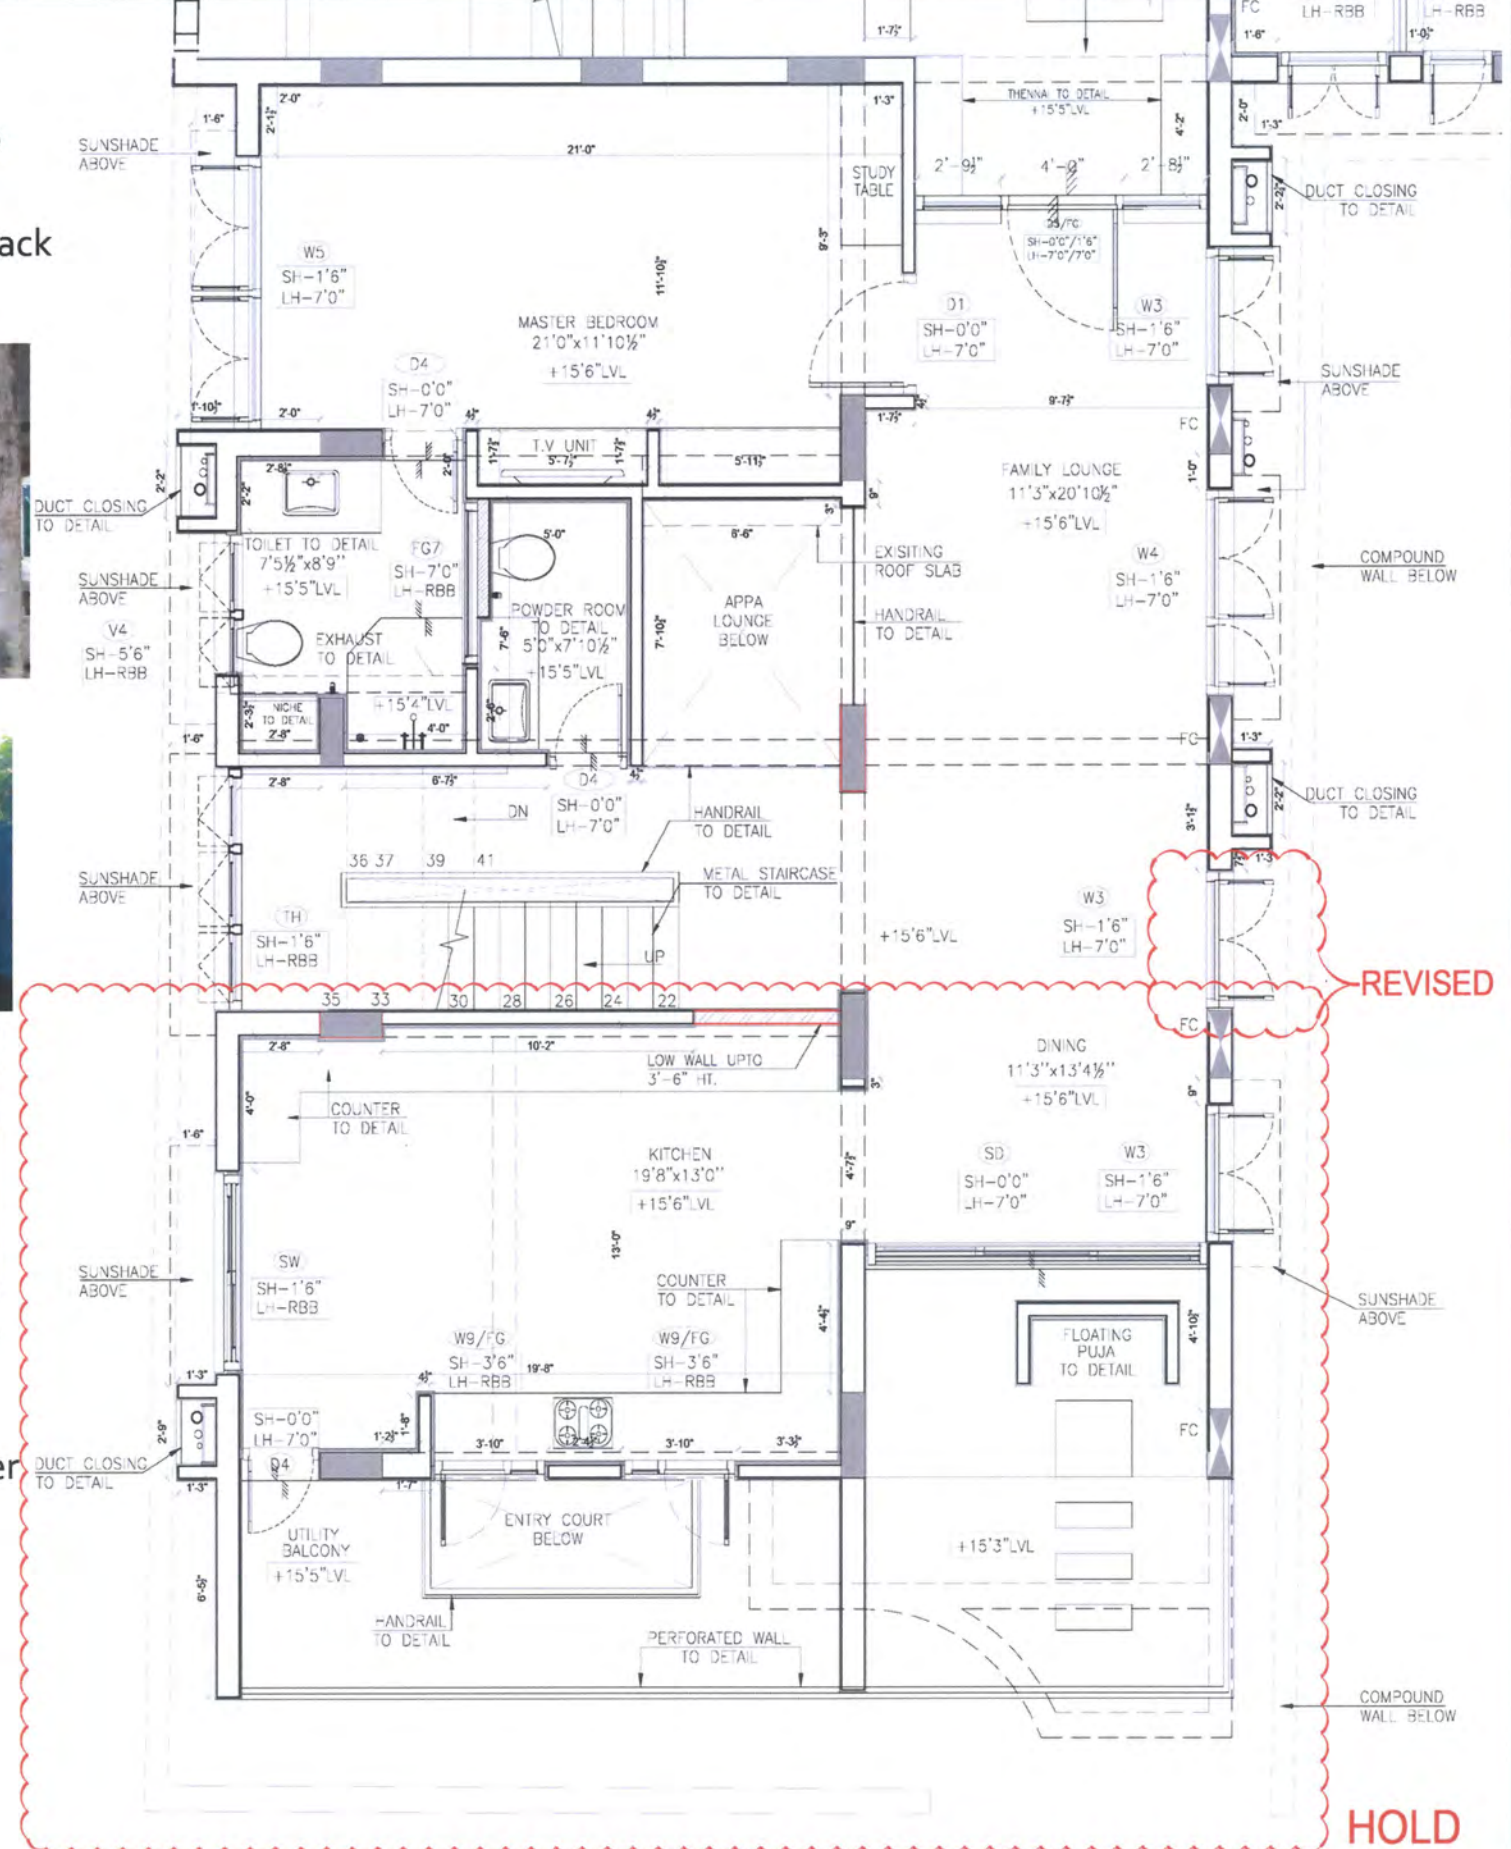

Wall at the gathering space to be extended and single shutter opening to be converted to double shutter opening with thinai on both the sides and shoe rack below the thinai.

Position of study table at north direction and wardrobe at west direction to be shifted in master bedroom

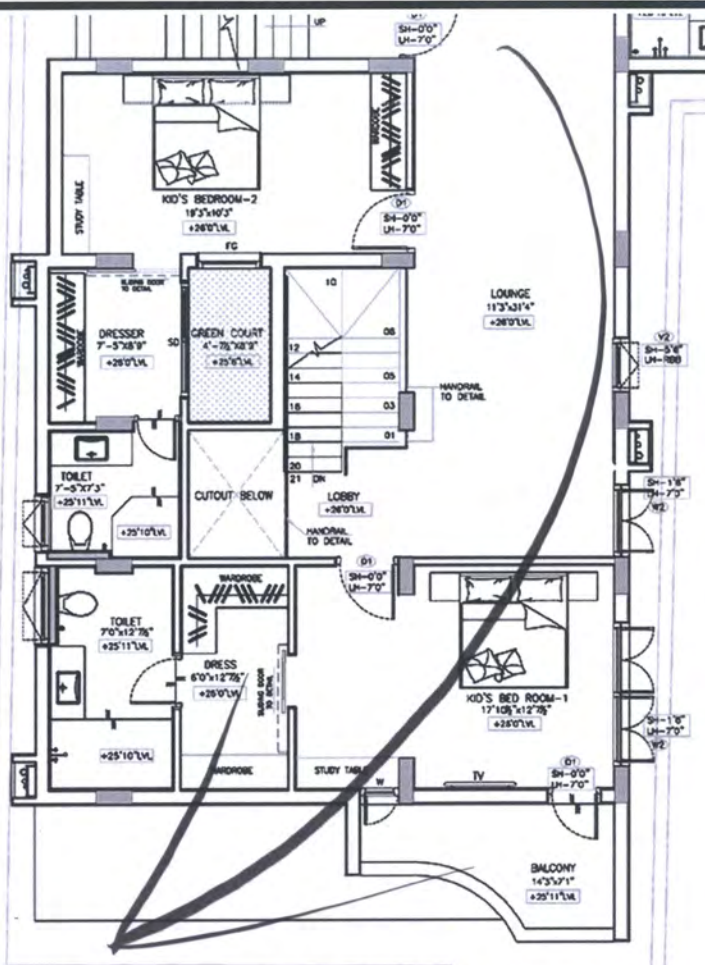

Two separate staircase to be converted into throughout single staircase.

Puja room to be positioned as per vastu.
Puja room to be properly covered to prevent the smell from the kitchen utility.

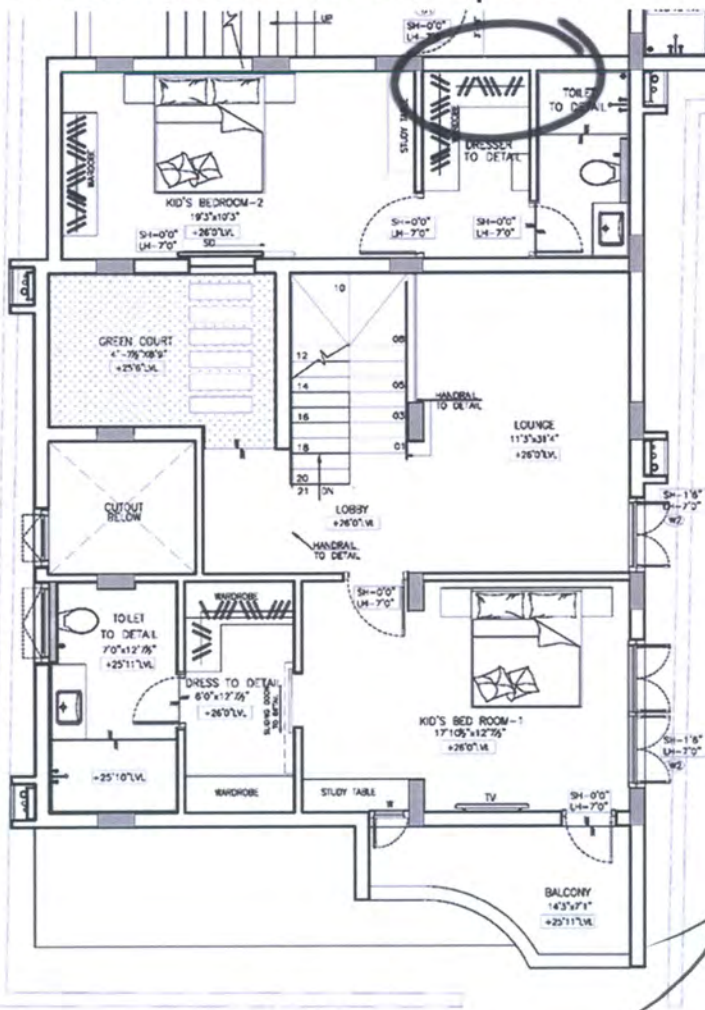

This is the final plan decided, as per the client's requests.

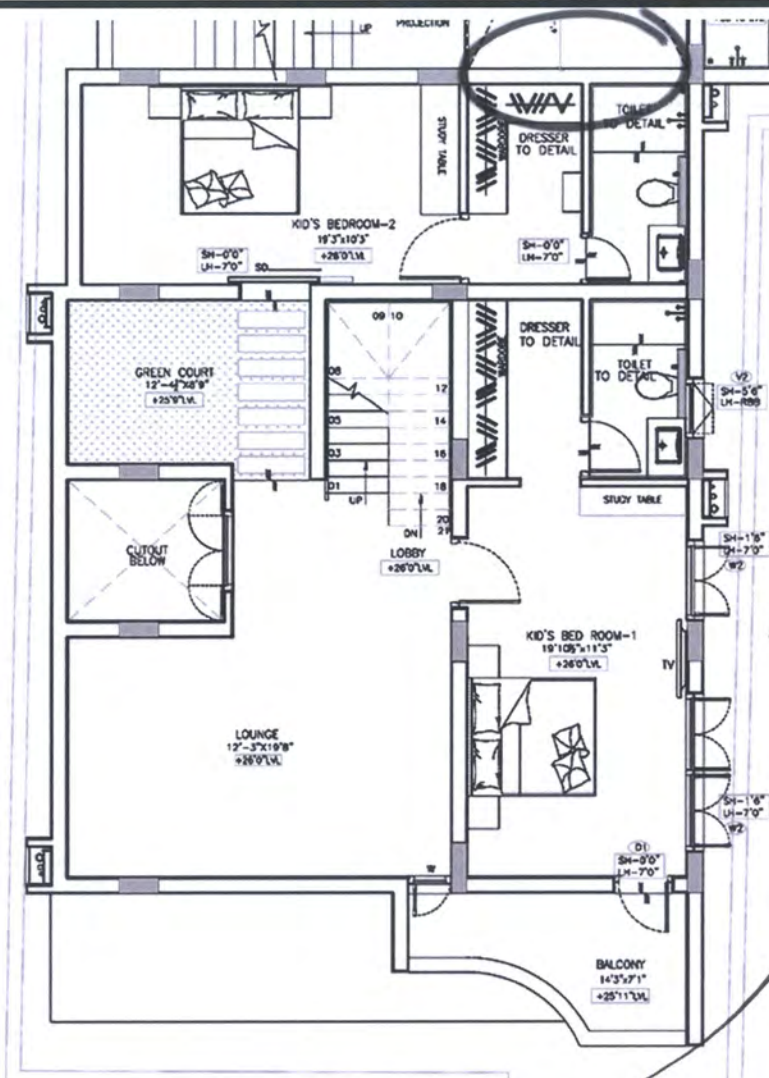

(proforated wall-made into solid wall. One staricse and the second staricase cutout becme appa's lounge cutout.The kitchen store and utility room removed and the back wall became the storage unit.Dinning room opened out out with swing inbetween the living and dinning)

The front portion of the house to be full closed from the back portion

OPTION 2

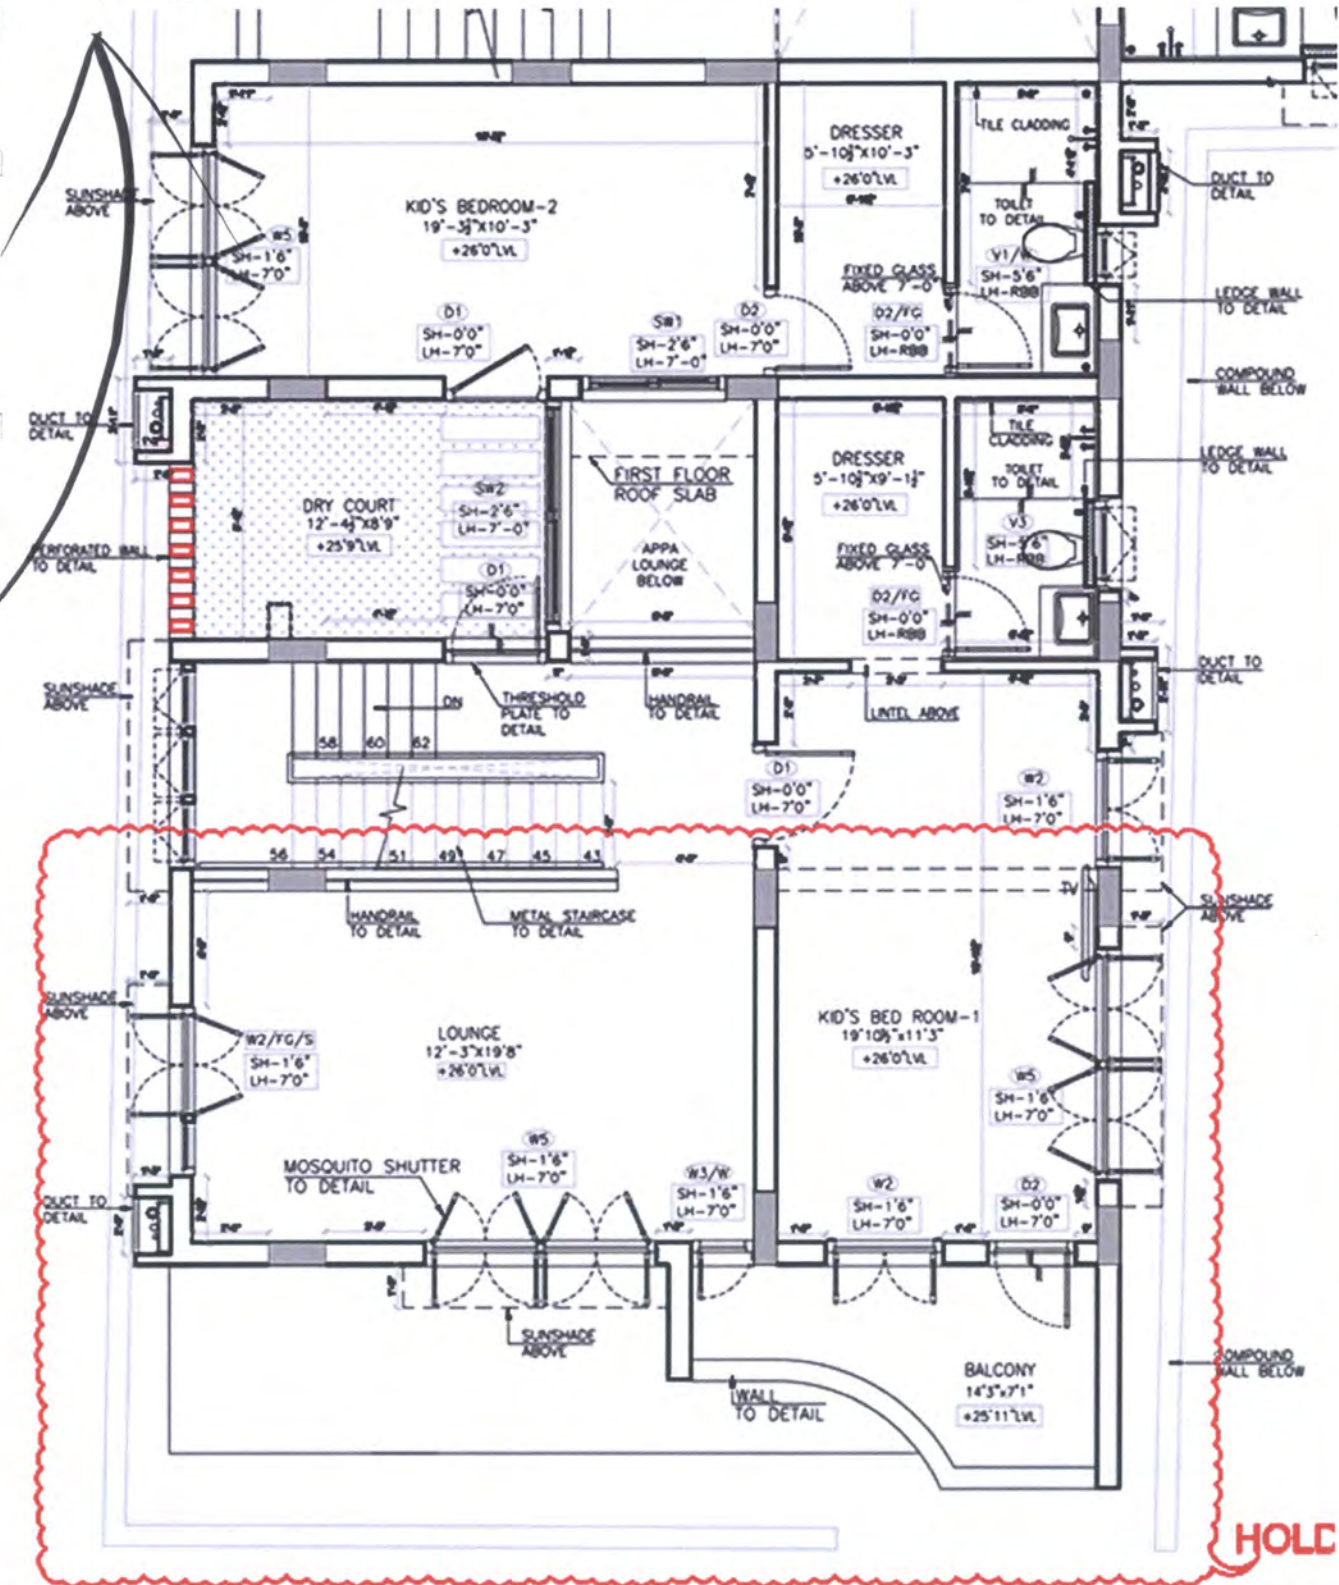

OPTION 1

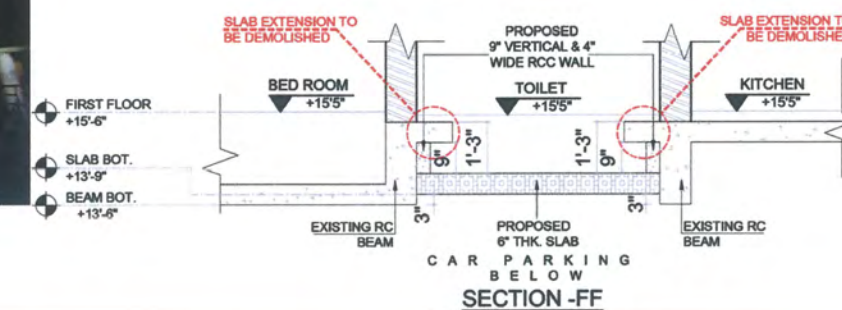

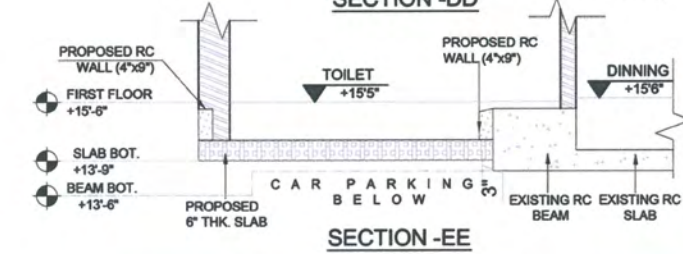

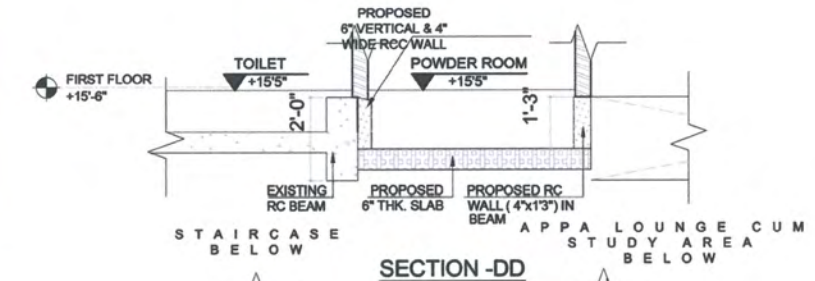

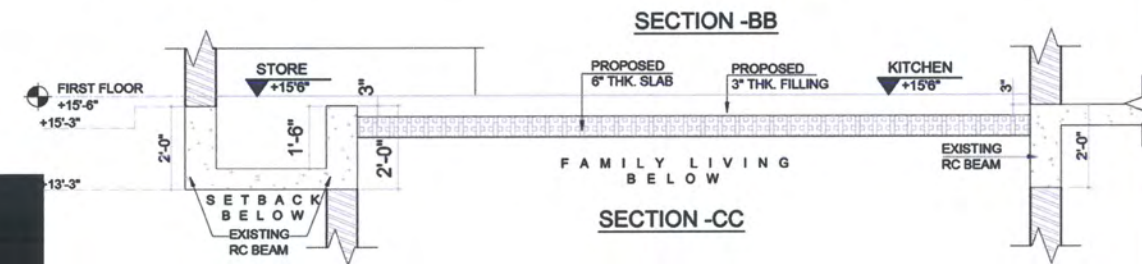

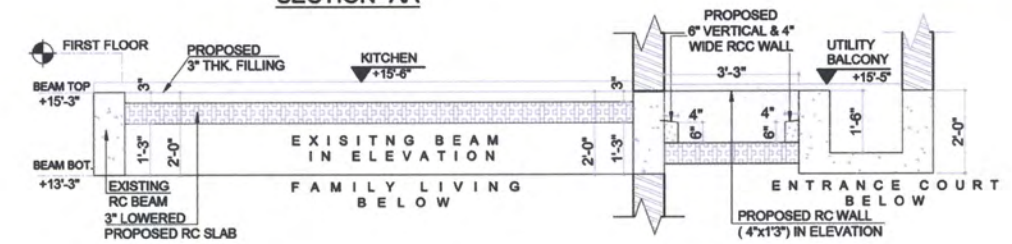

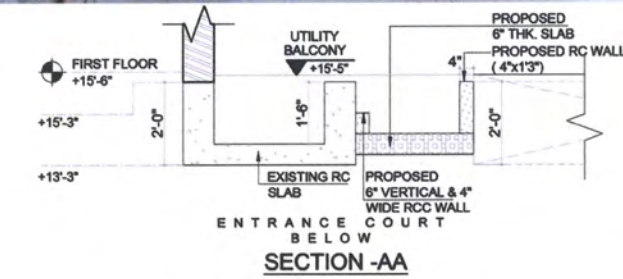

- o Dresser and toilet to be given adjacent to daughter's bedroom
- o Dresser should be wider.
- o Toilet should be 5 feet wider only.
- o Split staircase to be changed into throughout flight staircase.
- o Green court to be fully extended in this option with 4' width pathway.
- o Lounge to be shifted to north west direction

- o Dresser and toilet to be given adjacent to daughter's bedroom, Dresser should be wider.
- o Toilet should be 5 feet wider only.
- o Split staircase to be changed into throughout flight staircase.
- o 4' width Pathway to be given within the green court.
- o Lounge to be shifted to south east corner staircase.

The final plan according to the client's requests.
(The option 1 was chosen. With only one set of staircase. With wider Dressers and thinner toilets as per client's requests)

Manickaraj Residence
My Contributions:

Plan-Changes,Part Sections,Jornery Elevations,Proposed Beam layout,Beam sections,Electrical layout,Site Visit.

The materials used are moslty materials that the cient already had the bricks are of different types that's to be used for the exposed brick work, the marble for part flooring and finally the cement bricks are speading the building process.

When proposing the slab at the rear end for the toilet there was a problem that a occured the toilet is coming to me 1" lower than it should be.

The customer desired an entertainment area on the terrace, complete with a grill and chairs to sit and enjoy the space.

The client wanted the terrace to welcome the hundreds of birds that regularly come to visit the place. He proposed that the parapet walls be lined with planter boxes because the neighboring residences share the compound wall and there are no vistas to gaze out.

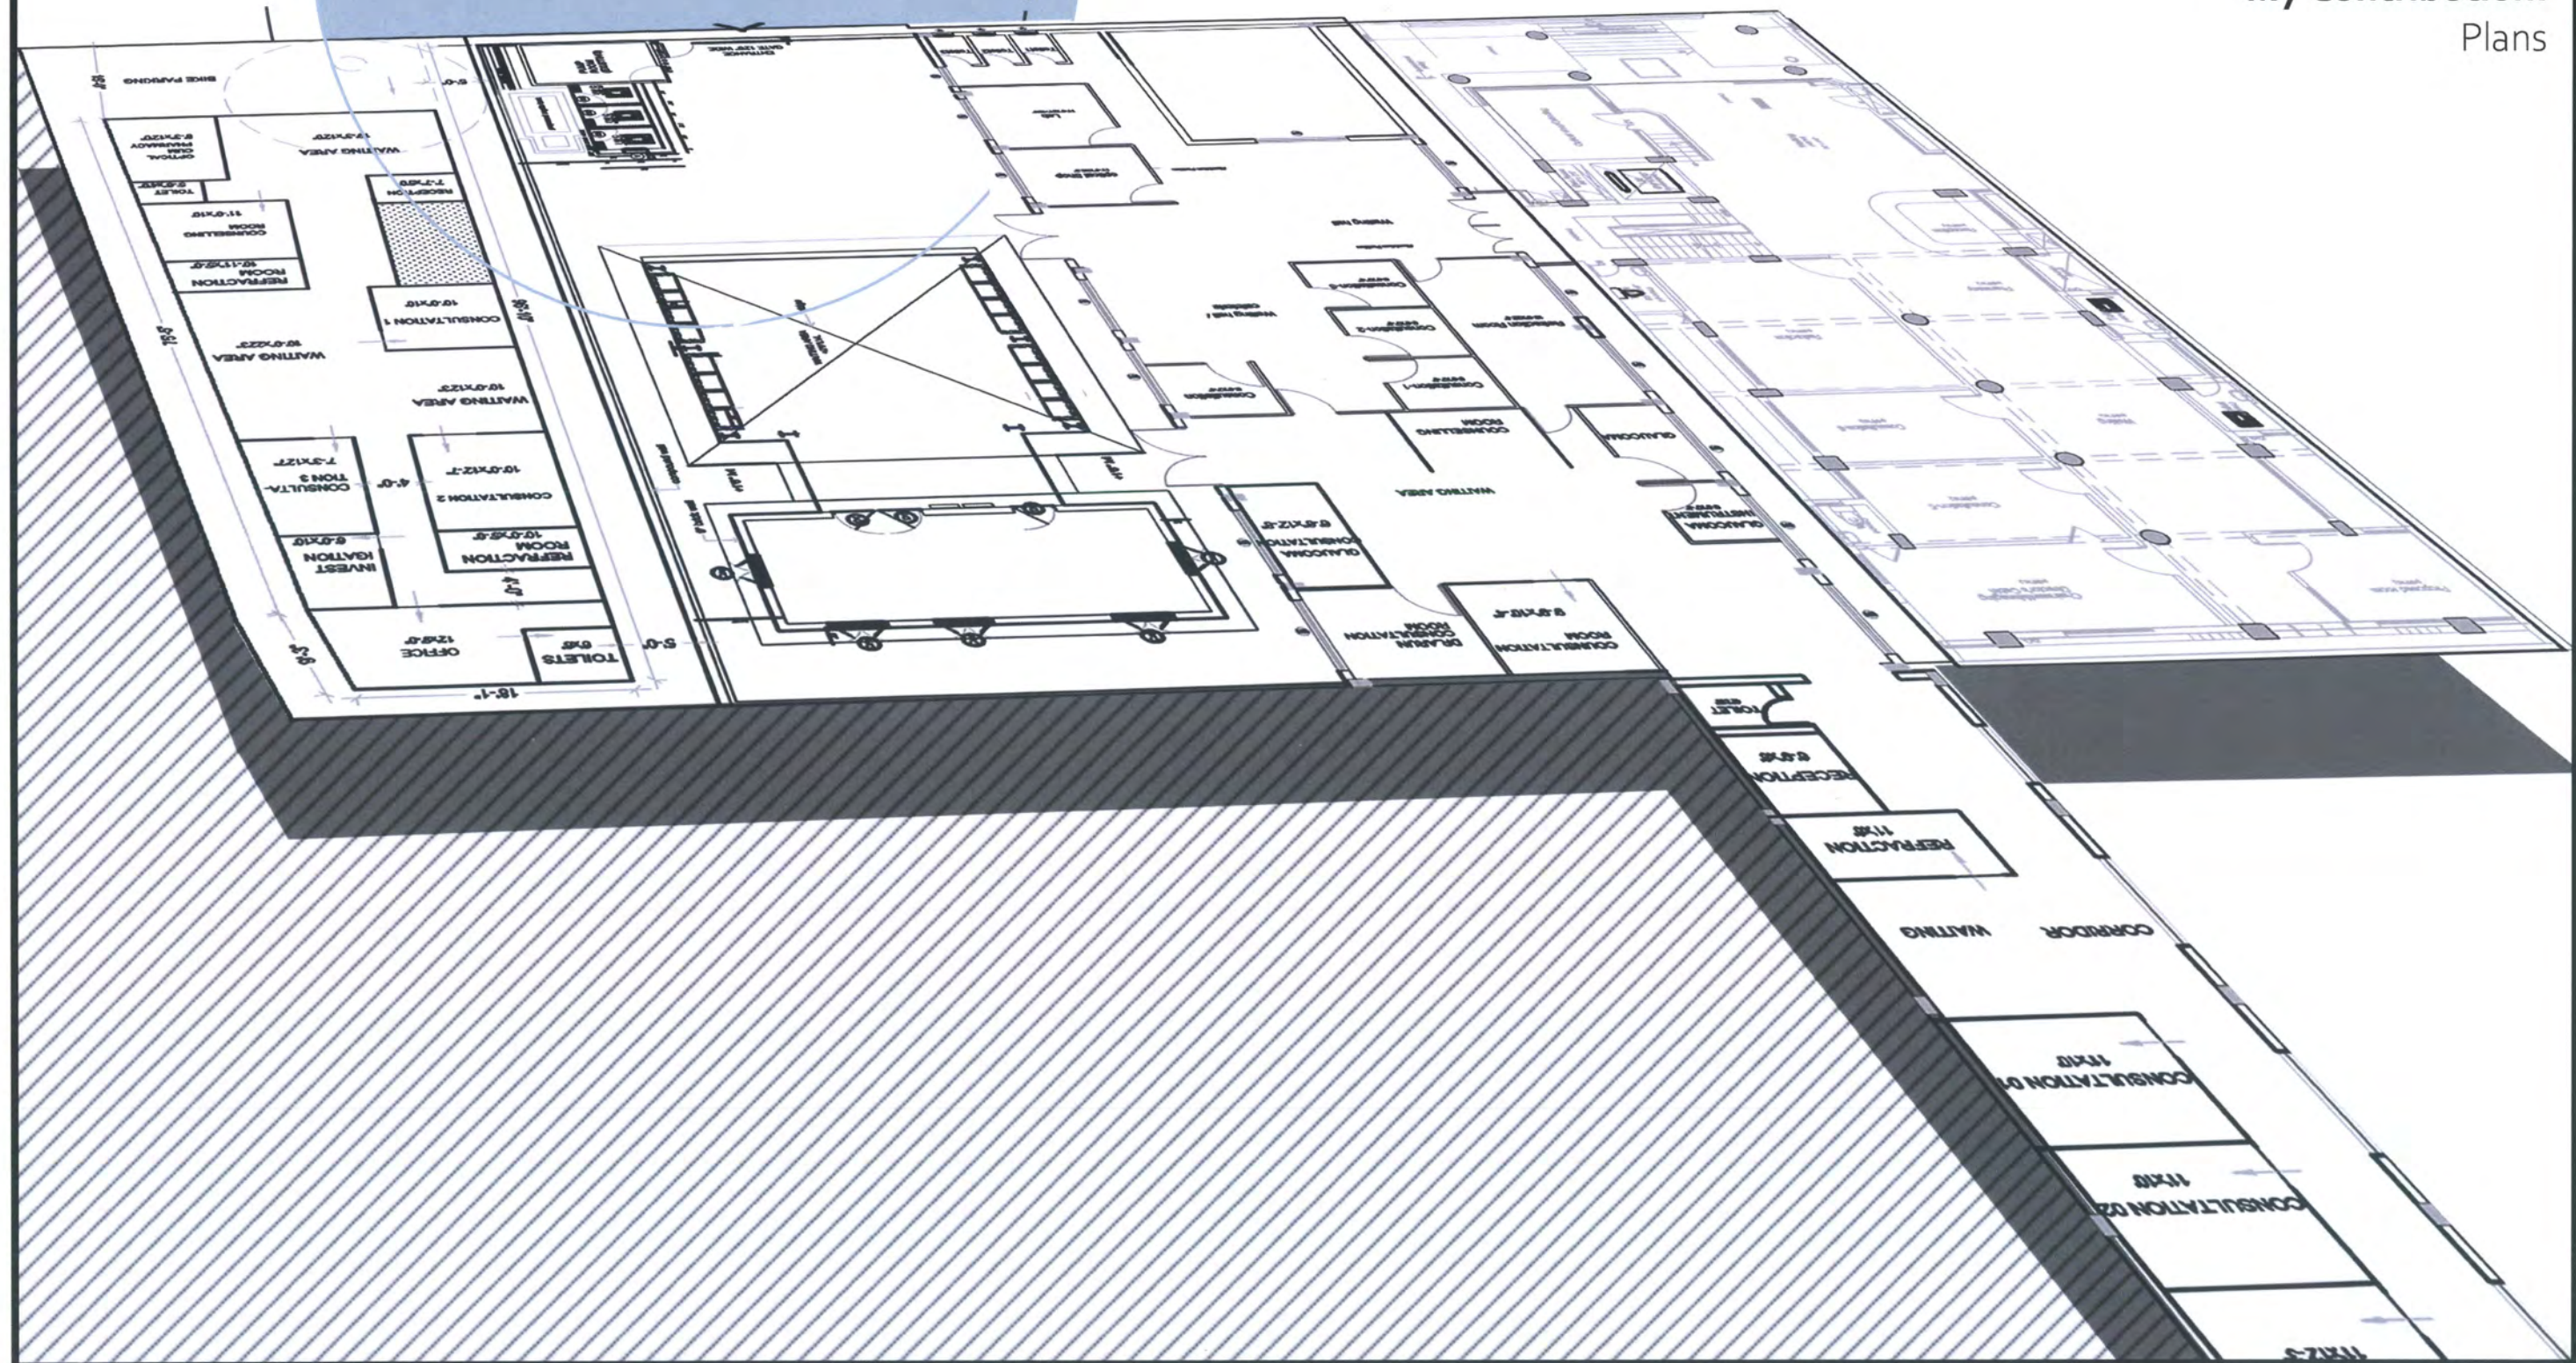

The building is surrounded by other residential buildings and they all share the coumpound.

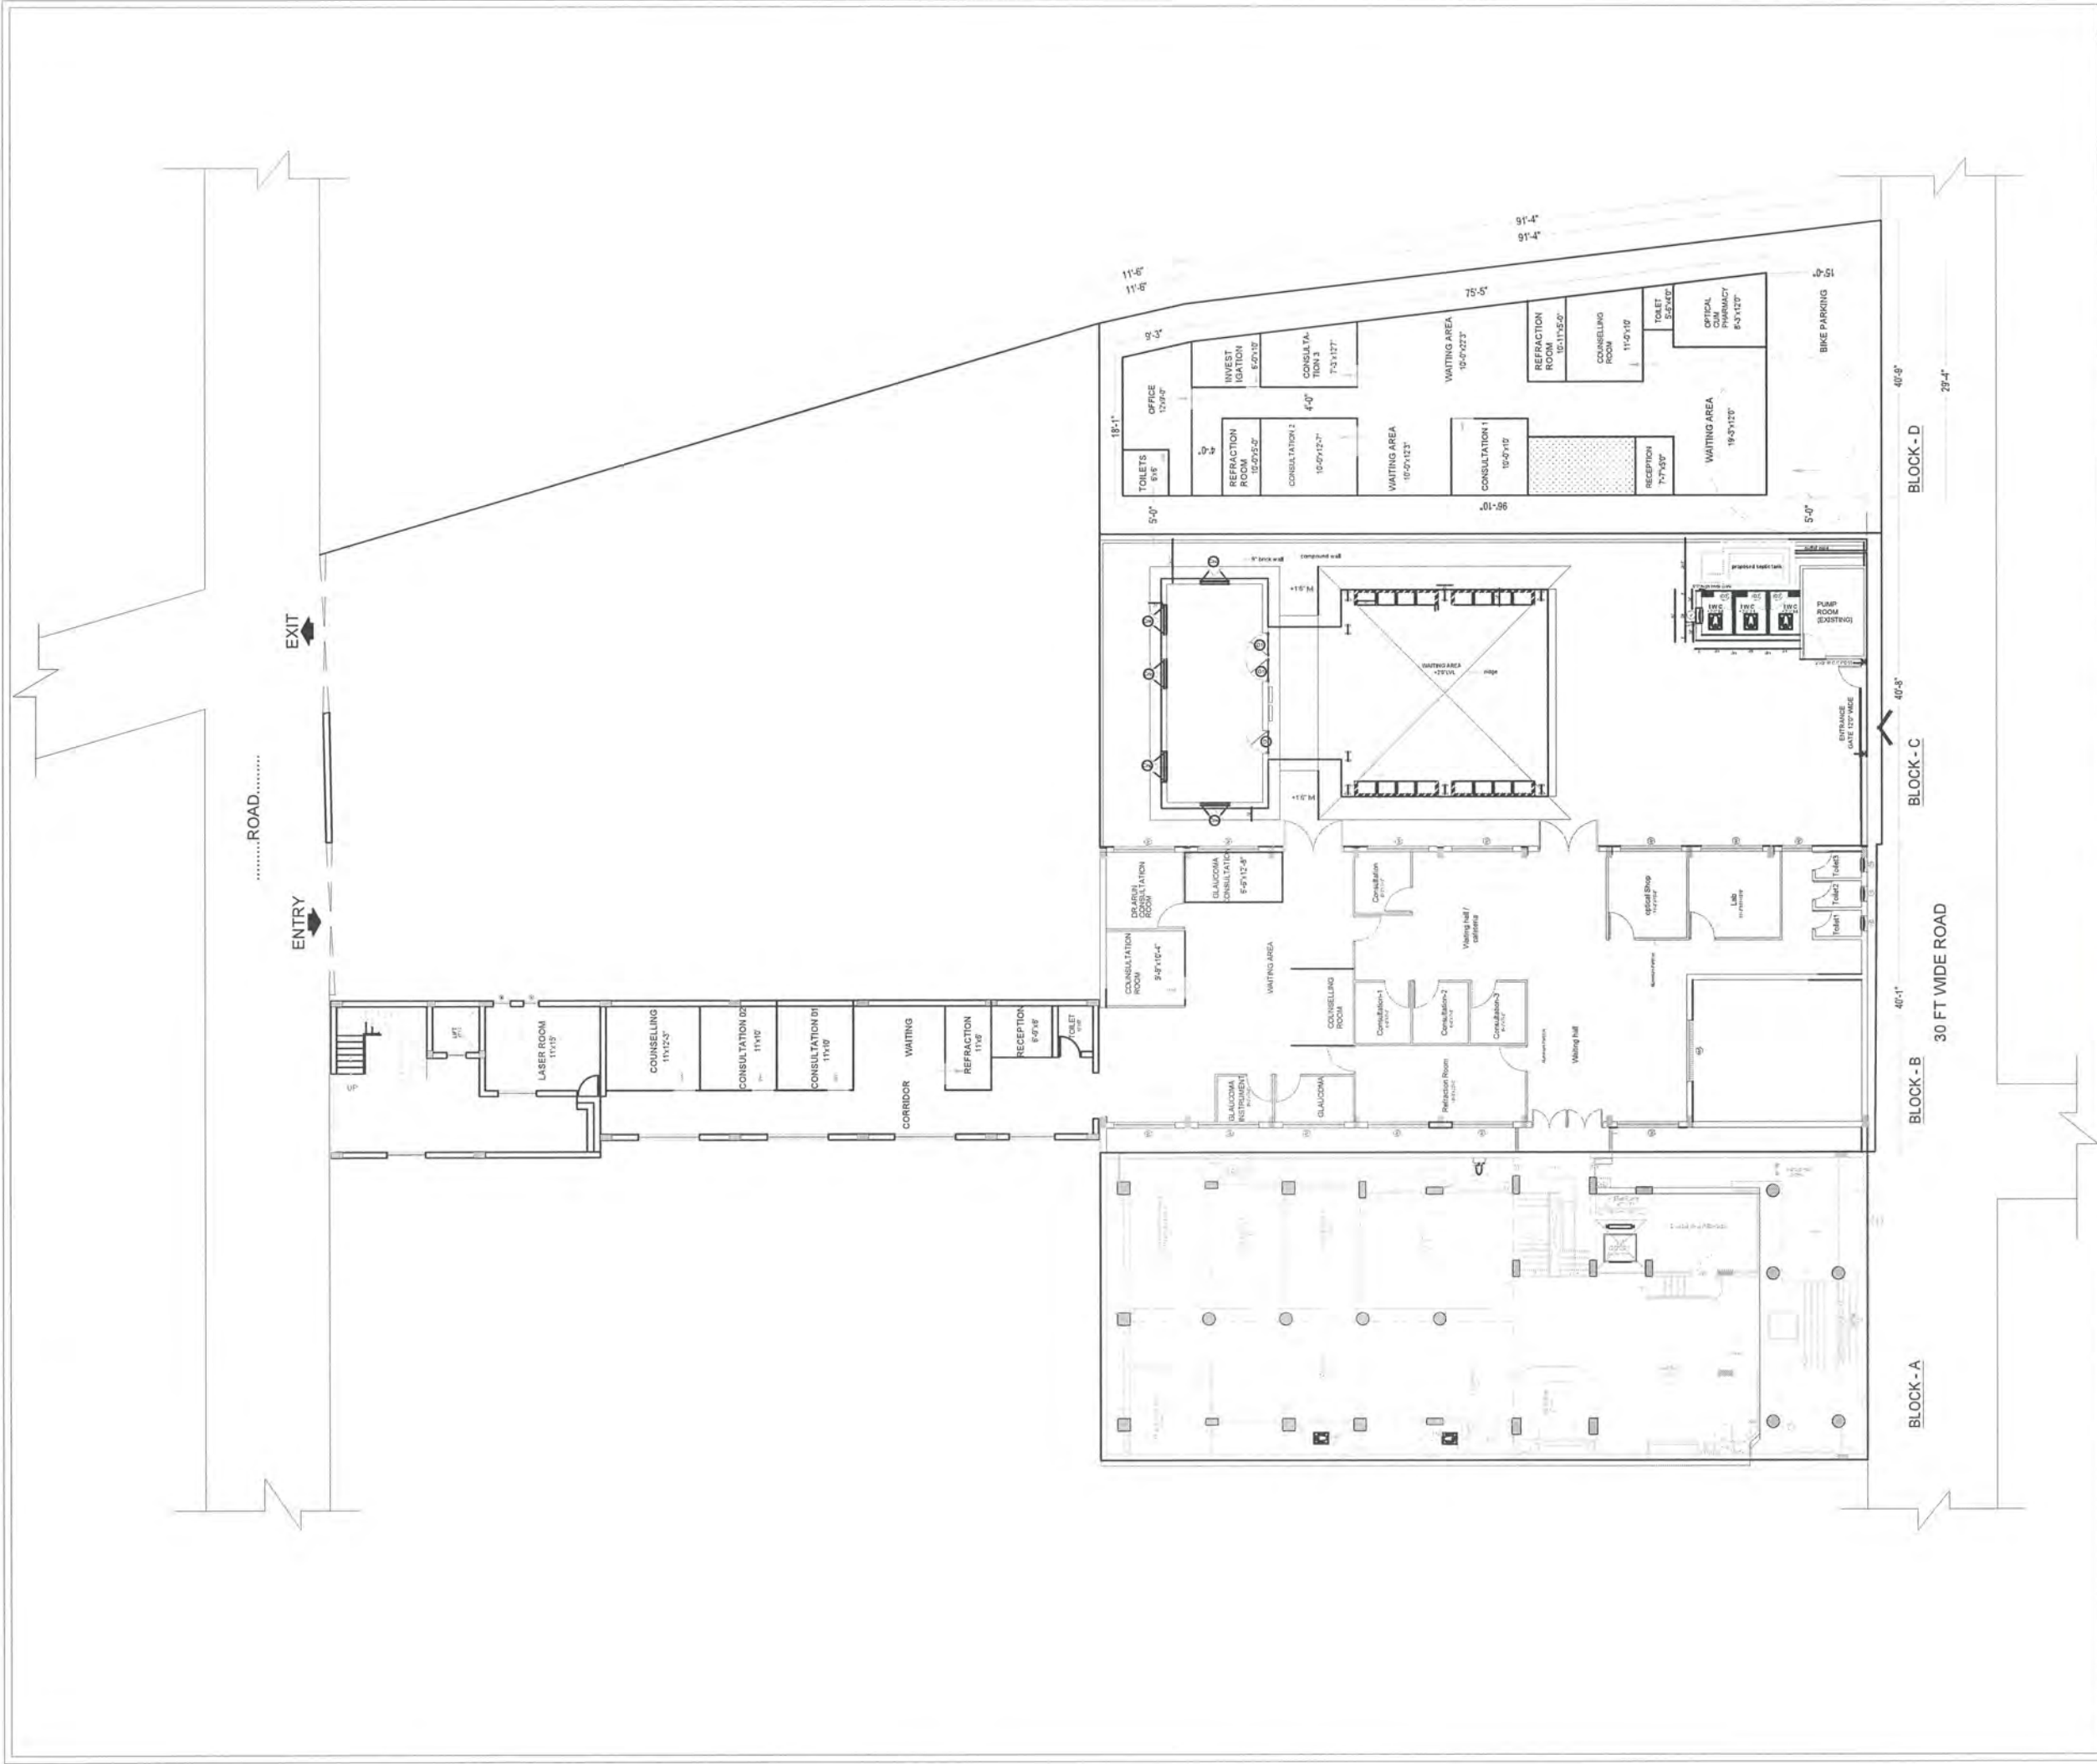

Arasan Hospital

Situated in the city of erode. The client required the services of an eye hospital. With 2 labs and 5 consultation Glaucoma retina rooms, as well as other receptions, services, and so forth. He intended the area to improve patient flow by raising footfall while decreasing the number of steps the patient had to take. The challenge was to integrate each block with appropriate lighting while also getting inside to elevate the patient experience to the next level.

My Contribution:
Plans

BLOCK - D
OPTION-1

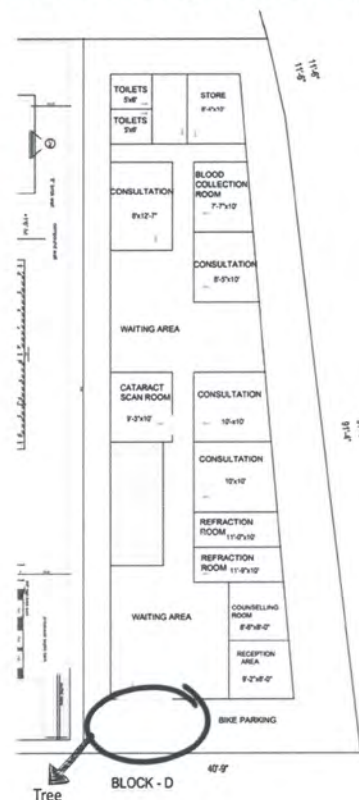

BLOCK - D
OPTION-2

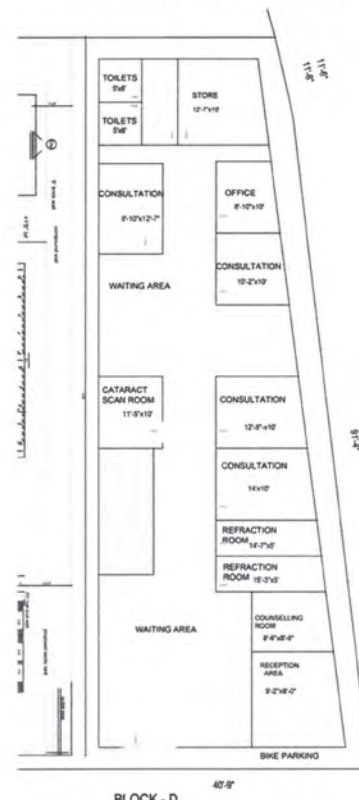

BLOCK - D
OPTION-3

The first three options were designed to demonstrate various methods of organizing the essential areas. Options 1 and 3 are connected to Block C, however, Option 2 has two separate waiting rooms, one for reception and another for the consultant rooms. To show the client all of the possibilities, the setbacks differ in all three versions.

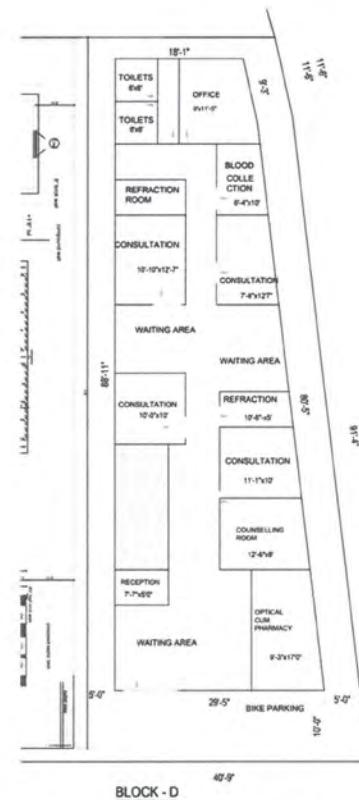

BLOCK - D
OPTION-1

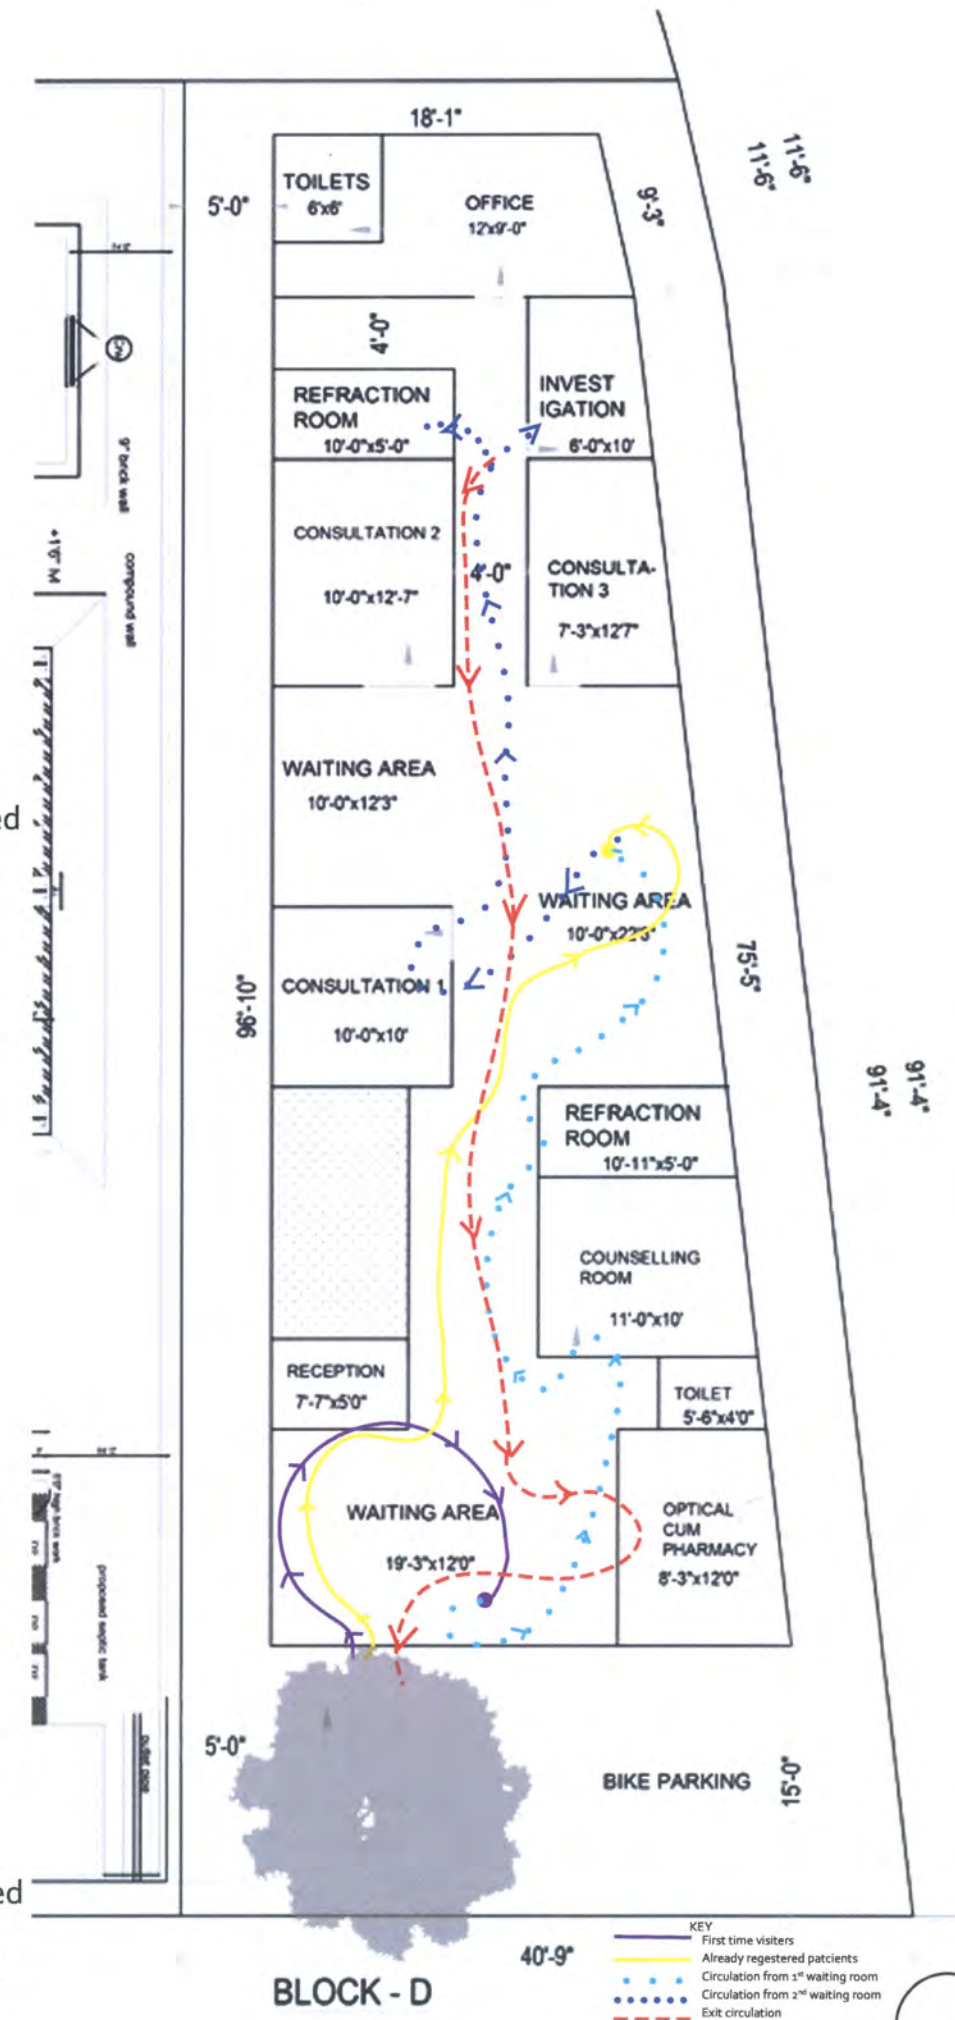

BLOCK - D
OPTION-2

The option 2 was chosen by they client, then we made further options in terms on where which rooms should be located. The setbacks again are different which makes the size of each room differ in both the options. And finally in option the tree in the front need not be uprooted as setbacks is given for it.

BLOCK - D

The client requested that a pharmacy be located near the front reception area and one of the refractions be located near the counseling room. The bathrooms in the back have been relocated to the front, and the entire rear end has been allocated to office space. The spaces were designed to accommodate the influx of patients visiting the hospital.

BLOCK - D

The Final plan

Kaipsha Residence

In the heart of the city - Salem, Tamilnadu, Mr.Kaipsha and his family's Dreamhouse is being constructed with beautiful inclined walls in the facade and surrounded by landscape area. The design idea is to provide a beautiful contemporary house for a pure orthodox Muslim family creating exciting spaces and surprising elements featuring within the building. As a way of life, the house should provide a complete living web that reflects the lifestyle of Muslims. The House should be as ample and comfortable as possible. Effective ventilation and lighting are very important. Gardens and fountains have been part of the Islamic tradition for centuries. These features have been aesthetically and functionally infused in this house.

SUKUMAR RESIDENCE

My Contributions:
Toilet interior elevations

A Politician's life has a lot to do with Public appearances and participation. Hence Mr. Sukumar wanted a house that is far from the public chaos. He wanted to live peacefully with his two daughters. He wanted a huge garden space in front of the house and green courts all around. Because of his profession he wanted to seclude all the private spaces. He wanted proper segregation of public, semi public and private spaces. The design process called in for a lot of analytical thinking

Dr.Mathan Residence My Contributions:

Virutal Model, Ramp and Entry step
Detail, Staircase detail.

Dr.Mathan's residence and clinic in Chengalpattu is a simple dwelling with a blend of contemporary and traditional architecture. The clinic is located in the building's basement. There is a central common room, and also the house is completely interactive, since individuals from the kitchen may interact with those in the office. This intern created a quandary, since maintaining privacy in these open and active areas was difficult. The residence is designed in such a way that the clients will fully enjoy the space.

Santhosh Residence

The residence with brick perforated walls and camp jalli located in Pondicherry is the residence of Mr. Santhosh from the UK who wanted a humble abode for his family, which includes his mother and two sisters, he wanted it to be on a low budget, and wanted level differences for privacy, the ground floor has a living room, kitchen, and other spaces, the first floor is for his parents and sisters, and the second floor is for him. The central court in the heart of the home, with exposed brickwork and the scenic koi pond, would be the house's centerpiece.

Great Souls-Vallalar competition

Our proposal for the competition - Vallar International center at Vadalur made sure the design concurred with his compassionate nature and his benevolent teachings. The plan accommodates a Meditation center, a Museum, a Knowledge center, a Library, a Research and development center and an auditorium. The design furthered upon the spaces with an importance to shed light on his teachings and to represent them in an experiential layer. The free flowing form of the overall structure with interweaving spaces reduced its rigidity and rather made it to be in harmony with nature. The overall planning of the site was developed and evolved with his teachings being the prime inspiration.

My contributions:

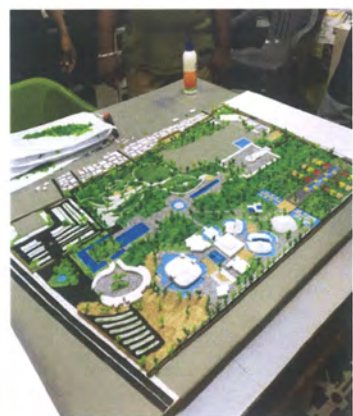

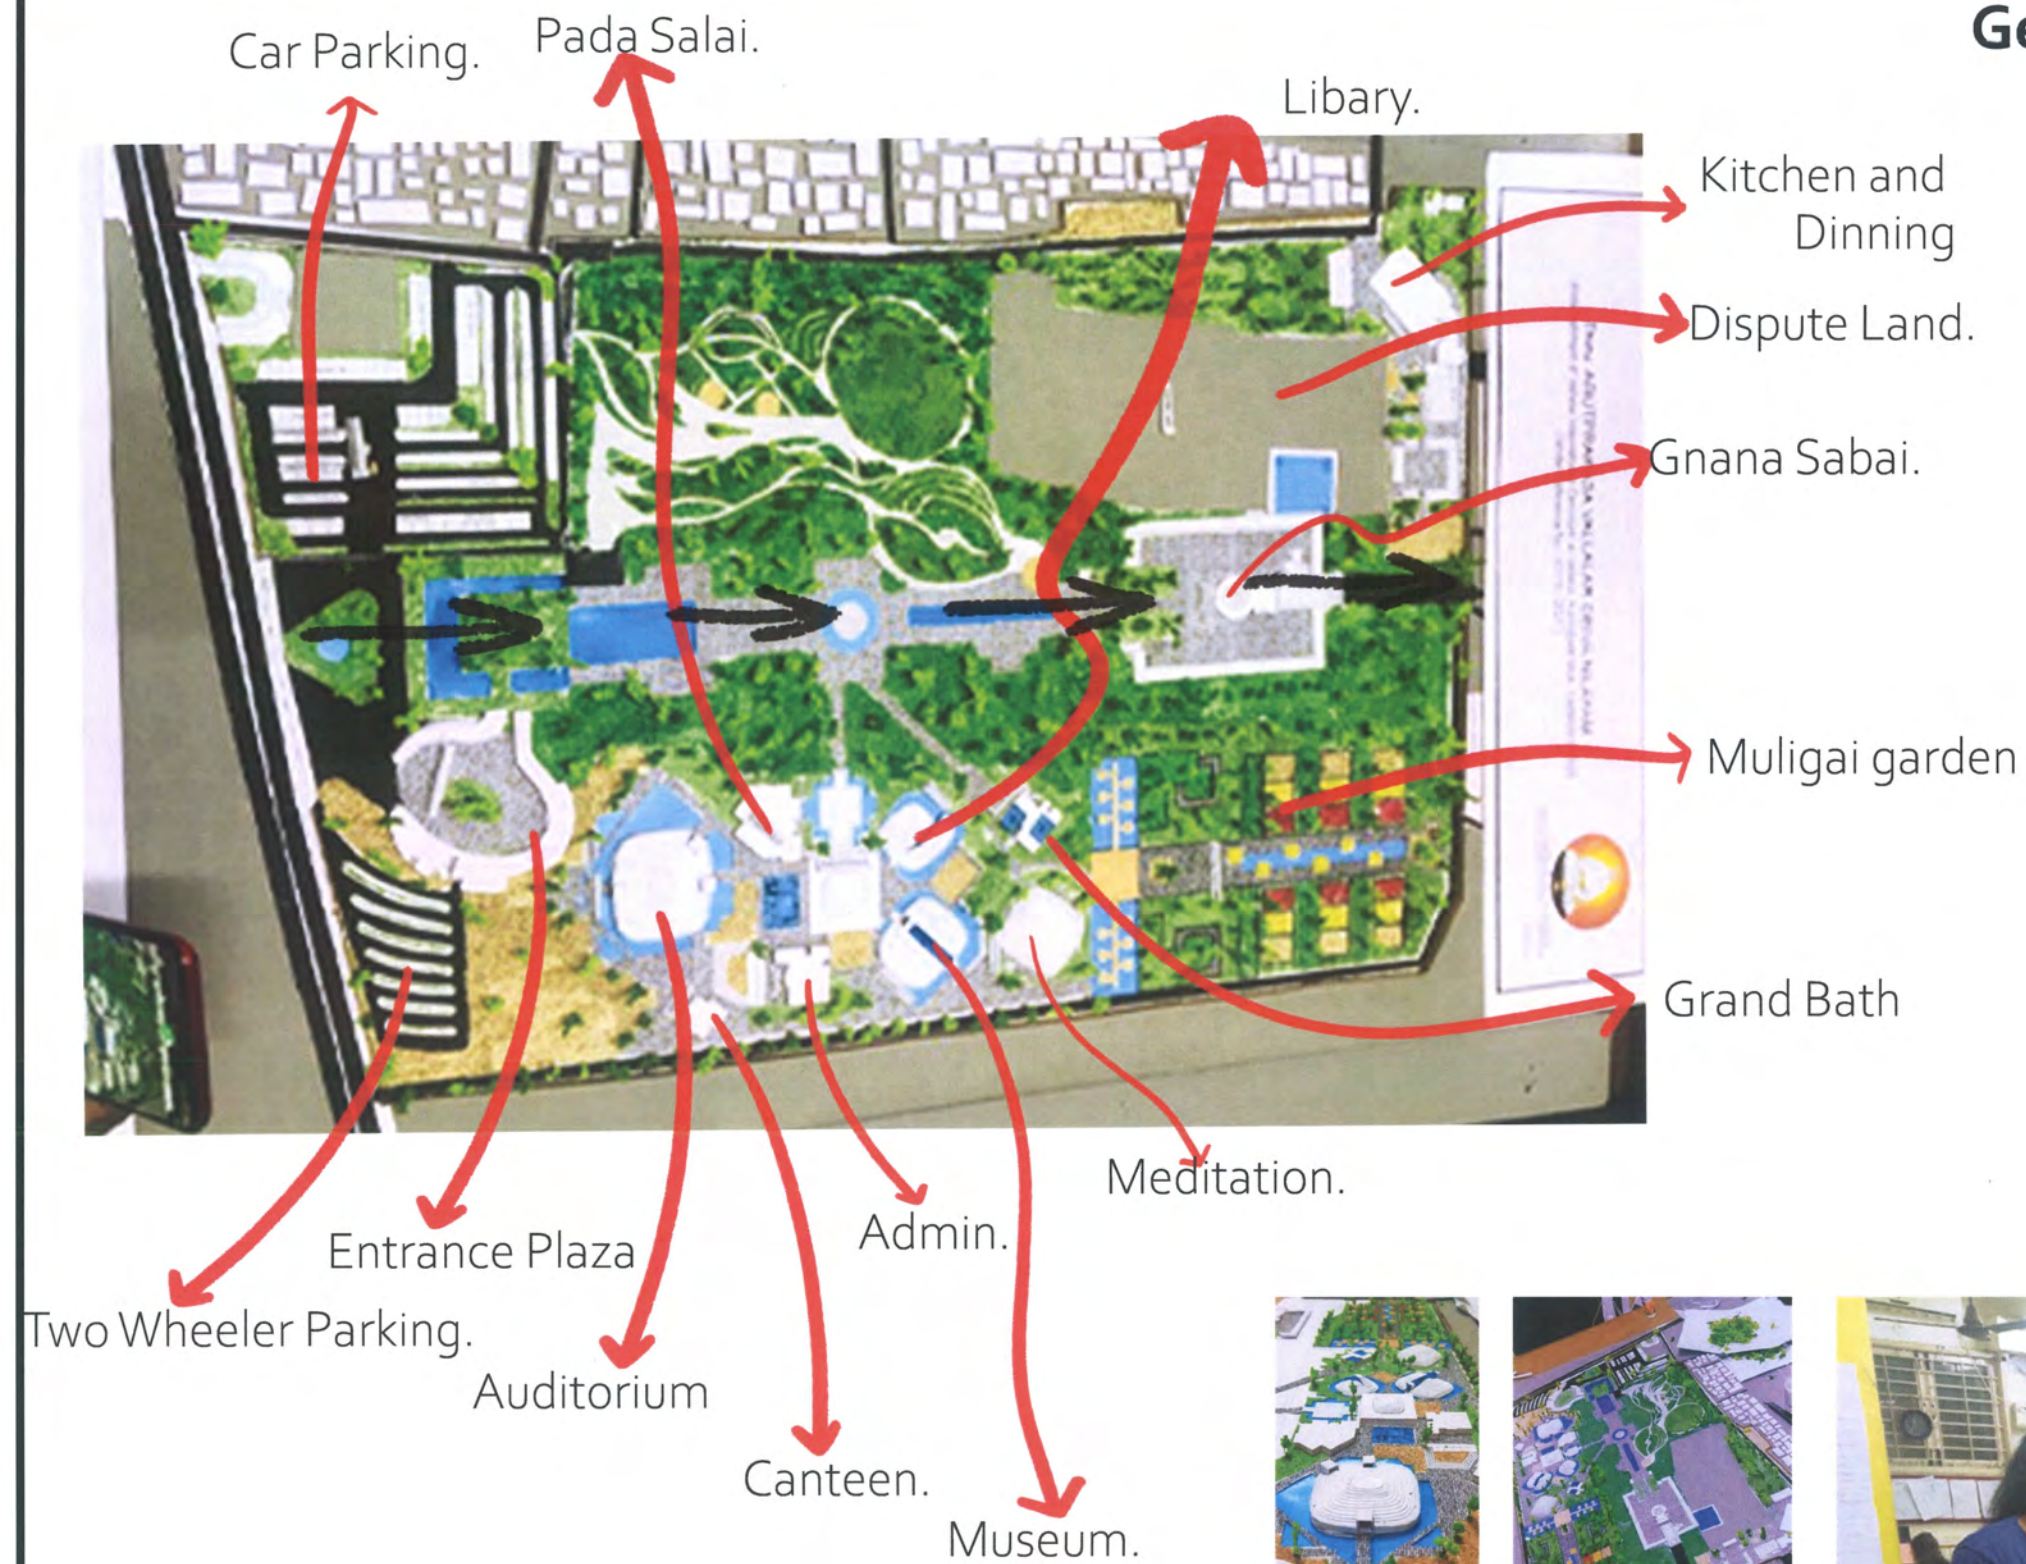

Physical model

Gerat Souls-Vallalar competition.

Physical model

Gated Community

Gated Community is a project where five friends come together to build their dream homes. There are numerous interactive areas for people of all ages including children, men, and women. This home is customized for each family according to their specific needs. It is a modern house with all the standard features and architecture of Tamil Nadu, with features such as Thinaï outside the house, the arrangement of the five houses is designed to reflect the village of the past. An outdoor area with numerous landscape elements and a children's playground focuses mainly on interactive environments with different bags. Parking is planned in front so as not to block pedestrian traffic.

Client Presentations (Residences)

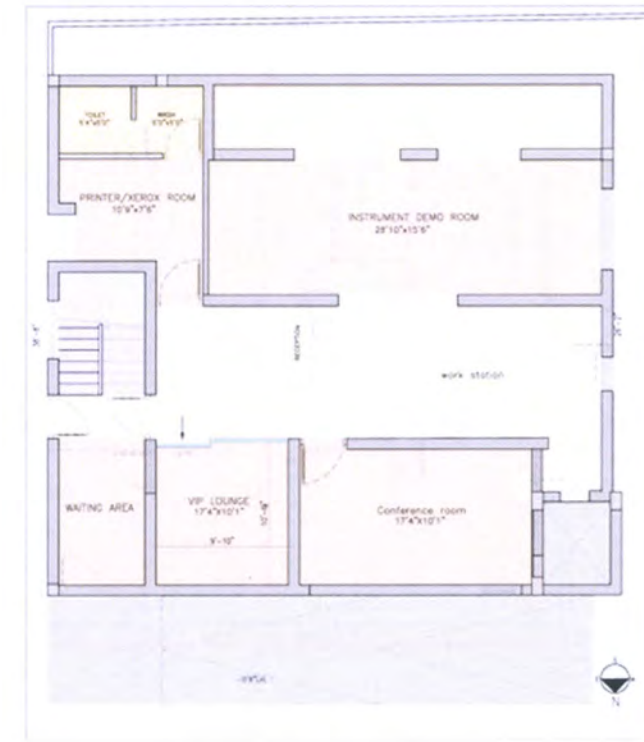

Rendering Plans for Client Meetings.

We learned the importance of creating a meticulous and well-organized presentation that the client can understand, and the importance of creating multiple options for doing so. The time pressure was initially difficult to manage, partly due to the time constraints we had to deal with the changes in, but by preparing these presentations, we were able to manage the pressure and deliver within the required time frame.

Arunselvaganapathy Residence

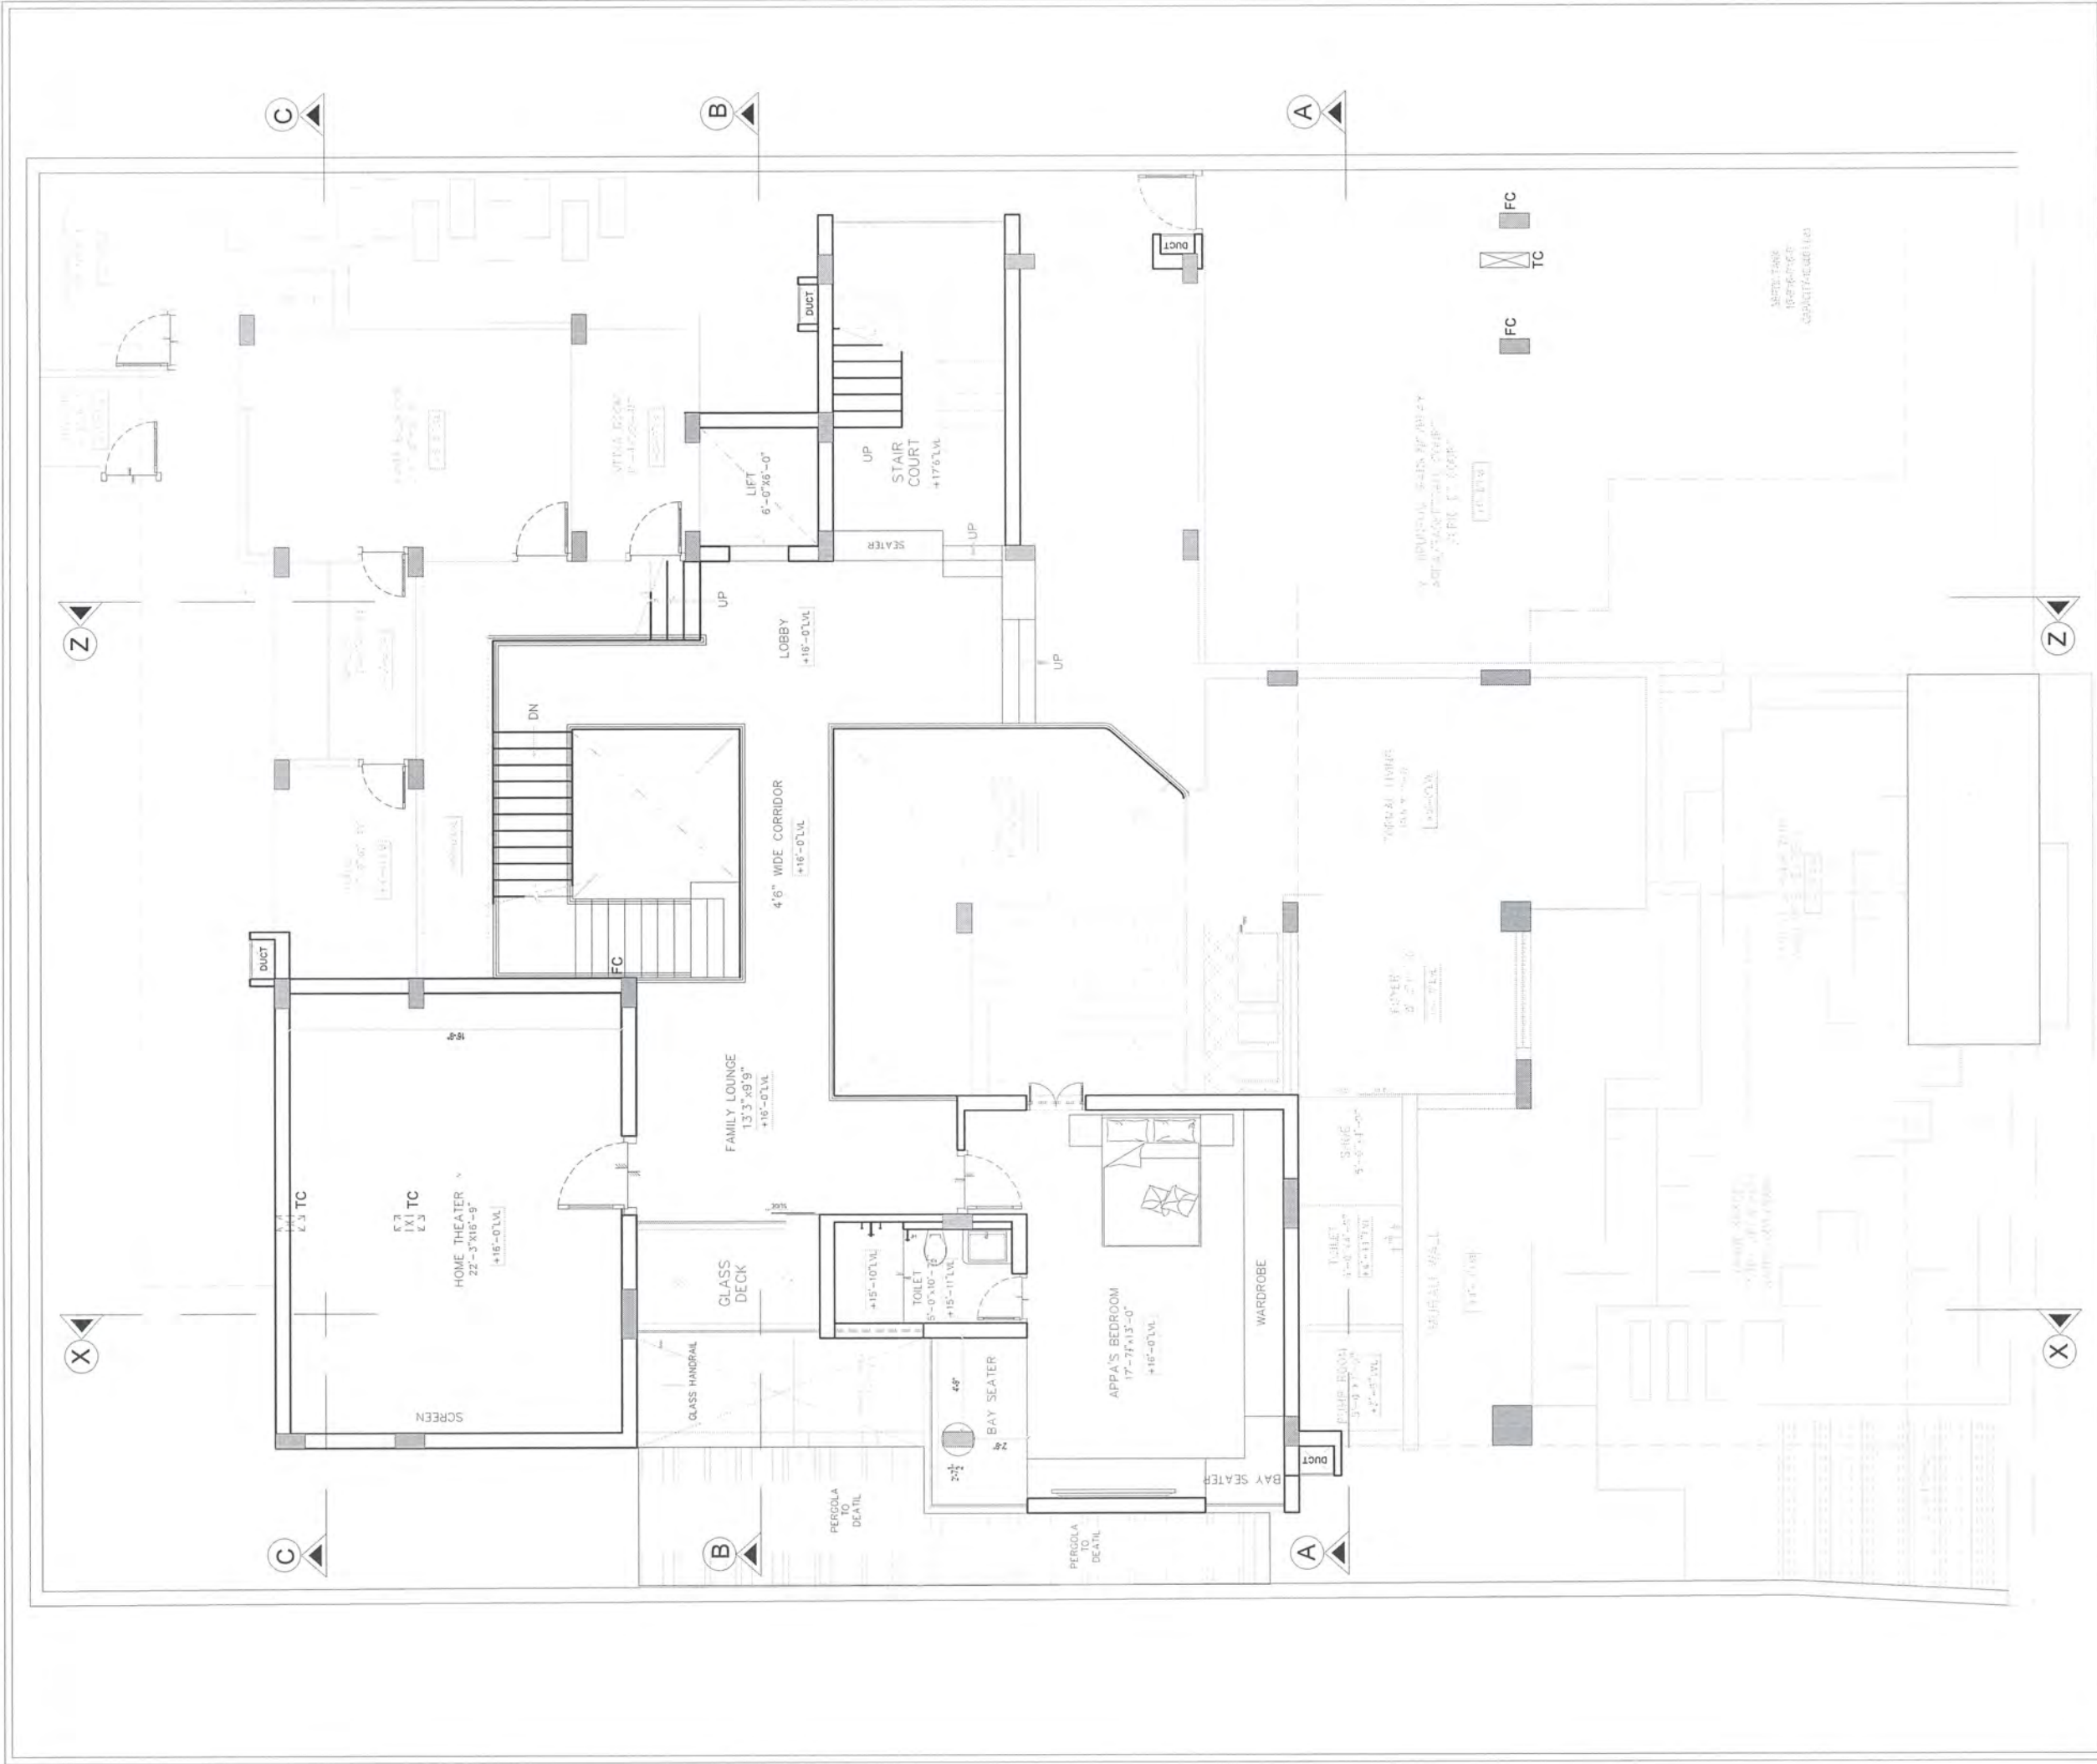

A home is said to be composed of love, hope and dreams. Arun selvaganapathy's residence at Injambakkam stands true to this phrase. The client Mr. Arun Selvaganapathy previously based in U.S and his wife Gayathri Arun Selvaganapathy with their kids Lucky and Eshwar intend to live with their parents. They wanted an exemplary house within the surrounding area. The spaces designed by our team amalgamated into the elevation that stood a strong statement to the overall structure standing merit to our team's goal of delivering a form that was futuristic and dynamic. The overall planning emphasized that it doesn't pose a danger to the existing vegetation.

Meetings

I had the opportunity to attend client meetings and understand how to speak and make them voice out their opinions. I was able to understand how to talk with different clients from different backgrounds and how to make them comfortable enough to talk and express their thoughts on what they wanted in their dream house. We were also part of the MA team meetings where we learned how to work as a team and create a comfortable space for everyone to work freely.

Critical Overview

Murali architects, one of the innovative design firms in Tamil Nadu, provides architectural and interior design services. Where I completed my internship. I began my internship by making client presentations and subsequently became involved in many designs and construction drawings. I went to a new client meeting with the chief architect, where I learnt how to approach clients with design ideas. I worked on a variety of projects, each with a distinct design language, which helped me learn about sections, elevations, and detail drawings. I also had the chance to work with the PCOs, who helped me comprehend all of the structural drawings and intricacies. Working with Ar. Murali sir gave me an unique outlook on architecture. The internship was an incredible experience that taught me not just architecture but also how to approach people, communicate with suppliers and authors, and even phone individuals for interviews. I learnt not only how to work in an architectural firm, but also how to operate.
