### **CRITICAL OVERVIEW:**

*My time at THE G was wonderful and really productive. Being a part of their firm and working with their team was a privilege for me. I have discovered a lot of new knowledge through this internship opportunity. I got to understand the project's practical knowledge, the firm's management, and how activities are coordinated amongst several divisions. I had the opportunity to learn many new CAD skills by working with other professionals. Additionally, I developed different perspectives on design while working on various projects.*
