SIGNATURE OF CANDIDATE

ACKNOWLEDGEMENT

I am pleased to acknowledge my sincere thanks to the Board of Management of SATHYABAMA for their kind encouragement in doing this practical training and for completing it successfully. I am grateful to them.

I convey my thanks to Dr. Devyani Gangopadhyay, Dean, School of Building and Environment and Ar.Sarath Chandra Kanth, Design Chair, Department of Architecture for having been a constant source of support and encouragement.

I wish to express my thanks to all Teaching and Non-teaching staff members of the Department who were helpful in many ways for the completion of the project.

I also wish to thank Ar. Ranjan Daniel, for the experience of interning at their firm.

1.1 ABOUT THE FIRM:

The Architect Ranjan Daniel, qualification statement includes some basic business information from the architectural firm, qualifications for the project, the types of services provided, a list of references, and information about the team that will be working with the owner. Architect Ranjan Daniel also took an active role in the design process to provide the design professionals with the information they require to develop the project design. The scale of the profession's focus on master planning, landscape design, project management, and implementation is extensive. A landscape architect will work with their client to meet the vision they have for their outdoor space.

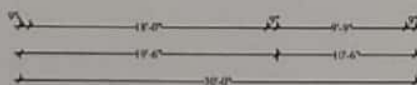

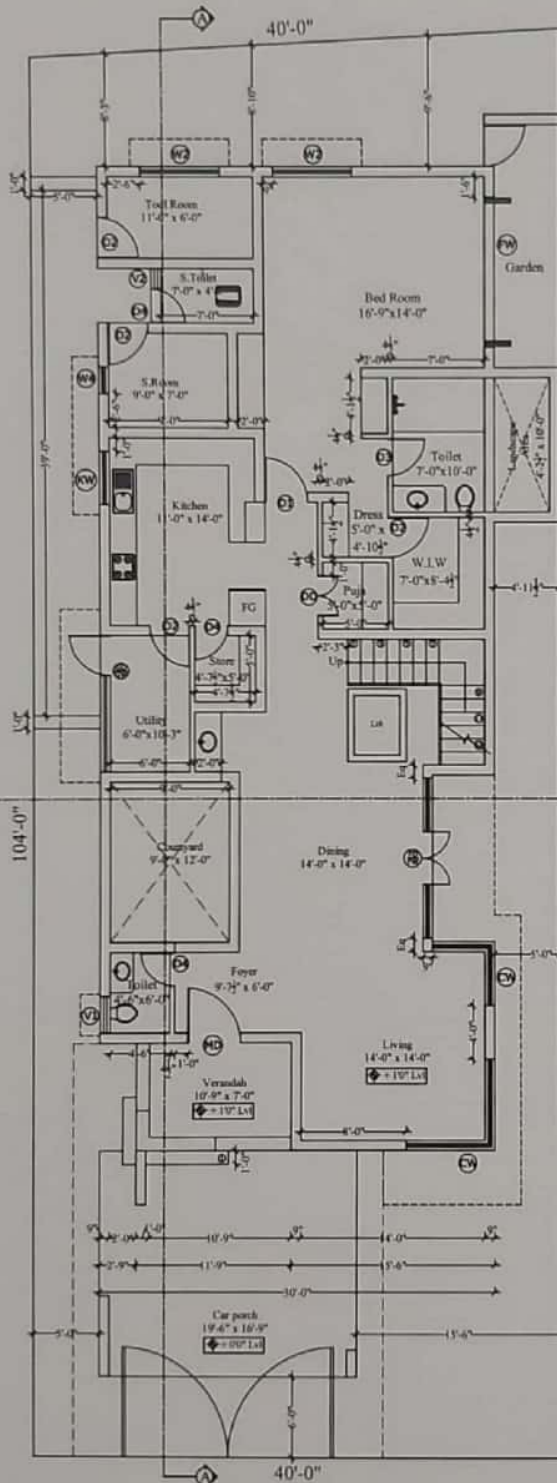

No matter how big or small the project, landscape architects can turn a bland piece of land into something special. During those initial meetings with the client, the landscape architect gets a clear idea of what the space will be used for, as well as how it should look. Most clients will also have a budget, and the architect should keep this in mind during the design process. Once the designs are drawn up, architect will sometime go on to build a model of the space. These models are very detailed, and they include components such as trees, structures, walkways, and bodies of water. Building these models helps clients to better see how their space will look once it has been built. Ar. Ranjan Daniel can also make any last-minute design changes before the actual construction begins.

Timing diagram for the 74VHC125. The diagram shows a square wave for 'Data' and a pulse for 'Clock'. The 'Data' signal is high during the first clock pulse and low during the second. The 'Clock' signal is a single pulse. The output 'Q' is high during the first clock pulse and low during the second.

CRITICAL OVERVIEW:

The internship is ideal for students majoring in Landscape Architecture who are looking forward to a career in a public or private design organization. The internship was offered as hybrid opportunity to assist the Landscape Architects with various projects that develop out of current design needs or multi-year projects. Intern's projects typically involve the development of designs, presentations, and planning reports. All assignments require effective project management skills.

Interns participate in all aspects of the planning, design, and construction process, from review of master plans, to site visits, detailed exhibit design, preparation of illustrative plans, renderings, and planting plans, product research, construction observation, and meetings with architects, engineers, museum representatives, and approving agencies that give a sense of the breadth and depth of landscape architecture
