PLACE : CHENNAI

SIGNATURE OF CANDIDATE

ACKNOWLEDGEMENT

I am pleased to acknowledge my sincere thanks to the Board **of Management of SATHYABAMA** for their kind encouragement in doing this practical training and for completing it successfully. I am grateful to them.

I convey my thanks to **Dr. Devyani Gangopadhyay**, Dean, School of Building and Environment and **Ar.Sarath Chandra Kanth**, Design Chair, Department of Architecture for having been a constant source of support and encouragement.

I wish to express my thanks to all Teaching and Non-teaching staff members of the Department who were helpful in many ways for the completion of the project.

I also wish to thank **Ar.SRIVIDHYA SRINIVASAN**, for the experience of interning at their firm.

SUB: Confirmation of Internship

Dear Sir/Madame,

This letter is to certify that Miss. Jyothika Baburaj, currently in her 7th academic semester in your institution, has started her internship in the office on the 08th of July 2022 for a duration of 90 days.

We look forward to having her in the team.

Thanks.

Kind regards

Srividhya Srinivasan.

STUDIO
ANNEXE

TO WHOMSOEVER IT MAY CONCERN

17 Nov 2022
Coimbatore.

This is to certify that Miss. Jyothika Baburaj, of Sathyabama Institute of Science and Technology, has successfully completed her internship of 90 days with us. (08 July 2022– 29 Oct 2022)

It has been a pleasure to have her in our team.

During her short period here, we have tried to introduce her to the various aspects of our architectural practice – initial conceptualization of design, design development process, preparation of working drawing for execution along with regular site visits.

She has predominantly been involved in residential architecture and interior design projects.

We hope her time in our studio equips her for the rigorous discipline required in our architectural profession, which she needs to develop.

We wish her the very best in all her future explorations.

ABOUT THE FIRM

STUDIO ANNEXE

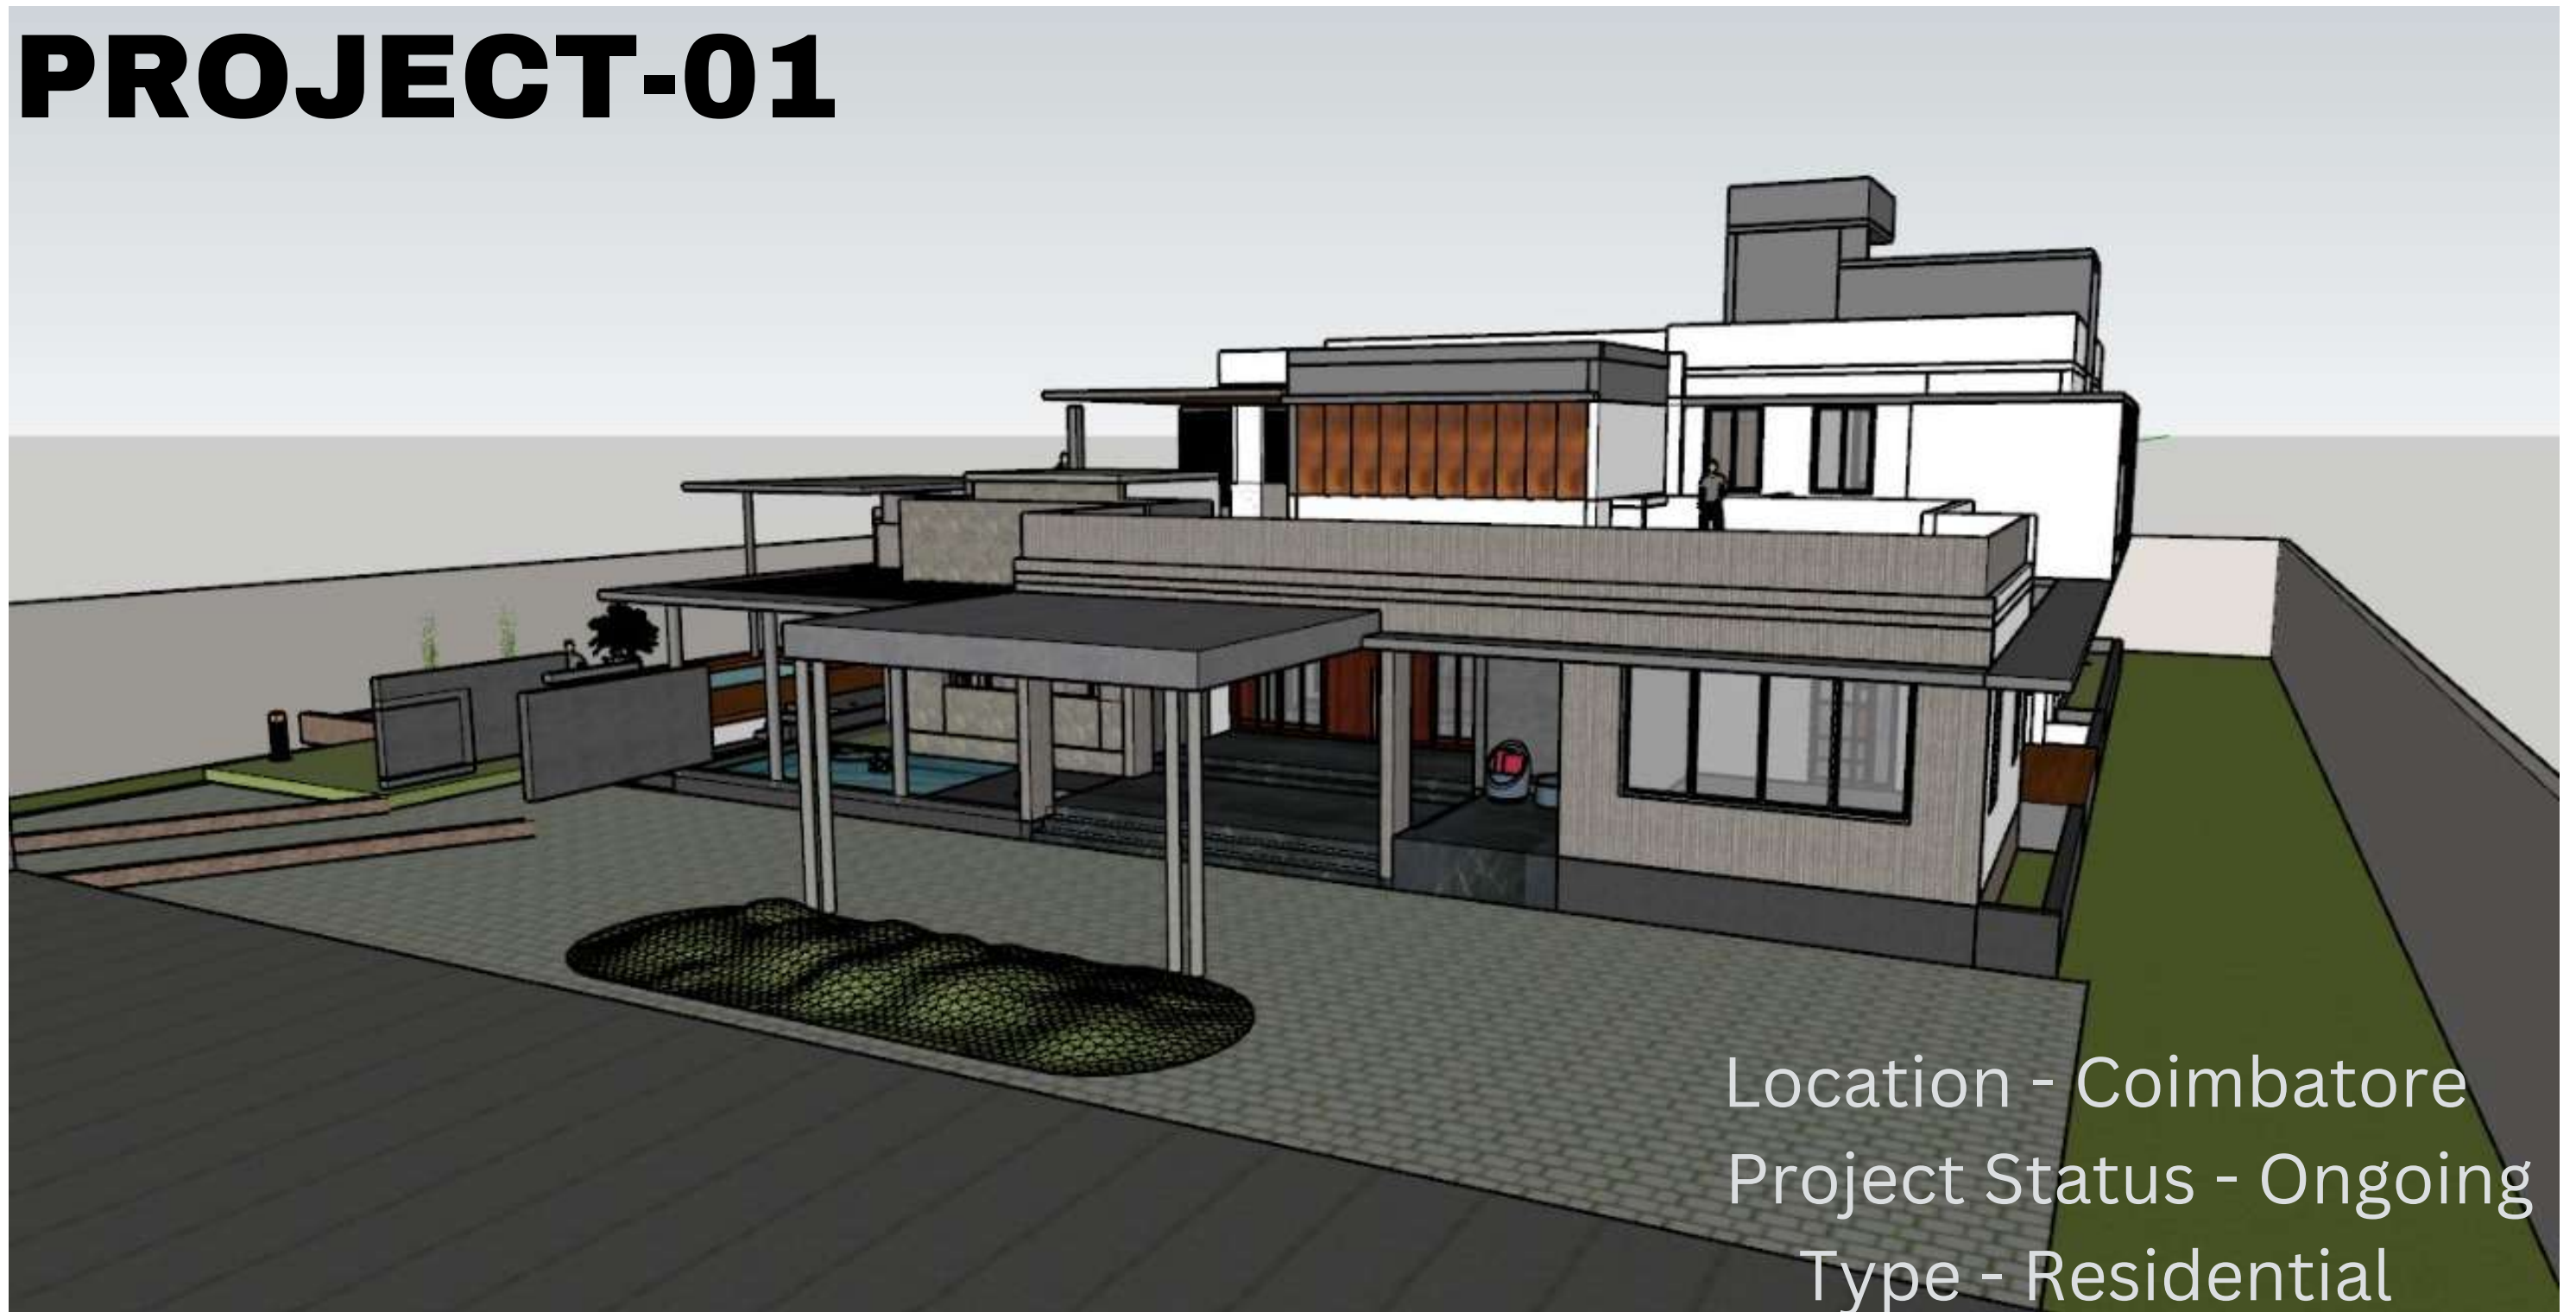

Is a quiet architectural practice in Coimbatore, Tamil Nadu led by Ar Srividhya Srinivasan, who holds a bachelor's Degree from NIT Trichy and a Master's in Architecture and Urbanism from TU Delft.

The small team of passionate architects strives to produce contextually appropriate solutions across a mix of Urban Design, Architectural, Real Estate/Property Development, and Interior Design projects.

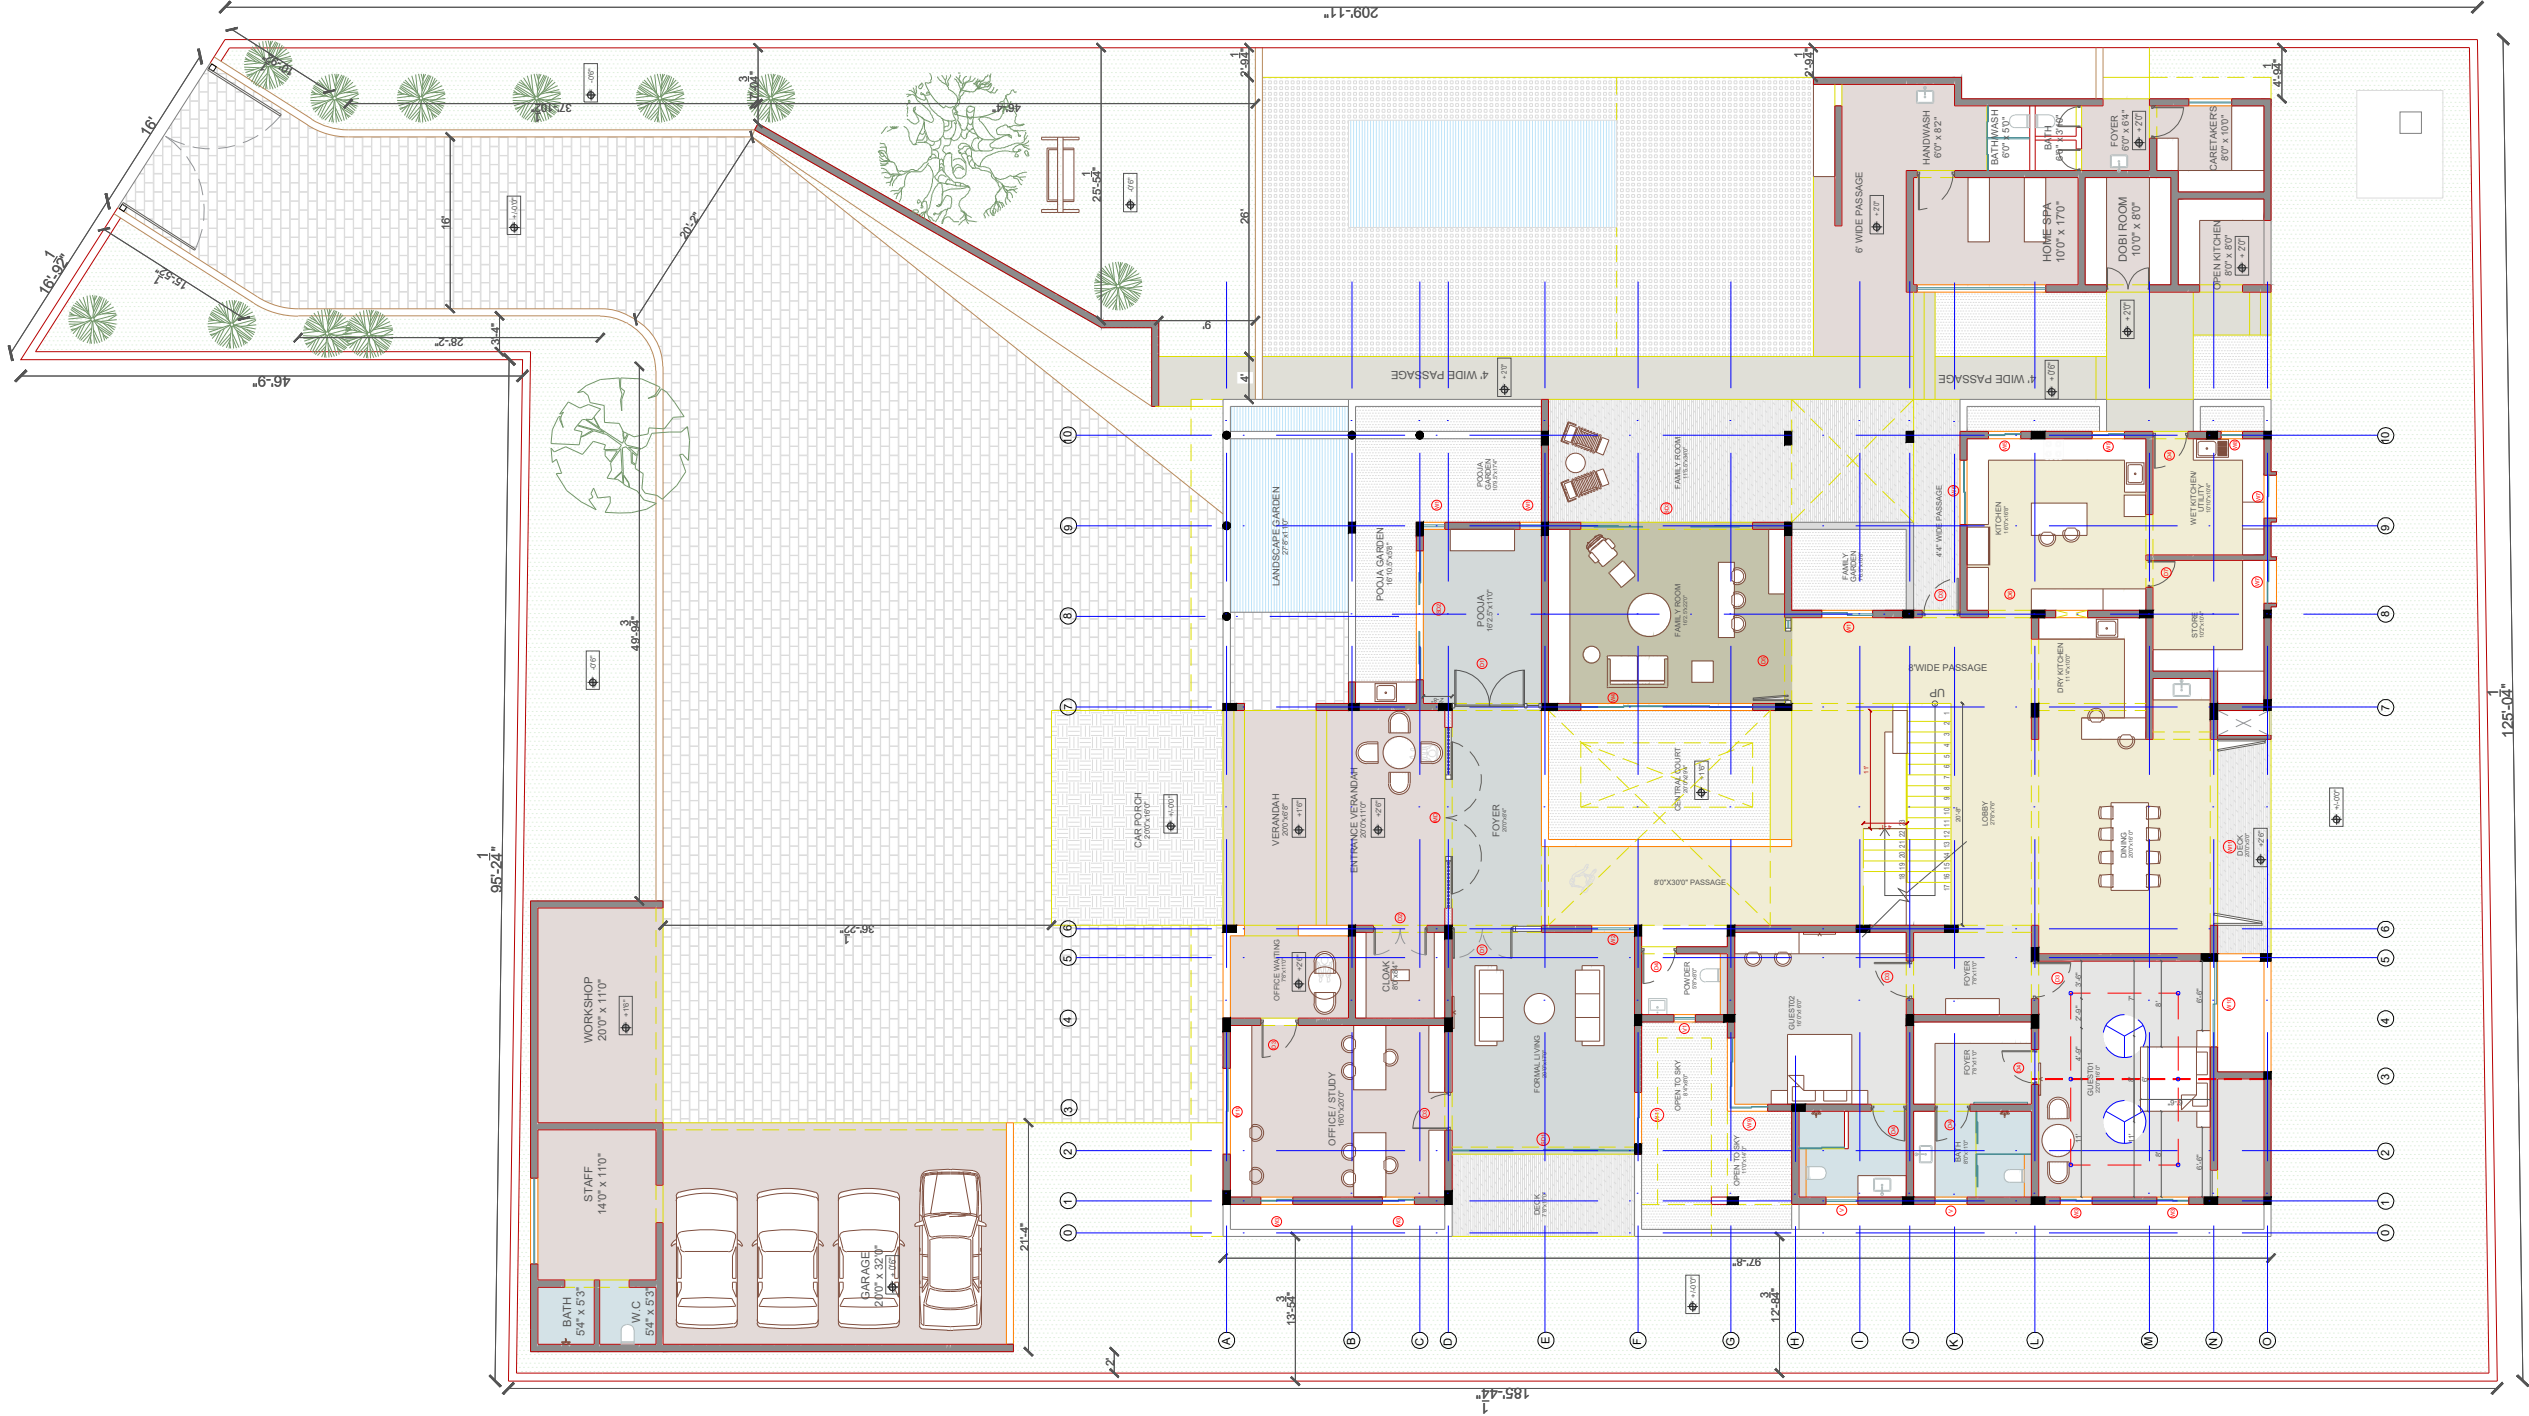

The office approaches any design as a "part" of the bigger "whole" in the Urban Fabric; As an addition or 'annexe to the already existing...

Manual model and basic design model

USONIAN HOUSES

- The word was used by American **Architect F.L. Wright** to refer the US in general, and more specifically to his **vision for the landscape** of the country including the **planning of cities and buildings**.
- Usonian usually refers to a group of approx. **60 middle-income family** homes designed by F.L. Wright at the **beginning of 1934**.

Frank Lloyd Wright
(1867-1959)

USONIAN HOUSES

- The Usonian historic district is a planned community in Pleasantville, **New York**.
- “United States of North America”,
- Wright designed 3 of the 47 homes himself.
- The word **Carport** was coined by Wright to describe an **overhang for sheltering a parked vehicle**.
- Another thing to keep in mind with Wright – he was all about this **idea of unity**.
- The first Usonian house from 1937 looks so familiar and ordinary compared with [Wright's famous 1935 Fallingwater residence](#).
- Most of his clients would lead more **simple lives**, without household help, but still **deserving of sensible, classic design**.
- This style featured **low roofs, open living areas, and built-in furnishings**, The kitchens were incorporated into the living areas. Open carports took the place of garages.
- one-story **structures set on concrete slabs with piping for radiant heat beneath**.

USONIAN HOUSES

The Usonian Automatic

- In the 1950s, when he was in his 80s, Frank Lloyd Wright first used the term *Usonian Automatic* to describe a Usonian-style house made of **inexpensive concrete blocks**.
- The **three-inch-thick modular blocks** could be assembled in a variety of ways and **secured with steel rods and grout**.
- He hoped that home buyers would save money by building their own Usonian Automatic houses. But assembling the modular parts proved complicated — most buyers ended up hiring pros to construct their Usonian houses.
- Wright's aspirations toward simplicity and economy, Usonian houses often exceeded budgeted costs.

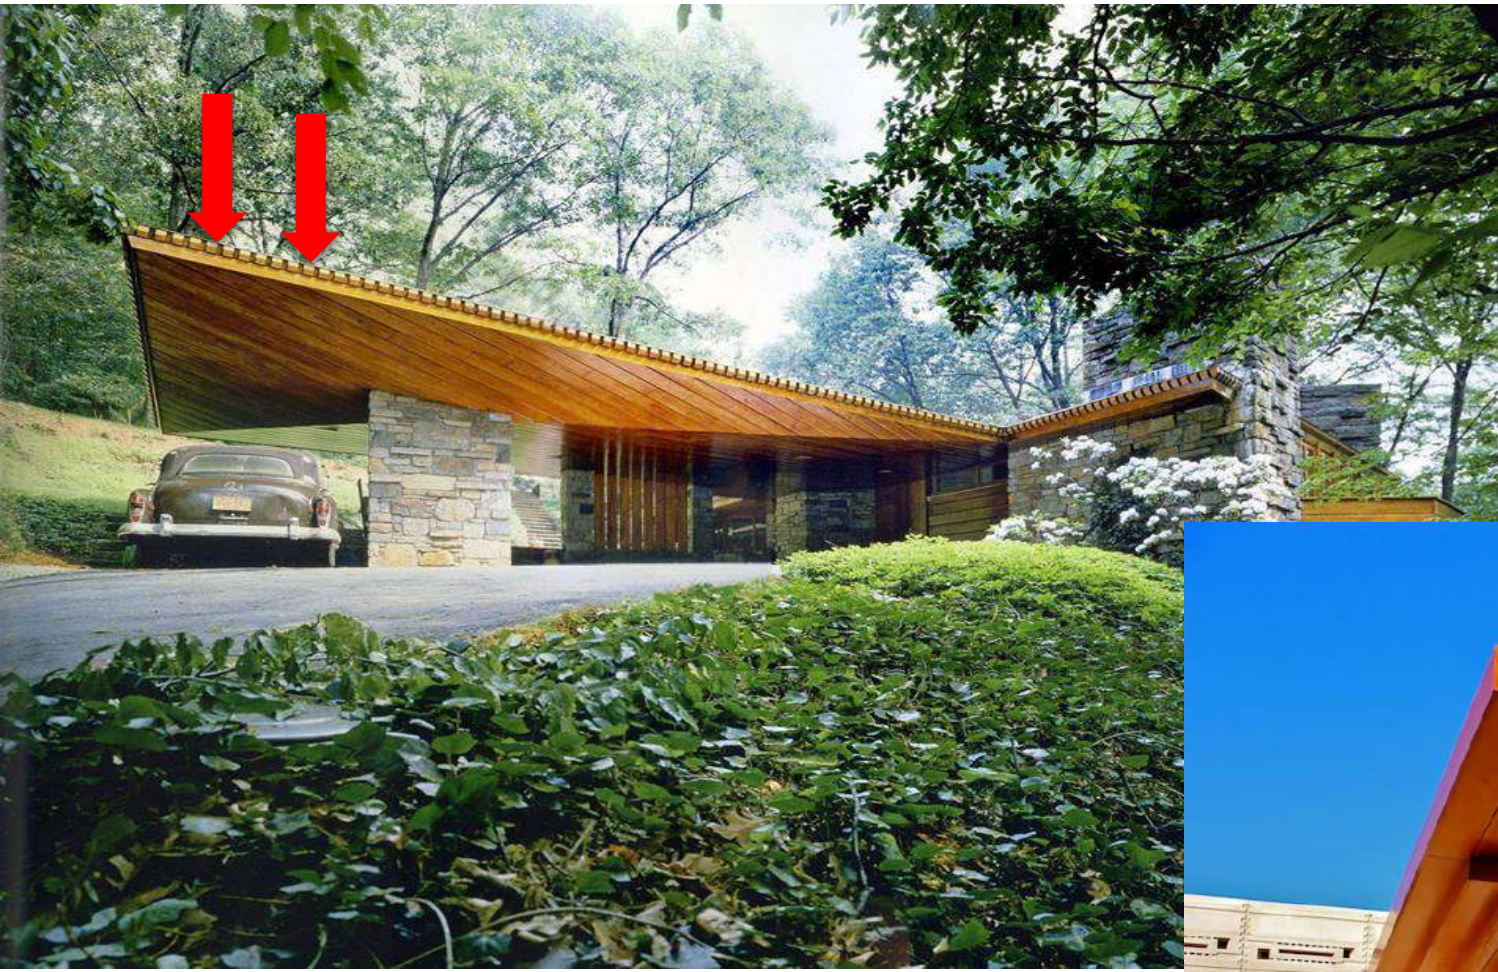

www.shutterstock.com • 731833786

USONIAN HOUSES

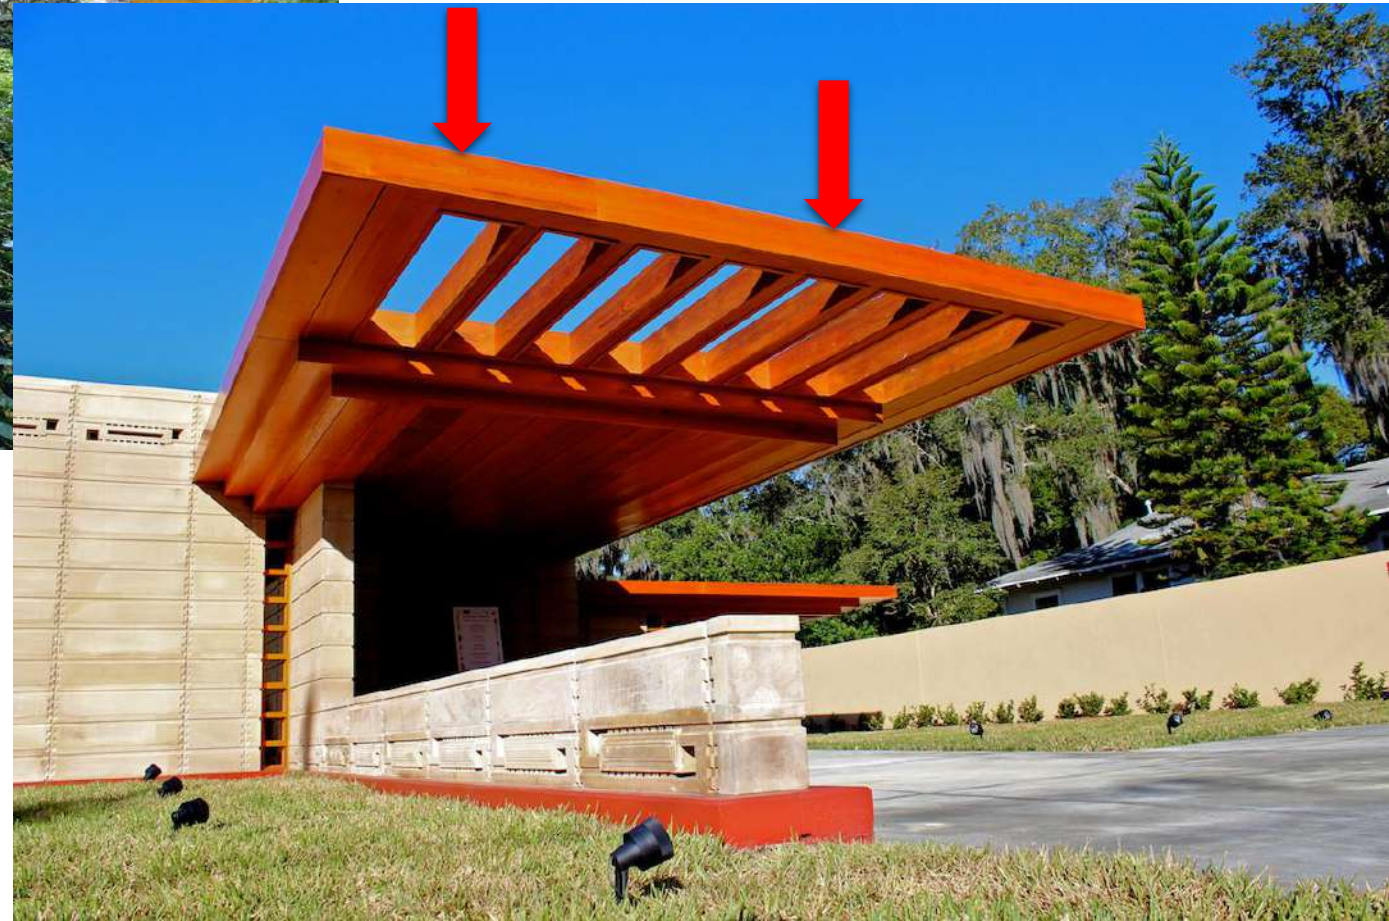

Characteristics

- These are small and single story
- L- shaped to fit around a garden terrace
- Flat roof
- Natural lighting (clerestory window)
- Radiant heating concrete slab floor
- No attic
- No basement
- Very little ornamentation
- Little exposure to the front-rear sides are completely open to the outside
- It is having a strong visual connection between the interior and exterior spaces is an important characteristic of all Usonian homes

CANTILEVER

- Large cantilevered overhangs for passives solar heating and natural cooling.

USONIAN HOUSES

ADVANTAGES

- Natural lighting
- Built using local materials
- Coast effective
- Strong visual connection

DISADVANTAGES

- No basement
- No attic
- Less ornamentation
- Little exposure to the front side

USONIAN HOUSES

MATERIALS

It is made of,

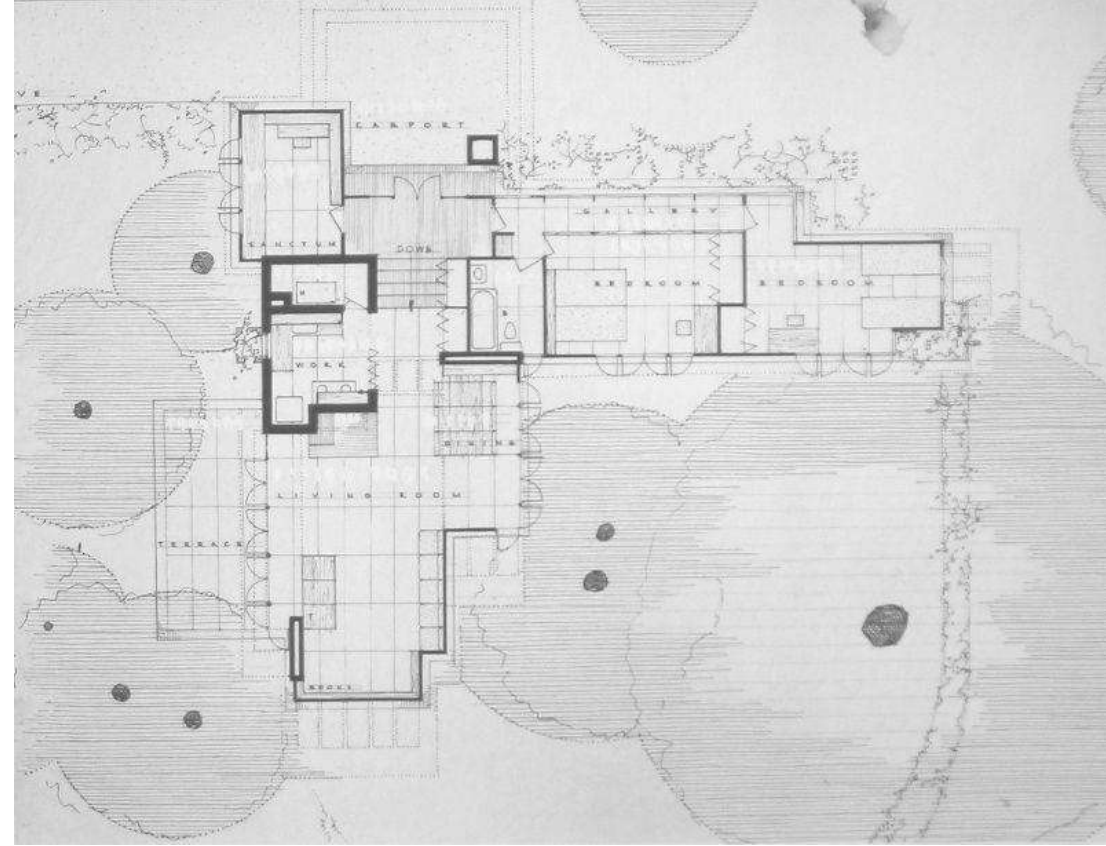

- **Redwood board** (the strongest building materials)
- **San Jose brick**
- **Concrete**
- **Plate glass**

All native and affordable materials that conformed to his scheme of Usonian houses.

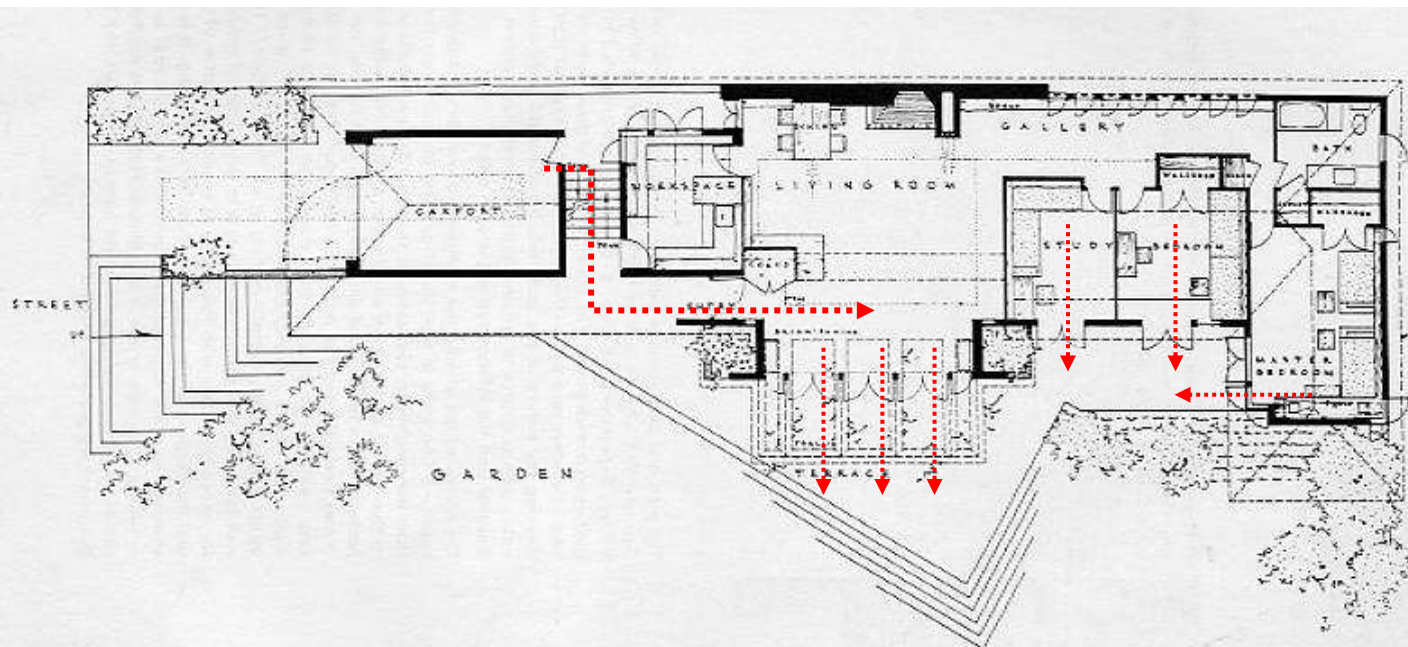

1. Pope Leighey House 1941

- Commissioned in 1939 by journalist Loren Pope and his wife Charlotte Pope, the Pope–Leighey House was one of the first Usonian houses designed by Frank Lloyd Wright. It was completed in 1941, located at 1005 Locust Street, Falls Church, Virginia.
- Wright spoke of naming the cypress-clad home Touchstone since he felt the L-shaped layout was one of the best realizations of his Usonian concept.
- Wright designed this 1,200-square-foot residence for *Washington Post* writer Loren Pope, who had to take a loan out from his paper to afford the property.

2. Malcolm Willey House

- The current design is the **second design** that Wright conceived for the Willeys since the first design proved too costly for the family.
- The Willey House is primarily built of **red brick and cypress**
- The rooms on the main floor are floored with mortared brick
- A major design feature is the 30-60-90 triangle which shapes the terrace, the skylights, and two clerestory windows in the living room.
- The house is arranged so that the living room and dining room form a single space: the kitchen was separated from them by plate glass and a group of shelves.

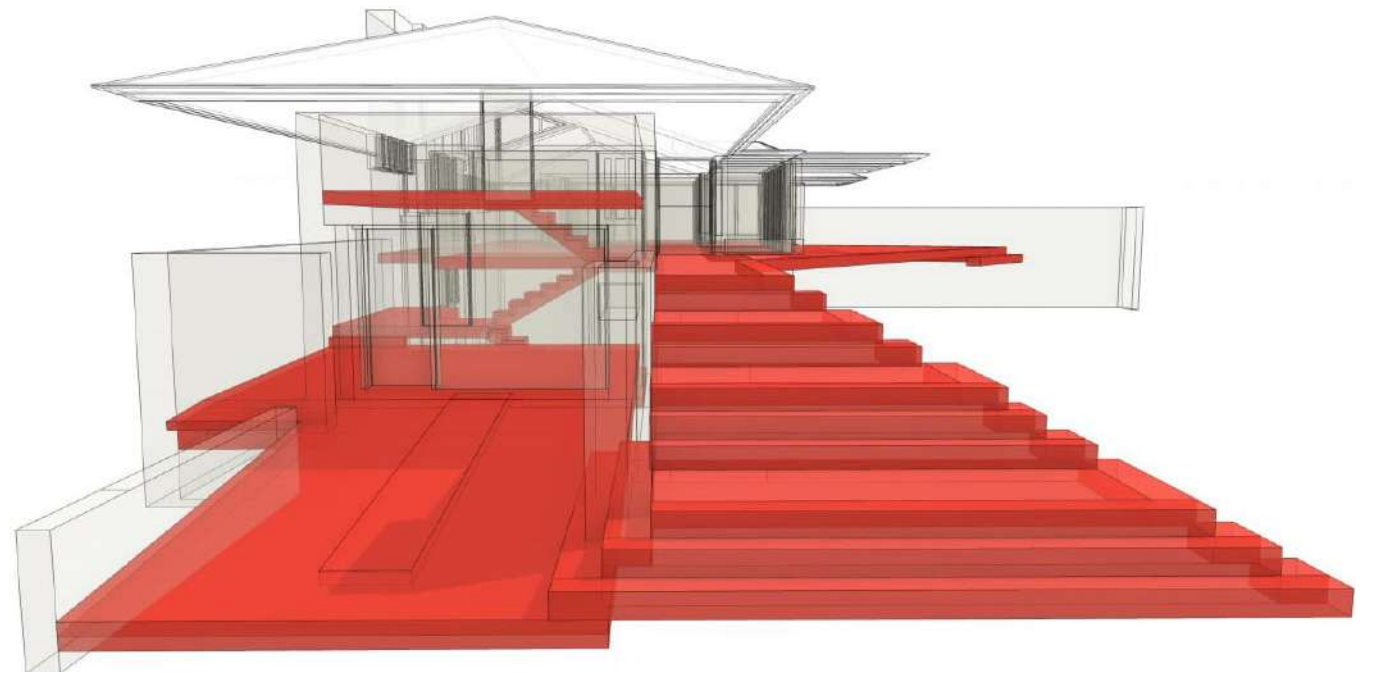

Malcolm Willey House, Minneapolis, Minnesota. Cost in 1934; \$10,000.

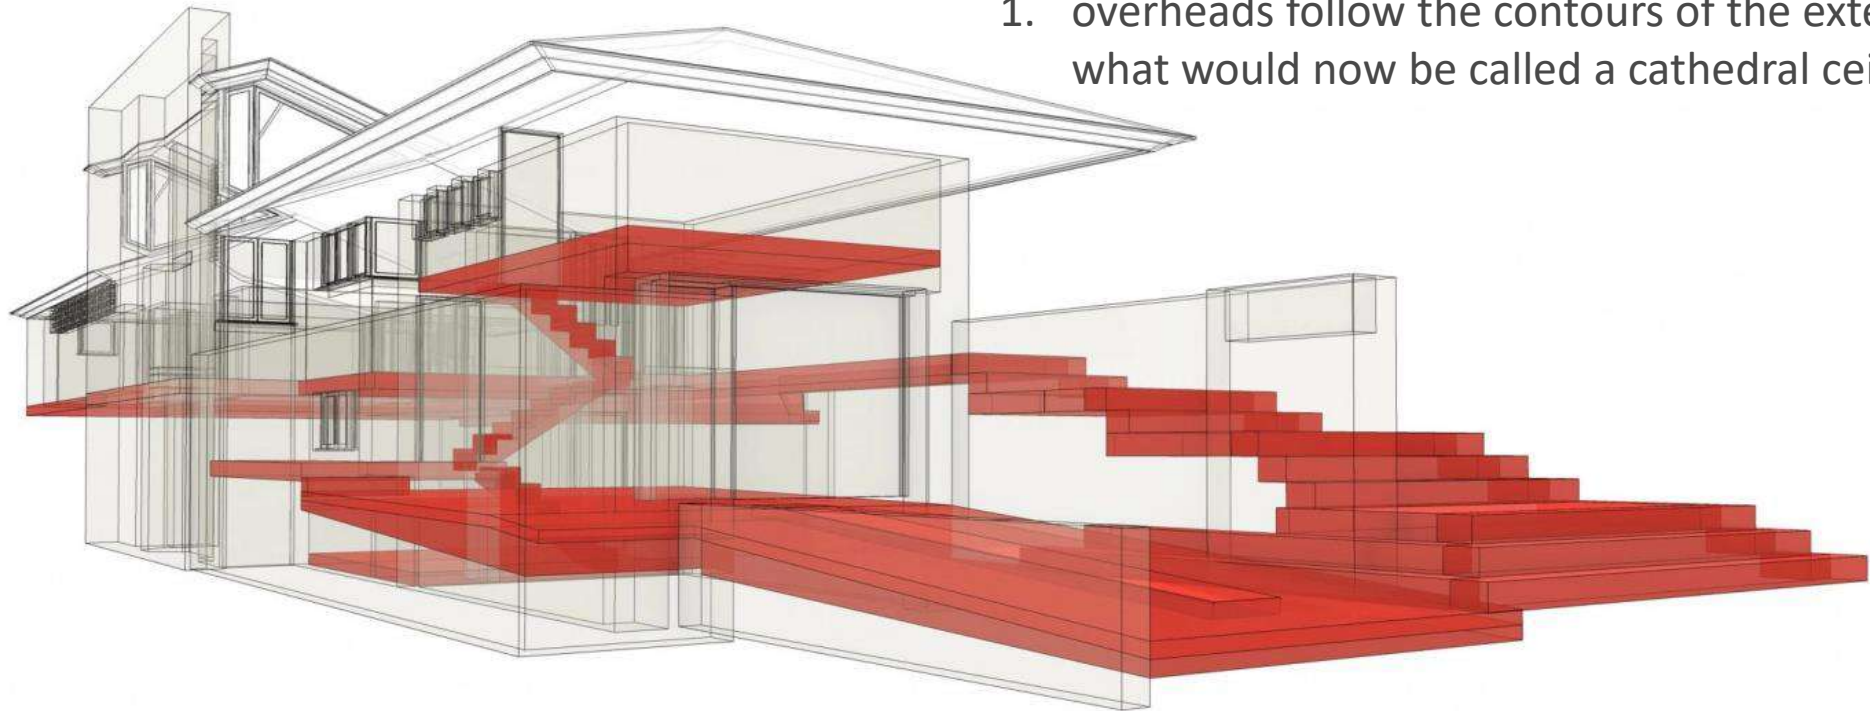

- Nancy was determined to build the house for 8000-10,000 \$
- Wright convinced her to construct the ground floor and 1st floor later.
- He drew the basis of what would be an entirely new kind of dwelling
- There is very little comparison between the 2 ideas, let alone the 2nd being a reduction of the 1st one.
- 2nd plan was a compact design & less costly to build, It was more forward-thinking than the original in that it addressed the needs of Willeys.
- Key that unlocked Wright's understanding of the needs of the next generation was Nancy Willey.

1. Single-level plan inline rooms
2. A garden wall extended from the bed by creating a private garden
3. Northern climate – House was intended for indoor-outdoor living
4. Each room opens to a brick paved terrace via a floor-to-ceiling French door

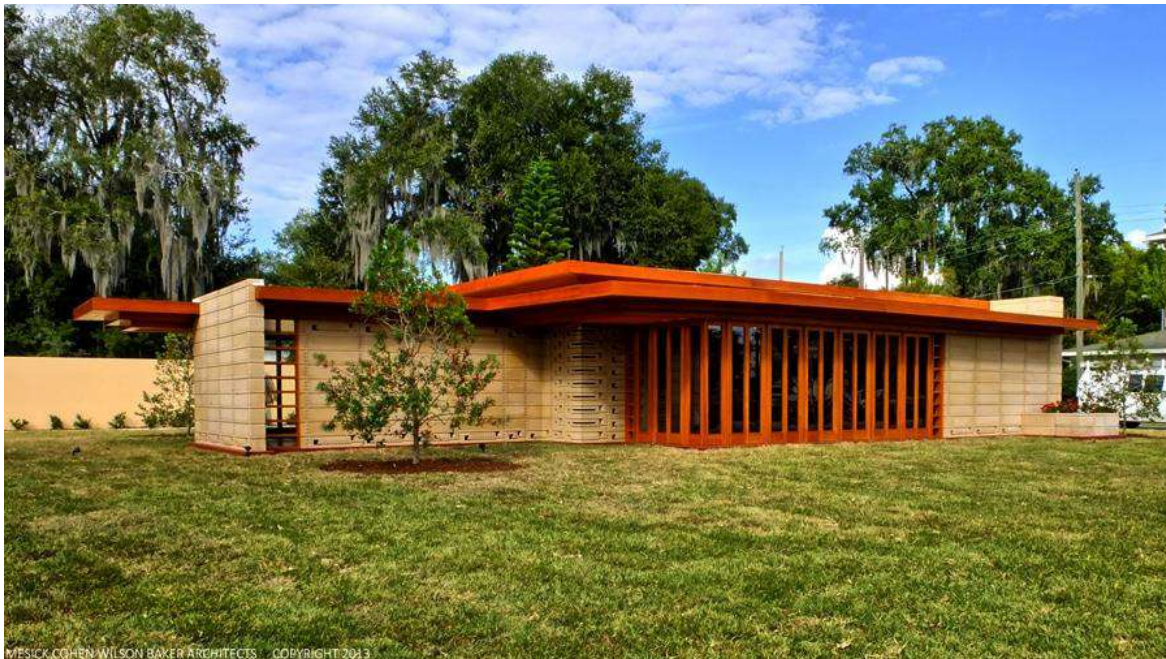

1. overheads follow the contours of the external roofline in what would now be called a cathedral ceiling

3. Sharp Family Tourism And Education Center

(Completed in 2013, designed in 1939) Lakeland, Florida

- After the death of Frank Lloyd Wright, Florida Southern College, home to the largest collection of Frank Lloyd Wright buildings in the world
- They opened **another structure designed Originally called the Usonian house**, it was **envisioned as a professor's home in 1939** but wasn't built until this year using blueprints left by Wright.
- The house is now home to the Sharp Family Tourism and Education Center, which interprets and educates visitors on Wright's legacy on the campus.

The Usonian house holds more than a dozen pieces of furniture designed by Wright.

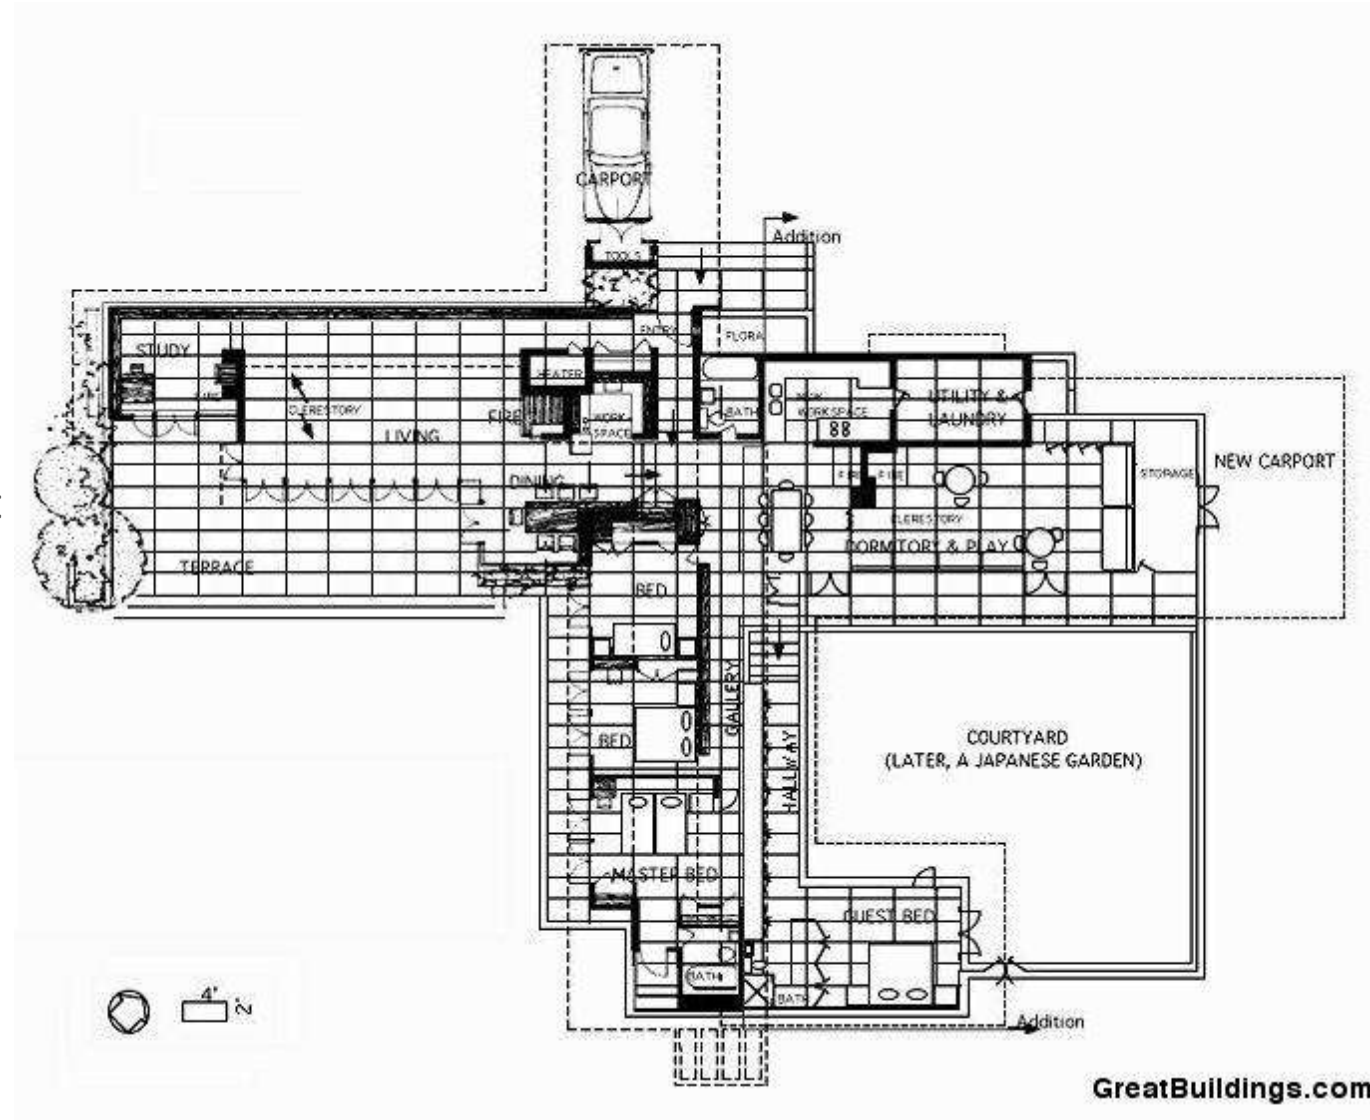

The building is made up of nearly 2,000 interlocking textile blocks that create 47 shapes, with about 5,000 stained-glass inserts as well as built-in furniture.

4. Rosenbaum House (1940)

- Considered one of the **best examples of Wright's Usonian design concept**, one based around affordable organic architecture, this cypress-clad family home for Stanley and Mildred
- which sits on the north bank of the Tennessee River, features a low-slung horizontal design, sleek cantilevered roofs, and so much glass that it "blurs the distinction between indoors and outdoors."
- The extension also designed by Wright, which nearly doubled its size
- Noted example of his Usonian house concept, it is the only Wright building in Alabama, and is one of only 26 pre-World War II Usonian houses.

5. Jacobs I-House

- The design includes **three types of walls, positioned according to material and function: wooden room-dividing storage units, open glass walls and brick walls.**
- The usually L-shaped layout divided the public and private functions into separate wings.
- It also created multiple possible exits to the respective outer space, highlighting the importance of the connectivity of the interior and the exterior.

CRITICAL OVERVIEW:
