CRITICAL OVERVIEW

My time at SANKAR AND ASSOCIATES was incredible. It was a great privilege to work with the team. The days I spent in the firm was really productive. Gained a lot of practical knowledge and experience in the field of management and learning how the works of all the departments are being co ordinated and put together. I had the opportunity to learn new software skills by working in different projects. The whole journey has taught me the perspective of patience and observance in directling the design to satisfy the need of the client and the project.
