CRITICAL OVERVIEW:

I joined as an intern in CSR Consultants and completed 90 working days as a part of academic curriculum. Overall, the experience was great. I worked with guidance of the senior Architect and team members, who helped me to draft floor plans and other set of drawings of proposed designs.

During my internship period I have I learned a lot and got the opportunity to work on various projects including both the residential and commercial works by understanding what are the set of drawings has to be done for a particular project to present to the client and to provide to the construction team.

Main challenge I have faced is to get used to schedule of working on various projects at same time and managing to complete the work assigned to me by drafting multiple options to present to the client , and working on the projects that I doesn't know before is another challenge that made me understand and learn a lot. I tried overcome all these challenges by the guidance of the team members and the architect who thought me why to do and how to do. I have learnt how the things that we learnt before joining as an intern will actually implement practically.
