INTERNSHIP EXPERIENCE

It was an wonderful opportunity having gained an practical experience, **made connections with experienced professionals in field** . Where it helped me to learn how an Architectural firm is involving in the process of an project from start till the end .

Learning of what are the **important requirements that has to be in architectural drawings**, purpose of **Detail drawings**, **way of representing** those drawings, how the **design process** is further updated or done on the factors of having regular client meetings, Site factors, Estimation and its importance etc.

Understanding the **scales of the projects** involving and **how it affects the design**, how the **broad thinking is varying among the experienced senior architects and the heads of the firm** on the design such as in the aesthetic appearance and how the process is going in design based on these factors.

Having worked in an firm which involves **predominantly in big scale projects like factories and institutions**, had an eye opening amazing experience throughout the internship, **knowing about the office culture** how it works. In overall gave me a hope for an good future job career ahead .

THANK YOU
