DECLARATION

I **GURUPRIYA T** hereby declare that this Professional Training Report one month done by me under the guidance of **Ar.S.NANDA GOPAL** is submitted in partial fulfillment of the requirements for the completion of practical training session.

DATE : 20 December 2022

PLACE : Chennai

A handwritten signature in blue ink, appearing to read 'Gurupriya T', is written above the signature line.

SIGNATURE OF CANDIDATE

ACKNOWLEDGEMENT

I am pleased to acknowledge my sincere thanks to Board of Management of **SATHYABAMA INSTITUTE OF SCIENCE & TECHNOLOGY** for their kind encouragement in doing this project and for completing it successfully. I am grateful to them.

I convey my thanks to **Dr. Devyani Gangopadhyay Dean, School of building and Environment** for providing me necessary support and details at the right time during the progressive reviews.

I would like to express my sincere and deep sense of gratitude to **Ar.S.Nanda Gopal** for her valuable guidance, suggestions and constant encouragement paved way for the successful completion of my Training. I wish to express my gratitude to the whole **Nanda Green associate's** team for providing me with the opportunity to work with them.

I would also like to express my sincere thanks to **Ar. Catherine Selvaraj** (Internal Co-ordinator) for her valuable guidance, during the entire Professional Training period.

I wish to express my thanks to all Teaching and Non-teaching staff members of the Department of Architecture who were helpful in many ways for the completion of the project.

ABOUT THE FIRM

OUR APPROACH:

As the name Nanda 'Green' Associates suggests, we are an association who also contribute to the environment apart from fulfilling our client needs. We explore the energy and cost saving methods, which indirectly minimizes the burden on the client and environment. This green and integrated approach makes our client, our team and the surrounding environment a winner.

OUR MOTTO:

LESS ENERGY USED = LESS MONEY SPENT = LESS POLLUTION TO ENVIRONMENT.

ARCHITECT PROFILE

NANDA GREEN ASSOCIATES is an integrated Architecture and Design firm founded by our Principal Architect: Nanda Shanmugam, whose experience in this field spans for 13 years in dealing with both large scale and small scale projects.

EDUCATION:

B.Arch. - RV School of Architecture, (Bangalore)

Masters in Sustainable Building: Performance and Design, (Oxford, UK)

Dip. Stone Technology, (Verona, Italy).

Architect Nanda is well experienced both in India and abroad and has handled a variety of projects in Residential, Commercial and Industrial sectors.

CAMPER VAN TANK DETAILS

There are three types of water tanks within a campervan:

1. Fresh water tanks – essential for storing clean, drinking water.
2. Grey water tanks – collects waste waters from sinks and showers.
3. Black water tanks – store sewage waste from onboard flush toilets.

FRESH WATER TANKS

- Fresh water tanks allow you to store usable water in your camper.
- You'll use water for drinking, showering, washing up and even laundry. There are a few things to consider when choosing suitable fresh water tanks for your lifestyle.

PORTABLE WATER TANKS

Portable water tanks provide a simple, low-cost solution to carrying water in your camper.

- There's no need to park your van near the water source because you can carry the tank to the fill point.
- If your water consumption is low or you don't use your camper full-time, portable tanks are a worthy solution. Jerry cans and collapsible water tanks are ideal for relatively small quantities.
- There are some downsides, though. Hauling full portable tanks around involves some heavy lifting.
- Some portable tanks have integrated wheels to help make it easier, but you may still need to lift the tank in and out of your van.
- Portable tanks tend to be much smaller than fixed tanks, so how much water you can carry onboard is limited. It means you'll need to refill more frequently too.
- We think portable water tanks are the best option for short trips, or if you don't use a lot of water in your van.
- Water takes up a fair amount of space. 100 litres of water needs 0.1 cubic metres of storage, so you'll need to get creative with where to fit the tanks.

BLACK WATER TANKS

- Are usually installed outside of the van.
- Permanent tanks fit underneath, and you'll need to find a suitable size and shape for the available space.
- Dumping black water tanks is, of course, different to emptying the grey water. Only empty them at an authorized dump point.

GREY WATER TANK

- A waste water tank doesn't need to be the same size as a freshwater tank.
