Subject: **Admission to the Master of Science in Space Engineering**

Dear Mr Selvam Manoj,

We are pleased to inform you that, based on a comparative evaluation of the candidates and consideration of the number of positions open to foreign nationals, the Admissions Board has accepted your application for a place as a full-time student on the Master of Science in Space Engineering (MSSE) of the University of Pisa. You are therefore invited to spend a period of study in Pisa, Italy, for the duration of the MSSE programme starting in the academic year 2023-2024.

MSSE is a two year, 2nd level degree program delivered entirely in English and leading to the degree of Master of Science in Aerospace Engineering ("*Laurea magistrale in Ingegneria Aerospaziale, curriculum Space Technology*"). Registration to a degree programme in English, such as MSSE, does **not** require passing the Italian language test.

The first step for your enrollment is to pre-enrol through the "University" website (<https://www.universitaly.it/index.php/students/stranieri>). You'll be requested to submit all the required documents, including this letter, during formal pre-enrollment. Instructions on how to pre-enrol and enrol can be found at:

<https://www.unipi.it/index.php/enrolment/itemlist/category/554-non-eu-citizenship>

Please note that the Admission Committee is in no way responsible for the enrolment procedure. The candidate has to provide all the documents to the University of Pisa on his/her own.

We look forward to welcome you to our University!

Prof. Giovanni Mengali
Dean of Studies, Aerospace Engineering
