SCHOOL OF MECHANICAL ENGINEERING DEPARTMENT OF MECHANICAL ENGINEERING

1.3.3 Value Added Course for Imparting transferable and life skills offered during 2023-2024

Sl. No	Name of the value-added courses (with 30 or more contact hours) offered	Event Dates	Number of students enrolled in the year	Number of Students completing the course in the year	Page No
1	Matlab and Simulink for Mechanical Engineers	26.06.2023 to 14.07.2023	95	94	2
2	Design and modelling using NX CAD/CAM	11.09.2023 to 29.09.2023	94	94	8
3	Hands on training on Dismantling and Assembly of an Automotive Car body, Engine Components, Transmission and Chassis Units	22.01.2024 to 09.02.2024	90	90	13

1. Matlab and Simulink for Mechanical Engineers

The MATLAB and Simulink course tailored for undergraduate Mechanical Engineering students. This comprehensive program is designed to equip you with essential tools and commands to effectively use MATLAB and Simulink software. Throughout the course, you will be exposed to various practical examples and hands-on exercises that will enable you to proficiently model, simulate, and analyze mechanical systems. By delving into computational analysis and simulation applications, this course aims to enhance your skills, elevate your expertise, and expand your knowledge in this field.

COURSE OUTCOMES:

By the conclusion of this course, you will have achieved the following learning objectives:

- Master the fundamentals of MATLAB, enabling you to write efficient code for a wide range of engineering applications.
- Skillfully use Simulink for modeling, simulating, and analyzing dynamic systems, enhancing your ability to visualize complex mechanical processes.
- Acquire proficiency in developing and simulating control systems, providing you with the tools to design and test controllers for mechanical systems.
- Develop the ability to perform numerical analysis and data visualization, facilitating a deeper understanding of engineering problems and solutions.
- Gain insight into optimization techniques, empowering you to improve the performance and efficiency of your designs under various conditions.
- Enhance your problem-solving skills by tackling real-world simulation challenges, fostering creativity and innovation in your engineering solutions.
- Understand the principles of system dynamics and control, enabling you to model and simulate mechanical systems with precision and accuracy.
- Cultivate a strong foundation in computational analysis, enabling you to contribute to the development of cutting-edge innovations in the mechanical engineering industry.

Module	Topics	Name of the Faculty	No of Sessions	Venue
Module 1: Overview of MATLAB Interface and Features	• Introduction to MATLAB environment • Basic operations and arithmetic • MATLAB workspace and command window • Navigating the help documentation • Customizing the MATLAB interface	Dr. L. Jino	2 Hrs	CPDD Lab
Module 2: MATLAB Programming Basics	• Variables and data types • Operators and expressions • Conditional statements (if-else) • Loops (for, while) • Error handling and debugging	Dr. L. Jino	2 Hrs	CPDD Lab

Module 3: Functions and Scripts	• Creating and using scripts • Writing functions • Function input and output • Local and global variables • Anonymous functions	Dr. L. Jino	2 Hrs	CPDD Lab
Module 4: Data Import and Export	• Importing data from various file types (Excel, CSV, text) • Exporting data to files • Working with spreadsheets • Reading and writing data programmatically • Handling large data sets	Dr. L. Jino	2 Hrs	CPDD Lab
Module 5: Data Analysis and Visualization	• Basic plotting functions (plot, scatter, bar) • Customizing plots (labels, legends, titles) • Advanced plotting techniques (subplots, 3D plots) • Data statistics and analysis • Creating interactive visualizations	Dr. L. Jino	2 Hrs	CPDD Lab
Module 6: Numerical Methods and Algorithms	• Solving linear and nonlinear equations • Numerical differentiation and integration • Root finding algorithms • Interpolation and curve fitting • Numerical optimization techniques	Dr. L. Jino	2 Hrs	CPDD Lab
Module 7: Matrix Operations and Linear Algebra	• Basic matrix operations (addition, multiplication) • Eigenvalues and eigenvectors • Singular value decomposition • Solving systems of linear equations • Applications in mechanical engineering	Dr. L. Jino	2 Hrs	CPDD Lab
Module 8: Signal Processing and Analysis	• Signal generation and manipulation • Fourier transforms • Filtering techniques • Time-frequency analysis	Dr. S. Arockia Suthan	2 Hrs	CPDD Lab

	• Applications in vibration analysis			
Module 9: Control Systems Design	• Introduction to control systems • Transfer functions and block diagrams • PID controller design • Stability analysis • Time and frequency domain analysis	Dr. S. Arockia Suthan	2 Hrs	CPDD Lab
Module 10: Introduction to Simulink	• Simulink environment overview • Building simple models • Simulink libraries and blocks • Running and simulating models • Parameter tuning and configuration	Dr. S. Arockia Suthan	2 Hrs	CPDD Lab
Module 11: Dynamic System Modeling	• Modeling mechanical systems • Translational and rotational dynamics • Modeling electrical systems • Hydraulic and pneumatic systems • Multi-domain system modeling	Dr. S. Arockia Suthan	2 Hrs	CPDD Lab
Module 12: Simulation Techniques and Best Practices	• Setting up simulation parameters • Solver selection and configuration • Managing simulation data • Troubleshooting simulation issues • Best practices for efficient simulation	Dr. S. Arockia Suthan	2 Hrs	CPDD Lab
Module 13: Stateflow for Logic-Based Modeling	• Introduction to Stateflow • State machines and flow charts • Designing logic-based systems • Integrating Stateflow with Simulink • Applications in control logic design	Dr. S. Arockia Suthan	2 Hrs	CPDD Lab
Module 14: Code	• MATLAB to C/C++ code generation	Dr. S. Arockia Suthan	2 Hrs	CPDD Lab

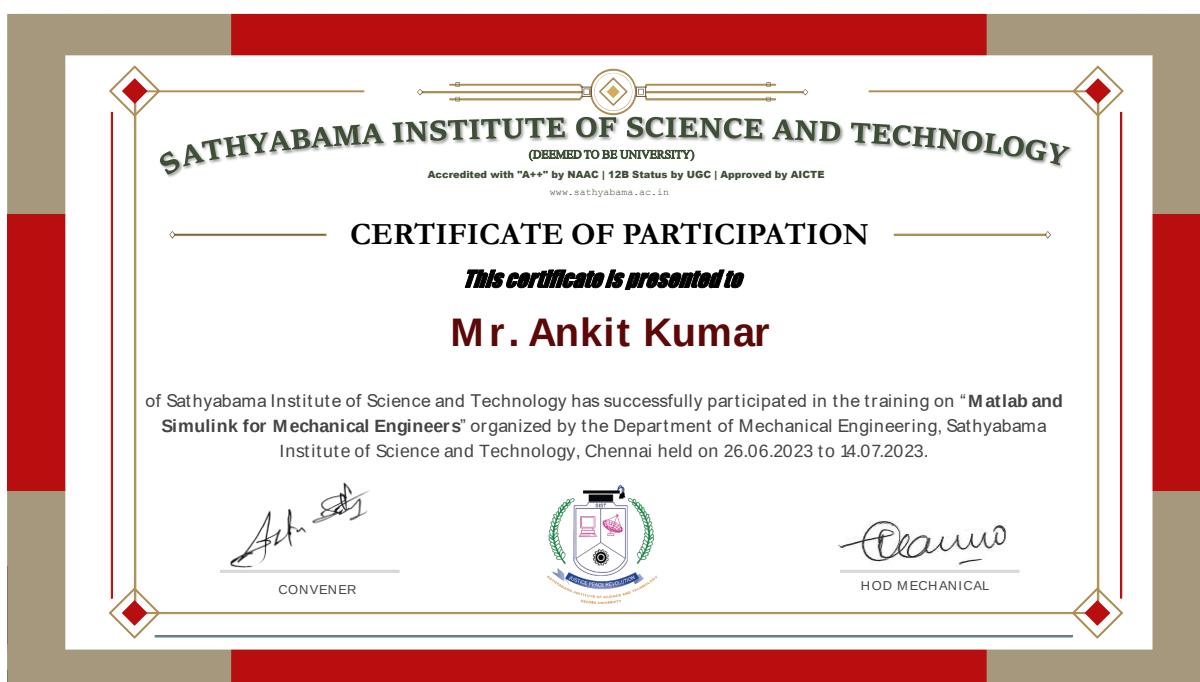

Generation and Deployment	• Simulink code generation • Deploying models to hardware • Real-time simulation and testing • Applications in embedded systems			
Module 15: Case Studies and Project Work	• Real-world case studies in mechanical engineering • Group project planning and execution • Model development and simulation • Presentation of project results • Course review and wrap-up	Dr. S. Arockia Suthan	2 Hrs	CPDD Lab

2. Short Course on Design and modelling using NX CAD/CAM

The NX CAD/CAM course tailored for undergraduate Mechanical Engineering students. This comprehensive program is designed to equip you with essential tools and commands to effectively use NX CAD/CAM software. Throughout the course, you will be exposed to various practical examples and hands-on exercises that will enable you to proficiently model, design, and manufacture mechanical components and assemblies. By delving into computer-aided design and manufacturing applications, this course aims to enhance your skills, elevate your expertise, and expand your knowledge in this field.

Short Course on

Design and modelling using NX CAD/CAM

11th to 29th SEP 2023 || **Venue :: CPDD Lab**
09:00 AM to 11:00 AM

DEPARTMENT OF MECHANICAL ENGINEERING
SCHOOL OF MECHANICAL ENGINEERING

SATHYABAMA
INSTITUTE OF SCIENCE AND TECHNOLOGY
(Deemed to be University)
Accredited with Grade "A++" by NAAC | Approved by AICTE
Jeppiaar Nagar, Rajiv Gandhi Salai, Chennai – 600119, Tamil Nadu, India

CHIEF PATRONS

Dr. Mariazeena Johnson, Chancellor
Dr. Marie Johnson, President
Mr. J. Arul Selvan, Vice President
Ms. Maria Bernadette Tamilarasi, Vice President
Ms. Maria Catherine Jayapriya, Vice President

COURSE COORDINATORS

Dr. J. Jeyaveevahan, Assistant Professor,
Department of Mechanical Engineering,
Mobile: 91769 01505

Dr. R. Siva, Associate Professor,
Department of Mechanical Engineering,
Mobile: 99446 66660

COURSE OUTCOMES:

By the end of this course, you will have achieved the following learning objectives:

- Master the construction of 2D sketches and 3D models using NX CAD, effectively translating your ideas into detailed digital representations.
- Skillfully prepare technical drawings and documentation, ensuring precise and accurate engineering designs for various projects.
- Acquire proficiency in creating complex assemblies, enabling you to conceptualize, visualize, and simulate the interaction of multiple mechanical components.
- Develop the ability to use NX CAM for toolpath generation and CNC programming, facilitating the efficient manufacturing of your designs.
- Gain insight into Finite Element Analysis (FEA) and computational fluid dynamics (CFD) simulations, empowering you to evaluate the structural integrity and performance of your designs under various conditions.
- Enhance your problem-solving skills by tackling real-world design and manufacturing challenges, fostering creativity and innovation in your engineering solutions.
- Understand the principles of parametric and feature-based modeling, enabling you to make design modifications with ease and efficiency.
- Cultivate a strong foundation in product design and manufacturing, enabling you to contribute to the development of cutting-edge innovations in the mechanical engineering industry.

Module	Topics	Name of the Faculty	No of Sessions	Venue
Module 1: Overview of NX CAD Interface and Features	• Introduction to NX CAD environment • Navigating the user interface • Understanding toolbars and command menus • Customizing the workspace • Basic operations and commands	Dr. J. Jeyajeevahan	2 Hrs	CPDD Lab
Module 2: Sketching and 2D	• Creating and editing sketches • Sketch constraints and dimensions	Dr. J. Jeyajeevahan	2 Hrs	CPDD Lab

Geometry Creation	• Using sketch tools (line, arc, circle, rectangle) • Converting sketches to 3D models • Best practices for creating clean sketches			
Module 3: Basic 3D Modeling Techniques	• Creating basic 3D shapes (extrude, revolve) • Boolean operations (union, subtract, intersect) • Feature operations (fillet, chamfer, shell) • Modifying existing models • Introduction to parametric modeling	Dr. J. Jeyajeevahan	2 Hrs	CPDD Lab
Module 4: Advanced 3D Modeling Techniques	• Creating complex shapes (sweeps, lofts) • Surface modeling techniques • Using patterns and arrays • Working with reference geometries • Advanced feature creation	Dr. J. Jeyajeevahan	2 Hrs	CPDD Lab
Module 5: Assembly Modeling	• Creating and managing assemblies • Mating components • Assembly constraints • Checking for interferences and collisions • Exploded views and assembly animations	Dr. J. Jeyajeevahan	2 Hrs	CPDD Lab
Module 6: Drafting and Detailing	• Creating technical drawings • Adding dimensions and annotations • Creating section views and detail views • Title blocks and drawing standards • Printing and exporting drawings • Running Optimization Simulations • Analyzing and Interpreting Optimization Results	Dr. J. Jeyajeevahan	2 Hrs	CPDD Lab
Module 7: Sheet Metal Design	• Introduction to sheet metal design • Creating sheet metal features (flanges, bends, hems) • Unfolding and flattening parts	Dr. J. Jeyajeevahan	2 Hrs	CPDD Lab

	• Sheet metal design rules and best practices • Creating flat patterns for manufacturing			
Module 8: Weldments and Frame Design	• Introduction to weldment design • Creating and managing weldment structures • Adding weld beads and annotations • Structural frame design • Analyzing weldment assemblies	Dr. J. Jeyajeevahan	2 Hrs	CPDD Lab
Module 9: Plastic and Mold Design	• Designing plastic parts • Creating mold features (drafts, parting lines, ribs) • Mold flow analysis • Mold assembly design • Best practices for plastic part design	Dr. J. Jeyajeevahan	2 Hrs	CPDD Lab
Module 10: Design Validation and Optimization	• Introduction to Finite Element Analysis (FEA) • Setting up and running simulations • Analyzing stress, strain, and displacement • Optimizing designs for performance • Understanding and interpreting simulation results	Dr. J. Jeyajeevahan	2 Hrs	CPDD Lab
Module 11: Overview of NX CAM Interface and Features	• Introduction to NX CAM environment • Navigating the CAM interface • Understanding CAM toolbars and command menus • Setting up CAM projects • Importing CAD models for CAM	Dr. R. Siva	2 Hrs	CPDD Lab
Module 12: Toolpath Generation and Optimization	• Introduction to toolpath generation • Creating and managing tool libraries • 2.5D and 3D milling operations • Toolpath verification and optimization • Best practices for efficient toolpath generation	Dr. R. Siva	2 Hrs	CPDD Lab

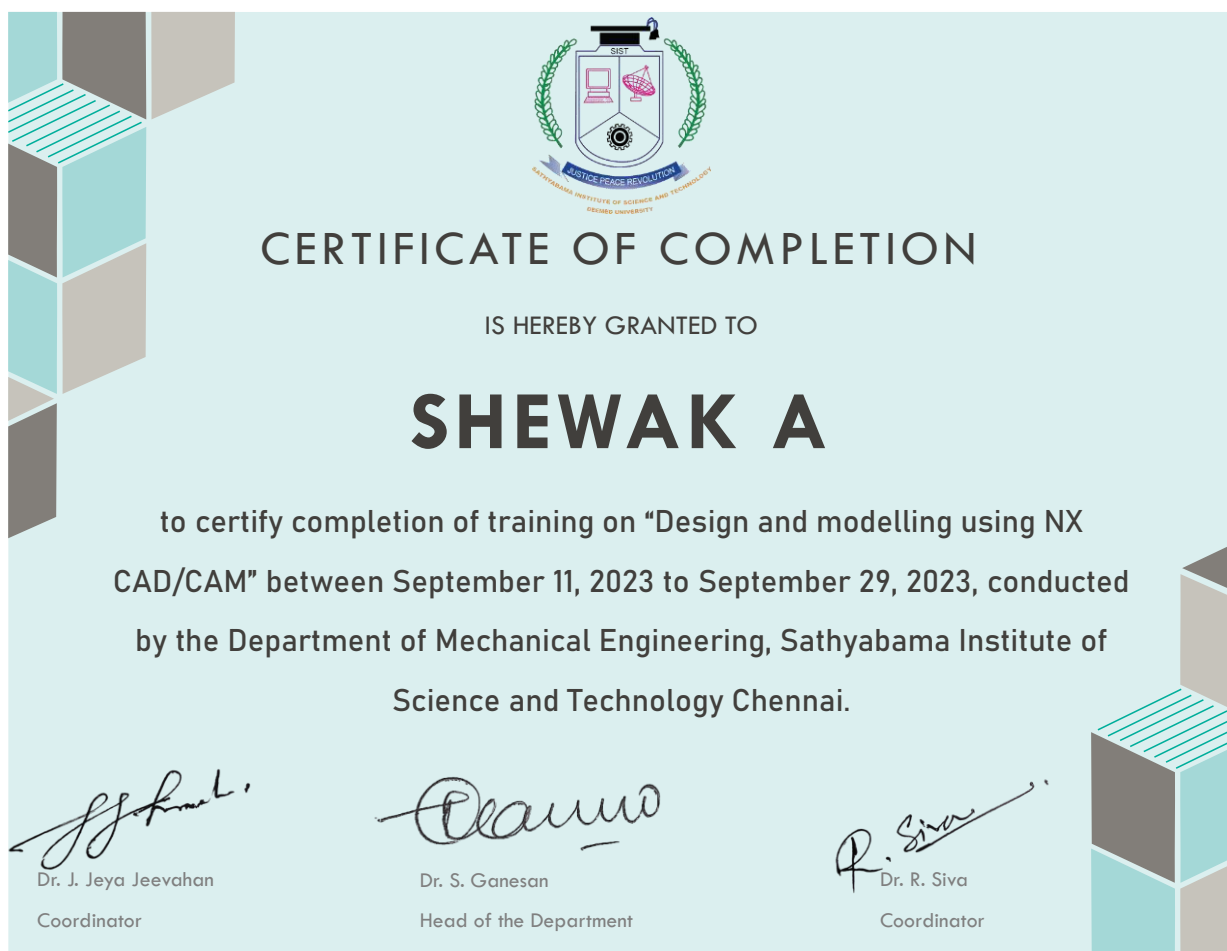

Module 13: CNC Programming and Simulation	• Introduction to CNC programming • Creating G-code and M-code • Simulating CNC operations • Troubleshooting and optimizing CNC programs • Exporting and transferring CNC programs to machines	Dr. R. Siva	2 Hrs	CPDD Lab
Module 14: Advanced CAM Techniques	• Multi-axis machining • High-speed machining • Adaptive and trochoidal milling • Advanced drilling and tapping operations • Customizing post-processors	Dr. R. Siva	2 Hrs	CPDD Lab
Module 15: Case Studies and Project Work	• Real-world case studies in mechanical design and manufacturing • Group project planning and execution • Model development and manufacturing simulation • Presentation of project results • Course review and wrap-up	Dr. R. Siva	2 Hrs	CPDD Lab

3. Hands on training on Dismantling and Assembly of an Automotive Car body, Engine Components, Transmission and Chassis Units

The Hands-on Training on Dismantling and Assembly of Automotive Car Body, Engine Components, Transmission, and Chassis Units course tailored for undergraduate Mechanical Engineering students. This comprehensive program is designed to equip you with essential skills and knowledge to effectively dismantle and assemble various automotive components. Throughout the course, you will be exposed to practical examples and hands-on exercises that will enable you to proficiently handle and understand the intricacies of car bodies, engines, transmission systems, and chassis units. By delving into real-world automotive applications, this course aims to enhance your skills, elevate your expertise, and expand your knowledge in this field.

SCHOOL OF MECHANICAL ENGINEERING

DEPARTMENT OF MECHANICAL ENGINEERING
Organizes
Hands on training on Dismantling and Assembly of an Automotive Car body, Engine Components, Transmission and Chassis Units
Date : 22nd January - 09th February 2024

COURSE OUTCOMES:

By the culmination of this course, you will achieve the following learning outcomes:

- Master the techniques for safely and efficiently dismantling and assembling automotive car bodies, ensuring a thorough understanding of structural components and assembly processes.

- Skillfully handle engine components, gaining proficiency in the disassembly, inspection, and reassembly of various engine parts.
- Acquire proficiency in working with transmission systems, enabling you to dismantle, inspect, and reassemble manual and automatic transmissions.
- Develop the ability to dismantle and assemble chassis units, facilitating a comprehensive understanding of the suspension, steering, and braking systems.
- Gain insight into the practical aspects of automotive repair and maintenance, empowering you to diagnose and address common issues encountered in automotive systems.
- Enhance your problem-solving skills by tackling real-world automotive challenges, fostering creativity and innovation in your engineering solutions.
- Understand the principles of automotive assembly and disassembly, enabling you to work efficiently and effectively in automotive repair and manufacturing settings.
- Cultivate a strong foundation in automotive engineering, enabling you to contribute to the development and maintenance of cutting-edge automotive technologies.

Module	Topics	Name of the Faculty	No of Sessions	Venue
Module 1: Overview of Automotive Systems and Safety Procedures	• Introduction to automotive systems • Workshop safety guidelines and procedures • Personal protective equipment (PPE) • Tool identification and proper use • Overview of the course structure and objectives	Dr. M. Purusothaman	2 Hrs	Automobile Chassis and Engine Component Lab
Module 2: Understanding Automotive Car Body Structure	• Car body components and materials • Types of car bodies (sedan, hatchback, SUV, etc.) • Basic structural analysis	Dr. M. Purusothaman	2 Hrs	Automobile Chassis and Engine Component Lab

	• Introduction to car body dismantling techniques • Safety considerations for working with car bodies			
Module 3: Dismantling and Assembly of Car Body Components	• Removing and reinstalling exterior panels (doors, fenders, hoods) • Understanding and working with interior components (dashboards, seats) • Handling and storage of removed components • Assembly techniques and alignment • Identifying and addressing common issues during reassembly	Dr. M. Purusothaman	2 Hrs	Automobile Chassis and Engine Component Lab
Module 4: Automotive Fasteners and Fixing Techniques	• Types of fasteners used in automotive applications • Techniques for removing and installing fasteners • Understanding torque specifications • Using specialized tools for fasteners • Best practices for fastening and securing components	Dr. M. Purusothaman	2 Hrs	Automobile Chassis and Engine Component Lab
Module 5: Introduction to Automotive Electrical Systems	• Basic automotive electrical concepts • Understanding wiring diagrams and schematics • Common electrical components (batteries, alternators, starters) • Safely working with automotive electrical systems	Dr. M. Purusothaman	2 Hrs	Automobile Chassis and Engine Component Lab

	• Basic troubleshooting techniques for electrical issues			
Module 6: Overview of Internal Combustion Engines	• Engine types and configurations • Basic engine operation and components • Understanding engine cycles (four-stroke, two-stroke) • Engine performance parameters • Introduction to engine dismantling	Dr. M. Purusothaman	2 Hrs	Automobile Chassis and Engine Component Lab
Module 7: Dismantling and Assembly of Engine Components	• Disassembling engine blocks • Removing and inspecting pistons, crankshafts, and camshafts • Handling cylinder heads and valve components • Cleaning and preparing components for reassembly • Reassembling engine components with proper torque and alignment	Dr. Ashwin Jacob	2 Hrs	Automobile Chassis and Engine Component Lab
Module 8: Fuel and Exhaust Systems	• Overview of fuel injection systems • Understanding carburetors and fuel pumps • Dismantling and assembling fuel system components • Exhaust system components and their functions • Handling and installing exhaust manifolds and catalytic converters	Dr. Ashwin Jacob	2 Hrs	Automobile Chassis and Engine Component Lab
Module 9: Cooling and Lubrication Systems	• Basics of engine cooling systems	Dr. Ashwin Jacob	2 Hrs	Automobile Chassis and Engine

	• Dismantling and assembling radiators and cooling hoses • Understanding lubrication systems and oil flow • Removing and installing oil pumps and filters • Troubleshooting common cooling and lubrication issues			Component Lab
Module 10: Engine Diagnostics and Testing	• Introduction to engine diagnostics • Using diagnostic tools and equipment • Performing compression tests and leak-down tests • Analyzing engine performance data • Identifying and addressing common engine problems	Dr. Ashwin Jacob	2 Hrs	Automobile Chassis and Engine Component Lab
Module 11: Introduction to Automotive Transmissions	• Types of transmissions (manual, automatic, CVT) • Basic transmission operation and components • Overview of clutch systems • Introduction to transmission dismantling • Safety considerations for working with transmissions	Dr. Ashwin Jacob	2 Hrs	Automobile Chassis and Engine Component Lab
Module 12: Dismantling and Assembly of Manual Transmissions	• Disassembling manual transmission units • Inspecting gears, shafts, and synchronizers • Handling and installing bearings and seals • Reassembling manual transmission components	Dr. Ashwin Jacob	2 Hrs	Automobile Chassis and Engine Component Lab

	• Testing and adjusting manual transmissions			
Module 13: Dismantling and Assembly of Automatic Transmissions	• Disassembling automatic transmission units • Understanding hydraulic systems and valve bodies • Inspecting and replacing clutches and bands • Reassembling automatic transmission components • Testing and troubleshooting automatic transmissions	Dr. Ashwin Jacob	2 Hrs	Automobile Chassis and Engine Component Lab
Module 14: Differential and Drivetrain Components	• Basics of differential operation • Dismantling and assembling differential units • Understanding driveshafts and CV joints • Inspecting and replacing drivetrain components • Diagnosing common drivetrain issues	Dr. Ashwin Jacob	2 Hrs	Automobile Chassis and Engine Component Lab
Module 15: Chassis and Suspension Systems	• Overview of chassis components and layout • Dismantling and assembling suspension systems (shock absorbers, struts) • Understanding steering systems and alignment • Inspecting and replacing braking system components (discs, drums, pads) • Comprehensive chassis diagnostics and troubleshooting	Dr. Ashwin Jacob	2 Hrs	Automobile Chassis and Engine Component Lab

Participants list:

SL. NO	REG NO	NAME
1	40150013	HARRISON KEVIN RAJ A
2	40150015	JESU GREATSON FERNANDO. X
3	40150017	JOHN SEBRAN. Y
4	40150019	JOYSON. J
5	40150020	K. SREE SAI SATVIK
6	40150024	MARADANA MOHITH KUMAR
7	40150025	MARIA DICKSON. J
8	40150028	MULINTY THARUN
9	40150029	NAGARAJU SUBBA RAJU
10	40150037	RESHLIN RITHAN RAJ. M
11	40150038	RONAN STEVE HAWES
12	40150039	ROSARIO. R
13	40150040	ROSHAN JEROLD. J
14	40150041	S. K. SAKIL MOHAMMAD
15	40150042	SAM JEFRIN. C
16	40150043	SARATHI. R
17	40150046	TAMALAPAKULA VIDYASAGAR
18	40150047	VELISALA KARTHIK
19	40150048	VISHNUPRASAD. G. E
20	40150701	NAVEEN RAJ .P
21	40150702	JOEL BERGLIN J
22	40150703	DEEPAK H
23	40150704	PRAVEEN KUMAR G S
24	40150705	AKASH PANDIAN C E
25	40150706	JOHANNES RICHY J
26	40150707	DEEPAK KUMAR B
27	40150709	SUDHARSANAN V S
28	40150710	KAMESH.V
29	40150714	RAGHUL .S
30	40150716	EZHILAN U
31	40150718	RAHOON S
32	40150719	VINU MON W
33	40150720	GUGAN S
34	42150019	IPSITA
35	42150037	RAMAYE L
36	42150038	REVATHI K
37	42150054	SIRIPURAPU SURESH BC
38	42150061	VENDAMANI G
39	42150069	PRASAD K L V
40	42150074	SRI GYNANESH K
41	42150075	TAMILMANI M
42	42150076	VISHWA K
43	42150077	RAJESH D
44	42150079	HEMANTH KUMAR D
45	42150080	ROHAN K
46	42150081	EZHIL POKESH
47	42150082	BIRSETHA J
48	42150083	CATHARINE J S
49	42150084	ASWIN M P
50	42150701	AAKASH K

51	42150702	AH SOHITH NADAN
52	42150704	ALAN SAMUEL JOHNSON A
53	42150705	ARUN K
54	42150706	BALAJI V
55	42150707	DHANUSH KUMAR. B
56	42150708	DILLIBABU S
57	42150709	DINESH KUMAR S
58	42150710	JADDU SAI PAVAN KUMAR
59	42150711	J JENSON
60	42150712	JOSH MARK. J
61	42150713	KARTHICK R
62	42150714	KISHOREKUMAR I
63	42150715	KRISHNA KUMAR S
64	42150716	MANDAPTI RISHI KESH RAJU
65	42150717	REHANUDEEN KHAN
66	42150718	SANJAI. S
67	42150719	SRINEVAASAN P
68	42150720	G.S. VIGNESH
69	42150721	VIGNESHWARAN S
70	42150722	VISHNU KUMAR D Y
71	42150723	VIVEK SINGH
72	42150724	YOGENDRAN B
73	42150725	MOHAN KRISHNAN R
74	42150726	NIYAZ AHMED S
75	42150727	PENDLIMARRI ASHOK KUMAR
76	42150728	PONUGOTI SRIKAR REDDY
77	42150729	SHAIK FAYAZ
78	42150730	venu ARAVINDH. C
79	42150731	KANNAN R
80	42150732	MOHAMED SHAFFIQ A
81	42150733	SOLLETI VENKATA CHARAN KUMAR
82	42150734	RAGURAM A
83	42150736	GOKUL S
84	42150737	SANJAY PRIYAN K
85	42150738	BADRISH
86	42150739	SIDDARDHARAJ P
87	42150734	RAGURAM A
88	40150014	JASON VALENTINE DOSS
89	40150036	RAVADA PRAVEEN KUMAR
90	40150713	BONTHU KESHAVA KALYAN

SATHYABAMA
INSTITUTE OF SCIENCE AND TECHNOLOGY
(DEEMED TO BE UNIVERSITY)
CATEGORY - 1 UNIVERSITY BY UGC

PARTICIPATION CERTIFICATE

Presented to

Harrison Kevin Raj A

for attending the Hands on training on Dismantling and Assembly of an Automotive Car body,
Engine Components, Transmission and Chassis Units, organized by the Department of
Mechanical Engineering, Sathyabama Institute of Science and Technology, Chennai held on
22.01.2024 to 09.02.2024.

Dr. Ashwin Jacob
Coordinator

Dr. S. Ganesan
Head of the Department

Dr. M. Purusothaman
Coordinator
