Basic Life Support

The circulation and ventilation until action can be taken to reverse the underlying cause of the cardio and respiratory arrest. Failure of circulation for 3-4 minutes (less if the patient is hypoxemic initially) will lead to irreversible

Resuscitation) also enhances the circulation to the brain so CPR is better termed CPR (Cardio Pulmonary Cerebral Resuscitation). Any delay in starting BLS will reduce the chances of a successful outcome. The chances of survival are much greater in Early recognition of sudden cardiac arrest, Early CPR, Early Defibrillation, Early Advance care and Post Resuscitation Care.

History

Closed chest cardiac massage was described in 1878 by Boehm and applied successfully in a few cases of cardiac arrest over the next 10 years. In the late 1950s Peter Safar published his work on the efficacy of mouth-to-mouth ventilation, followed in 1960 by the classic paper by Kouwenhoven, Jude, and Knickerbocker describing closed chest cardiac massage. Modern cardiopulmonary resuscitation was therefore established in 1960 and the following year, Safar described his success in teaching CPR to the public.

ACADEMY FOR CLINICAL TRAINING

This certificate that

R.Raveena

has successfully completed the training in

SIX DAYS VALUE ADDED COURSE

ORAL CANCER SCREENING AND PREVENTION

Date: 5th to 10th February 2018

Venue: Sathyabama Dental College & Hospital

Oral cancer is one of the most prevalent diseases and a leading health problem in mankind. Prevention of oral cancer and diagnosis in early stage is important in reducing the burden of this disease.

A dentist plays a vital role in early identification of oral cancer especially in pre malignant staging. He also plays an important role in educating his patients on tobacco cessation which is identified as major risk factor in oral cancer. This course will facilitate the budding dentist to acquire intense knowledge on oral cancer screening and prevention.

Program List

DATE	TIME	TOPIC	STAFF
05/02/2018	9:00AM -10:30AM	ORIENTATION AND PRE EVALATION ASSESSMENT	DR. C. PRAVDA PROF AND HEAD
		10:30AM- 10:45AM –TEA BREAK	
	10:45AM-12:15PM	EPIDEMIOLOGY OF ORAL CANCER	DR. SAAKSHI GULATI SENIOR LECTURER
		1:00PM – 2:00PM- LUNCH	
	2:00PM-3:00 PM	ROLE OF DENTIST IN PREVENTION OF ORAL CANCER	DR. PRAVEENA SENIOR LECTURER

DATE	TIME	TOPIC	STAFF
06/02/2018	9:00AM -10:30AM	RISK FACTORS OF OPMD'S/ ORAL CANCER	DR. SAAKSHI GULATI SENIOR LECTURER
		10:30AM- 10:45AM –TEA BREAK	
	10:45AM-12:15PM	CLINICAL APPEARANCE OF OPMD'S	DR. C. PRAVDA PROF AND HEAD
		1:00PM – 2:00PM- LUNCH	
	2:00PM-3:00 PM	CLINICAL APPEARANCE AND STAGING OF ORAL CANCER	DR. PRAVEENA SENIOR LECTURER

DATE	TIME	TOPIC	STAFF
07/02/2018	9:00AM -10:30AM	CHAIRSIDE SCREENING	DR. C. PRAVDA PROF AND HEAD
		10:30AM- 10:45AM –TEA BREAK	
	10:45AM-12:15PM	ROLE OF IMAGING IN ORAL CANCER	DR. SAAKSHI GULATI SENIOR LECTURER
		1:00PM – 2:00PM- LUNCH	
	2:00PM-3:00PM	ADVANCED DIAGNOSTIC AIDS	DR. PRAVEENA SENIOR LECTURER

DATE	TIME	TOPIC	STAFF
08/02/2018	9:00AM -10:30AM	NICOTINE ADDICTION	DR.ABIRAMI LECTURER
		10:30AM- 10:45AM –TEA BREAK	
	10:45AM-12:15PM	BEHAVIOIRAL INTERVENTION	DR. SAAKSHI GULATI SENIOR LECTURER
		1:00PM – 2:00PM- LUNCH	
	2:00PM-3:00PM	PHARMACOLOGICAL MANAGEMENT	DR. PRAVEENA SENIOR LECTURER

DATE	TIME	TOPIC	STAFF
09/02/2018	9:00AM -10:30AM	MANAGEMENT OF OPMD'S	DR. SAAKSHI GULATI SENIOR LECTURER
		10:30AM- 10:45AM –TEA BREAK	
	10:45AM-12:15PM	OVERVIEW OF MANAGEMENT OF ORAL CANCER	DR. PRAVDA PROF AND HEAD
		1:00PM – 2:00PM- LUNCH	
	2:00PM-3:00PM	CASE DISCUSSION	DR. PRAVEENA SENIOR LECTURER

DATE	TIME	TOPIC	STAFF
10/02/2018	9:00AM -10:30AM	OVERVIEW OF NATIONAL ORAL SCREENING PROGRAMMES	DR.PRIYANKA LECTURER
		10:30AM- 10:45AM –TEA BREAK	
	10:45AM-12:15PM	CASE DISCUSSION	DR. PRAVDA PROF AND HEAD
		1:00PM – 2:00PM- LUNCH	
	2:00PM-3:00 PM	POST EVALATION ASSESSMENT	DR. ABIRAMI LECTURER & DR.PRIYANKA LECTURER

1. Eligibility - CRRIs
2. Registration free
3. Last date to enroll: 31st jan 2018
4. Attendance on all days is compulsory
5. A Certificates will be provided on successful completion of the course

SYLLABUS: ORAL CANCER SCREENING AND PREVENTION PROGRAMME

ORAL CANCER : BACKGROUND

Oral cancer, one of the top 10 leading causes of death worldwide, has eluded state-of-the-art preventative and diagnostic procedures, despite the widely its known risk factors, signs, and symptoms, giving rise to an staggering incidence of 1 - 10 adults per 100000 men and women.

The first and foremost measure to be taken in assessing those prone to such malignancies, and cases of pre-cancerous lesions, is to conduct a thorough oral cancer examination following the reporting of a medical history. The former is particularly important on an annual basis for those above the age of 40 with an underlying propensity, according to American cancer society. There has been no official statistical data released regarding the essential frequency of these periodic examinations.

EPIDEMIOLOGY OF ORAL CANCER

The major causes of oral cancer worldwide remain tobacco in its many different forms, heavy consumption of alcohol, and, increasingly, infection with certain types of HPV. Although the relative contribution of risk factors varies from population to population, oral cancer is predominantly a disease of poor people. Prevention of this devastating disease can come from fundamental changes in socioeconomic status, as well as from actions to reduce the demand, production, marketing, and use of tobacco products and alcohol. A healthy diet, good oral and sexual hygiene, and awareness of the signs and symptoms of disease are important. Success depends on political will, intersectoral action, and culturally sensitive public health messages disseminated through educational campaigns and mass media initiatives.

Although an affordable, acceptable, easy to use, accurate, and effective screening test for oral cancer is available in high-risk countries, a decision to introduce population-based screening should take into account the level of health service development and available resources to meet the increased treatment demand that screening generates. The target

population for oral cancer screening consists of those age 30 years and older who use tobacco and/or alcohol

ROLE OF DENTISTS IN ORAL CANCER SCREENING

Given the expertise, knowledge, and experience of dentists in their frequent encounters with head and neck lesions, they have a particular advantage in the early detection, diagnosis, and prevention of oral cancers. Dentists are also expected to play a pivotal role in convincing those with a propensity to cancer to avoid known risk factors. The importance of dentist's role in oral cancer prevention is by enhancing the patient education about risk factor, performing oral examination that leads to early intervention if a suspected lesion is detected. Patients expect that all dentists to perform extensive oral mucosal examination through the routine dental examination. Most of the dentists focus their examination on teeth and the procedure-related site rather than high-risk sites such as the floor of the mouth. As dental surgeons are the ones who routinely perform oral cavity examination, there is a need to educate them not to restrict themselves by observing only the chief complaint but also examine the oral cavity as a whole. They should be made aware about the complaints and appearance of precancerous conditions and oral cancer and also how to examine them. By doing so, cancer-related morbidity and mortality can be reduced.

ORAL CANCER RISK FACTORS

Tobacco use, in any form, and excessive alcohol use are the major risk factors for oral cancer. With dietary deficiencies, these factors cause more than 90 percent of oral cancers. Preventing tobacco and alcohol use and increasing the consumption of fruits and vegetables can potentially prevent the vast majority of oral cancers (. When primary prevention fails, early detection through screening and relatively inexpensive treatment can avert most deaths. However, oral cancer continues to be a major cancer in India, East Asia, Eastern Europe, and parts of South America. where organized prevention and early detection efforts are lacking. In this course detailed discussions will be on epidemiology, prevention, early detection, and treatment of oral cancers, as well as the cost-effectiveness of interventions.

.

ORAL CANCER SCREENING

It is well established that virtually all oral cancers are preceded by visible changes in the oral mucosa, therefore a comprehensive oral cancer examination and risk habits assessment are among the measures that lead to the prevention and early detection of oral cancers. Having appropriate knowledge of the cancer's risk factors, and the ability to recognize oral cancer, is a prerequisite for dentists' providing appropriate information and oral examinations.

Visual screening of the oral cavity has been widely evaluated for its feasibility, safety, acceptability, accuracy to detect oral precancerous lesions and cancer, and efficacy and cost-effectiveness in reducing oral cancer mortality. Visual screening involves systematic visual and physical examination of the intraoral mucosa under bright light for signs of oral potentially malignant disorders (OPMDs), as well as early oral cancer, followed by careful inspection and digital palpation of the neck for any enlarged lymph nodes. It is a provider-dependent, subjective test; accordingly, its performance in detecting lesions varies among providers. Comprehensive knowledge of the oral anatomy, the natural history of oral carcinogenesis, and the clinico-pathological features of the OPMDs and preclinical cancers are important prerequisites for efficient providers of oral visual screening.

The potential harms of oral visual screening may include additional diagnostic investigations, such as incisional or excisional biopsy; anxiety associated with false-positive screening tests; detection and treatment of biologically insignificant conditions that may have no impact on oral cancer incidence; and false reassurance from false-negative tests.

EARLY CLINICAL DIAGNOSIS AND STAGING

Primary care dental and general practitioners should play a major role in referring patients to cancer treatment facilities for early diagnosis and treatment. Improving the skills of these primary care doctors is essential to improving prospects for early diagnosis, particularly among patients who use tobacco or alcohol in any form. Routine biopsy in those clinically presenting with features of precancerous lesions may lead to early diagnosis of underlying invasive oral cancer. In addition to history, physical examination, and biopsy, a simultaneous assessment of the upper aerodigestive tract is necessary because patients with oral cancer have a high risk of cancers developing in other head and neck sites and in the lungs

ORAL CANCER MANAGEMENT

Oral cancer is predominantly a loco-regional disease that tends to infiltrate adjacent bone and soft tissues and spreads to the regional lymph nodes in the neck. Distant metastasis is uncommon at the time of diagnosis. A thorough inspection and palpation of the oral cavity and examination of the neck is mandatory. CT and MRI imaging are widely used to assess the extent of involvement of adjacent structures, such as bones and soft tissues. Surgery and radiotherapy are the main treatment modalities. Given the skills, expertise, and infrastructure required for staging and treatment with

minimal physical, functional, and cosmetic morbidity, oral cancer treatment is usually provided in specialized cancer hospitals, such as comprehensive cancer centers, or in hospitals at the highest level of health services, third-level centers.

TOBACCO CESSATION

The most important aspect to smoking cessation is maintaining the motivation to make multiple attempts. Thus, quit attempts should be thought of like practice sessions in learning a new skill—at some point one hopes to “get it right,” but one should not put undue hope on any single given quit attempt, and take solace in knowing the probability of success increases with each try.

Given that 1) stopping smoking is the single most important thing one can do to improve their health; 2) smoking cessation treatment doubles or triples quit rates; and 3) smoking treatment is the “gold standard” of cost-effective treatments,²⁸ smoking cessation is not the time to try to reduce costs by allocating treatments only to those with special difficulties. All smokers should be encouraged to access a treatment. In addition, since the efficacy of brief advice, pharmacotherapies, and psychological therapies all are dose related—the more intense the treatment, the greater the success

rate⁸—smokers should be encouraged to participate in as intensive therapies as possible.

SATHYABAMA

INSTITUTE OF SCIENCE & TECHNOLOGY

(Deemed to be university)

ACCREDITED WITH GRADE 'A' by NAAC | APPROVED BY AICTE

SATHYABAMA DENTAL COLLEGE

Organized by Department of Oral Medicine and Radiology

Certificate of participation

Awarded to

POOJA R

On Successful completion of 6 days value added course on

‘ORAL CANCER SCREENING AND PREVENTION’

on 5th – 10th February 2018.

Prof. Dr. C. Pravda
HOD, Dept OMDR,
SDCH, Chennai

Dr. B. Thayumanavan
Dean
SDCH, Chennai

DEPARTMENT OF CONSERVATIVE DENTISTRY AND ENDODONTICS
VALUE ADDED COURSE ON MOLAR ENDODONTICS 24TH -27TH APRIL 2018

Course contents

Day 1- internal anatomy

Access opening and coronal flaring.

Day 2- Introduction to Ni –Ti ProTaper

Step-back Vs crown-down

Cleaning and shaping in molars

Using Hand ProTapers - Crown Down technique.

Day 3- root canal disinfection and obturation

cleaning and shaping using hand protapers

Day 4- single cone obturation and core build up hands on

SCHEDULE FOR THE PROGRAM:

DAY 01

Lecture 01 - 08:00am to 9:45 am Dr. K. Sathyanarayanan
Internal Anatomy

Lecture 02 9:45 am to 10:30 am Dr. R. Kurinji Amalavathy
Access opening and coronal flaring

Break - 10:30 am to 10:45 am

DEMO 01 10:45am to 12:30pm Dr. K. Sathyanarayanan
Dr. Hrudi Sundar Sahoo
Access opening, coronal flaring

Lunch break 12:30 pm to 01:00pm

Hands on - 01:00 pm to 4:00 pm - Access opening in Maxillary and Mandibular Molars

DAY 02

Lecture 03 08:00am to 10:00 am Dr. Sushmitha Shivanna
Introduction to Ni –Ti ProTaper

Break - 10:00 am to 10:15 am

Lecture 04 10:15am to 12pm Dr. Hrudi Sundar Sahoo

Step-back Vs crown-down

Cleaning and shaping in molars

Using Hand ProTapers - Crown Down technique.

DEMO 02 12pm to 1pm Dr.Murali Sivakumar

Working length Determination - EAL

Lunch break 1:00pm to 2:00 pm

Hands on - 2:00 pm to 4:00 pm

DAY 03

Lecture 05 08:00am to 10:00am Dr. Murali S

Root Canal Disinfection and Obturation

Break 10:00 am to 10:15 am

DEMO 03 10:15 am to 12:15pm Dr. Kurinji Amalavathy

Cleaning and shaping using Hand ProTapers

Lunch break 12:15pm to 1:15 pm

Hands on - 1:30 pm to 4 pm

DAY 04

DEMO 04 08:00am to 09:45 am – Dr. Murali

Moderator - Dr. Purushotham

Single Cone obturation technique and Core buildup

Break 09:45 am to 10:00am

Hands on - 10:00am onwards

Lunch break 1:30 pm to 2:00 pm

Discussion and one to one assessment of work, Valedictory function – 2:00 pm to 4:00 pm

ENDO EZ 18

A Value added course on MOLAR ENDODONTICS for Interns

Date: 24th April – 27th April 2018
Time: 8am-4pm
Venue: SATHYABAMA DENTAL COLLEGE AND HOSPITAL

SCHEDULE FOR THE PROGRAM

DAY 01

Lecture 01 - 08:00am to 9:45 am Dr. K. Sathyanarayanan
Internal Anatomy
Lecture 02 9:45 am to 10:30 am Dr. R. Kuringi Amalavathy
Access opening and coronal flaring
Break - 10:30 am to 10:45 am
DEMO 01 10:45am to 12:30pm Dr. K. Sathyanarayanan
Dr. Hrudi Sundar
Access opening, coronal flaring
Lunch break 12:30 pm to 01:00pm
Hands on - 01:00 pm to 4:00 pm -
Access opening in Maxillary and Mandibular Molars

DAY 02

Lecture 03 08:00am to 10:00 am Dr. Sushmitha Shivanna
Introduction to Ni-Ti ProTaper
Break - 10:00 am to 10:15 am
Lecture 04 10:15am to 12pm Dr. Hrudi Sundar Sahoo
Step-back Vs crown-down
Cleaning and shaping in molars
Using Hand ProTapers - Crown Down
technique.
DEMO 02 12pm to 1pm Dr. Murali Sivakumar
Working length Determination - EAL
Lunch break 1:00pm to 2:00 pm
Hands on - 2:00 pm to 4:00 pm

DAY 03

Lecture 05 08:00am to 10:00am Dr. Murali S
Root Canal Disinfection and Obturation
Break 10:00 am to 10:15 am
DEMO 03 10:15 am to 12:15pm Dr. R. Kuringi Amalavathy
Cleaning and shaping using Hand ProTapers
Lunch break 12:15pm to 1:15 pm
Hands on - 1:30 pm to 4 pm

DAY 04

DEMO 04 08:00am to 09:45 am - Dr. S. Murali
Moderator - Dr. M. Purushotham
Single Cone obturation technique and Core buildup
Break 09:45 am to 10:00am
Hands on - 10:00am onwards
Lunch break 1:30 pm to 2:00 pm
Discussion and one to one assessment of work,
Valedictory function - 2:00 pm to 4:00 pm

ORGANIZING COMMITTEE

Patrons

Dr. Mariazeena Johnson, Chancellor
Dr. Marie Johnson, President

Organizing Chairman

Dr. S. Thayumanavan, Dean - Dental College

Organizing Secretary

Dr. R. Kuringi Amalavathy, Head of the Department

Joint Secretaries

Dr. Sathyanarayanan k Reader
Dr. sushmitha Shivanna, Reader
Dr. Murali Sivakumar, Reader

Programme Co-Ordinators

Dr. Hrudi Sundar Sahoo, Sr. Lecturer
Dr. Purushotham M Sr. Lecturer
Dr. Megavarnan R. Sr. Lecturer
Dr. Sonali Sr. Lecturer
Dr. Shalini Sr. Lecturer
Dr. Hari Krishna Reddy Sr. Lecturer
Dr. Pavani Lecturer

SATHYABAMA DENTAL COLLEGE AND HOSPITAL

Jeppiaar Nagar, Rajiv Gandhi Road, Chennai - 600 119.

CERTIFICATE OF PARTICIPATION

This is to certify that

Manjula.S

has attended the "ENDO-EZ"

VALUE ADDED COURSE ON MOLAR ENDODONTICS

held on 24TH to 27TH APRIL 2018

organized by the Department of Conservative Dentistry & Endodontics,
Sathyabama Dental College & Hospital, Chennai.

Dr. R. Kurinji Amalavathy, M.D.S.,
Head of the Department

Dr. B. Thayumanavan, M.D.S.,
Dean
