1.21	CRITICAL OVERVIEW OF THE FIRM	33

1.1 GENERAL:

The firm is a multi-disciplinary one and hence their practice is based on the simple concept that the design of forms in space should be generated by the context of their surroundings, while the principles of design should enhance comfort, culture and give meaning to the space. These qualities of the firm suited my mind and encouraged me to work in the firm with mutual learning from the Architects and also will help me increase my knowledge about the field of construction.

They strive to translate every design brief into an experience that engages, educates and excites the end user. Having seen the evolution of architecture with time as well as within their own practice, they aspire to achieve design solutions that are innovative with emphasis on functionality, economic efficiency, sustainability, flexibility and customization to suit the individual project's need.

I was also excited about the Internship opportunity with their firm, as their core belief is to work alongside the client through every stage providing environmentally progressive designs, respecting the local traditions and materials. Their strength lies in their understanding of clients' objectives, personality and values. They work with the contention that the vitality and beauty of the built environment play a crucial role in creating a productive and healthy community and, "as design professionals, we must take responsibility to this role".

1.2 ABOUT THE FIRM:

Yadav architects being a leading architecture and interior design firm based in Chennai India, was established by Ar. N.G. Yadav in 1958. the firm prides itself in being one of the oldest architecture firms in Chennai. through the years, it has grown in stature and quality with an experience of over 60 years. currently led by ar. prasad n Yadav and designer Rashmi Yadav, it has completed over 300 projects across all typologies. it is held in high regard for its commitment, ethics and quality of work. Every project is treated with a unique approach and work is done towards getting the best output for the client. To ensure client satisfaction and comfort, they oversee the project from the design to the execution stage. Clarity in design, backed by accurate drawings and detailing is their core strength, all while placing utmost importance to coordinating with their consultants for timely delivery. Their success is evident in the number of clients who continue to associate with them on their multiple undertakings.

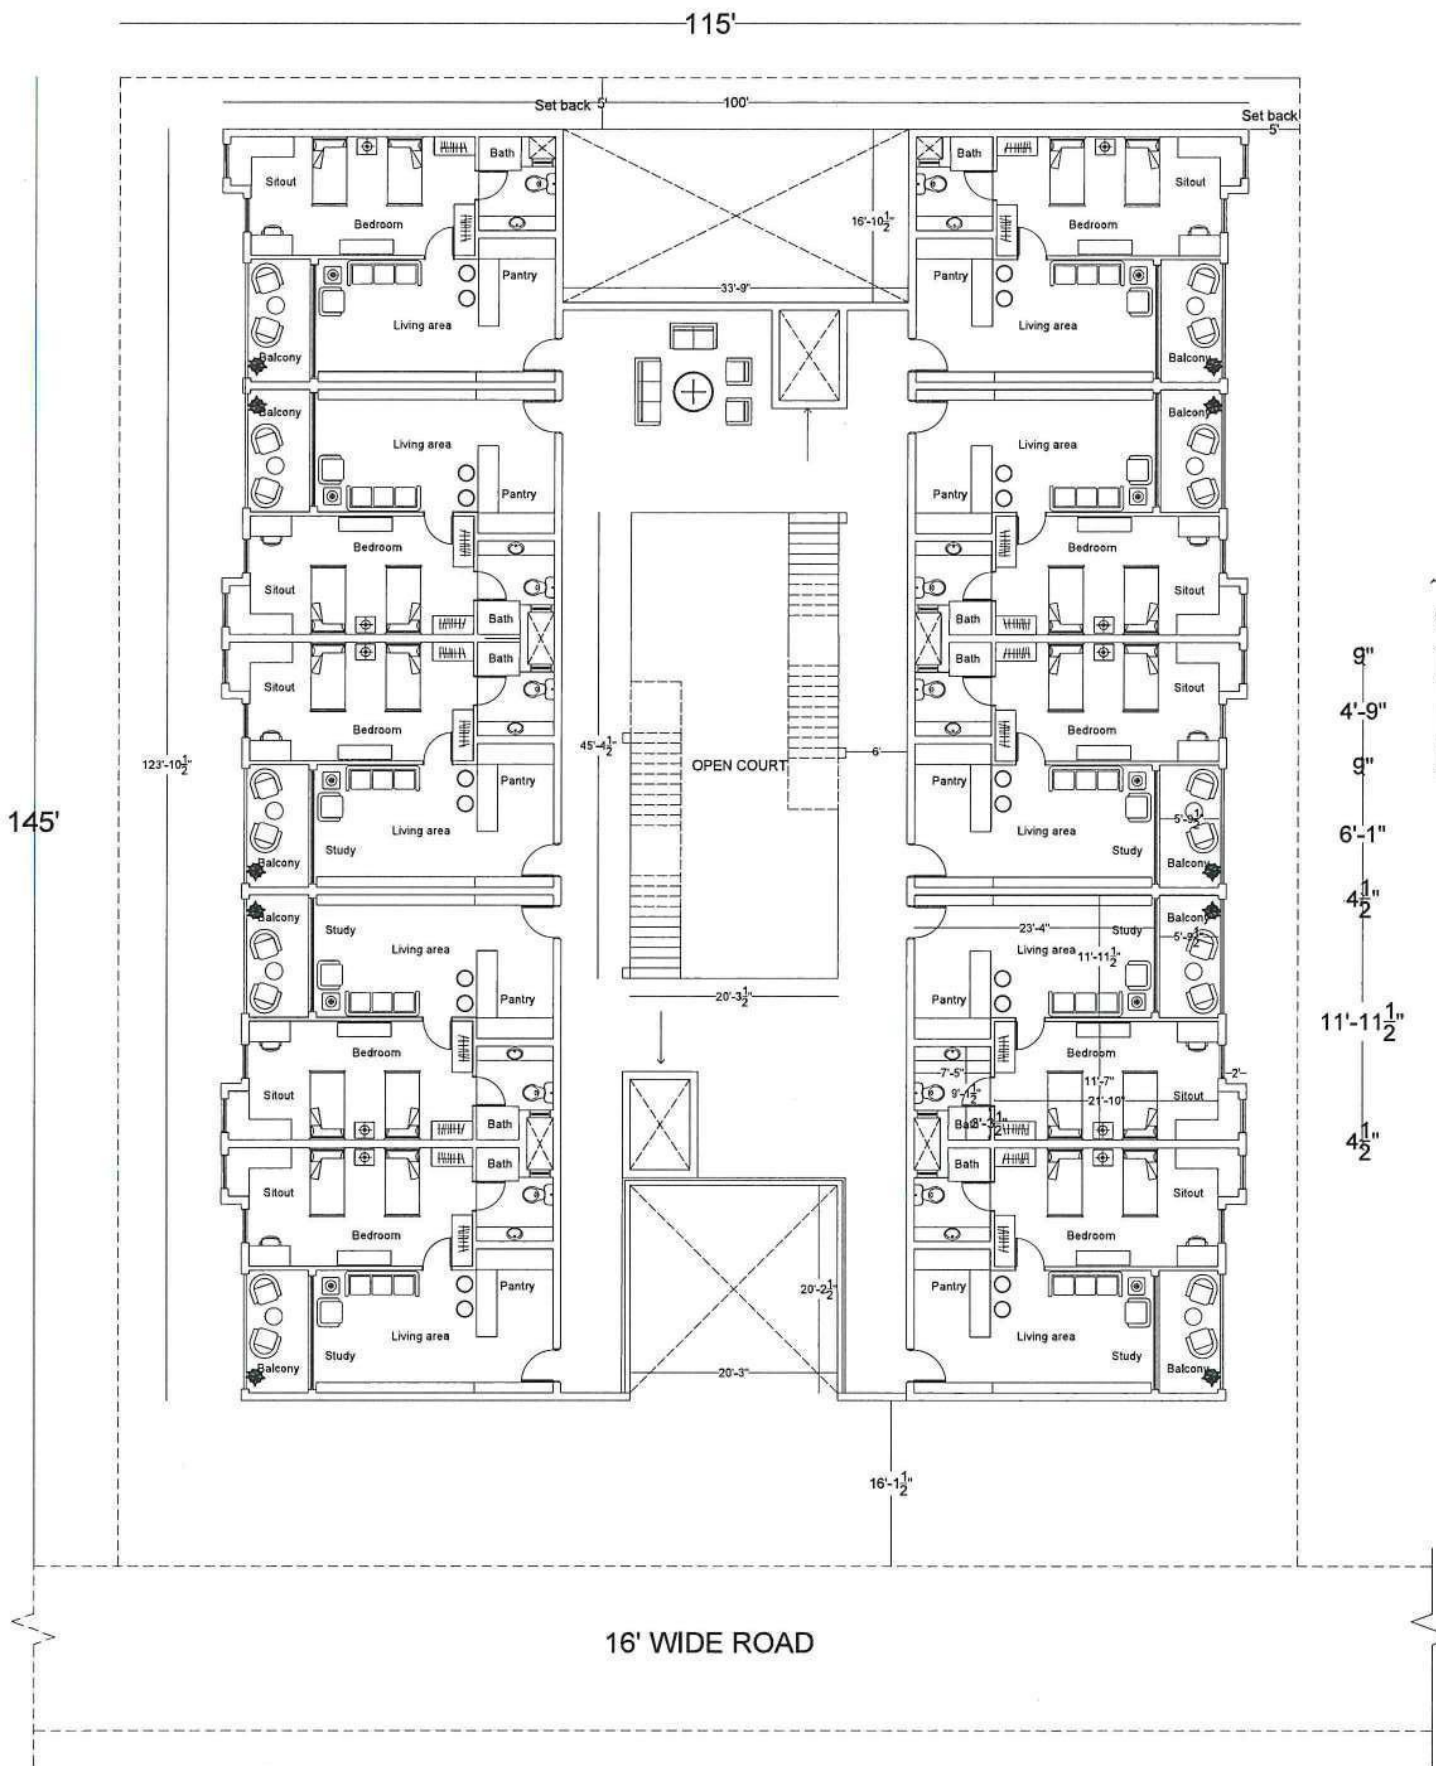

Above all, their quest for excellence in design and perfection in execution has been the guiding force in reaching the level of professionalism they possess at present. they have conceptualized and executed diverse projects of various magnitudes be it institutional, commercial, industrial, residential, hospitality, public or government projects. Ar. Prasad. N. Yadav, son of late Ar. N. G. Yadav, began his professional career as an architect in 1992. After Graduation from University of Poona, he did his post-graduation from School of Architecture and Planning Anna University, Chennai. He took the task of expanding the already established firm and its reach of projects to a wider level to include Tamil Nadu, Andhra Pradesh, Karnataka, Maharashtra and the Andaman Nicobar Islands. He has a keen interest in teaching and has been invited as a speaker and examiner to numerous architectural institutions while he also is in the Panel of Architects for several establishments such as L.I.C of India, Indian Institute of Technology-Madras, Chennai, Central Universities and several Banking Sectors. He has also been on the board of jury for the NIASA awards. A passionate traveler he holds a love for heritage and exploring new cities, being an ardent movie buff, he is never behind in catching a new release.

OBSERVATIONS ON SITE:

SAND FILLING - FORMS THE CUSHION BED

PCC LAYER - FOR THE LEVELLING OF THE SURFACE OF RODS.

COLUMN MARKING OUTLINE PROCESS:

THE TOTAL STATIONS ARE FIXED BASED ON THE SITE SURVEY POINTS TO LOCATE THE CENTER POINT.

FROM THE CENTER POINT THE PLUMB IS DROPPED TO CHECK WHETHER THE SITE IS LEVELLED.

FROM WHICH THE TOTAL STATION IS FED WITH COLUMN COORDINATES IN METERS TO LOCATE THE COLUMN MARKING POINTS ON SITE.

THE CONCRETE MIXTURE IS LAID OVER WHICH THE COORDINATE POINTS ARE LOCATED, MARKED AND THE COLUMN OUTLINE IS DRAWN.

CONCRETE:

CEMENT - BINDING AGENT

SAND - INFILL

AGGREGATE - PROVIDES VOLUME STRENGTH

WATER - ACTS AS THE CATALYST

CUBE TEST IS DONE TO CHECK WHETHER THE CONCRETE HAS ACHIEVED THE REQUIRED STRENGTH.

MARCH 1, 2022, 11:11 AM

1.21 CRITICAL OVERVIEW OF THE FIRM:

The overall experience at the firm for the last four months was an excellent learning experience. This opportunity enabled me to gain a load of knowledge in the field of architecture. My principal architect gave me more freedom and opportunity to work and explore on my own design ideas as a budding architect.

The firm allowed me to gain the practical knowledge about the process of construction projects and through constant site visits the experience got even more better. The principal architect himself would teach us about various topics in the field of architecture on a weekly basis. Fire safety and security, building services, building foundations, Roofing, Various types of wall partitions, Soil stabilization are few of the topics that was taught during the training period. A lot of effort was put in by the principal architect of the firm to help us understand the very basics of architecture.

Throughout the internship period I was able to improve my skills. All the projects that I worked on was entirely based on designing and even got a chance to design an entire dining hall for a school. This work experience has allowed me to develop my skills such as drafting, conceptual planning, material knowledge, on site construction processes, architectural detailing and spatial understanding. This practical training experience has improved my self-confidence and has provided me an opportunity to become a better design professional in the upcoming years.

I would like thank my principal architect Ar. Prasad N Yadav and the entire Yadav Architects team, for giving me an opportunity to work in the firm and for providing me a great learning experience and knowledge throughout my practical training.
