DEPARTMENT OF INFORMATION TECHNOLOGY

BONAFIDE CERTIFICATE

This is to certify that this Project Report is the bonafide work of **HEMALATHA.V(Reg. No: 39120038)** who carried out the project entitled “**TUFIDCO SCHEMES**” under my supervision from DEC(13-12-2021) to currently pursuing.

Internal Guide

Head of the Department

Submitted for Viva Voce Examination held on _____

Internal Examiner

External Examiner

DECLARATION

I, **HEMALATHA.V** hereby declare that the Internship Titled entitled “**TUFIDCO SCHEMES**” completed by me under the guidance of **Dr. S. Murugan and Dr. J. Albert Mayan, Dr.V.Maria Anu** is submitted in partial fulfilment of the requirements for the award of Bachelor in Technology Degree in Information Technology.

DATE:

HEMALATHA.V

PLACE:

DIGITAL SIGNATURE OF CANDIDATE

ACKNOWLEDGEMENT

I am pleased to acknowledge my sincere thanks to **Board of Management** at **SATHYABAMA** for their kind encouragement in doing this project and for completing it successfully. I am grateful to them. I convey my thanks to **Dr. T. Sasikala M.E., Ph.D, Dean, School of Computing, Dr. R. Subhashini, M.E., Ph.D. Head of the Department of Information Technology** for providing me necessary support and details at the right time during the progressive reviews. I would like to express my sincere and deep sense of gratitude to my Project Guide **Dr. V. Maria Anu M.E., Ph.d**, for her valuable guidance, suggestions and constant encouragement that paved the way for the successful completion of my project work. I wish to express my thanks to all teaching and non-teaching staff members of the **Department of Information Technology** who were helpful in many ways throughout the completion of the project .

06th January, 2021

From
Dr. L. Lakshmanan
Professor & Head of the Department
Department of Computer Science and Engineering
School of Computing
Sathyabama Institute of Science and Technology
Jeppiaar Nagar, Rajiv Gandhi Salai, Chemmencherry,
Chennai – 600119
Tamilnadu.

To
The Additional chief secretary/ The Chairman and Managing Director
Tamil Nadu Urban Finance and Infrastructure Development Corporation Ltd (TUFIDCO)
490/1-2, Anna Salai, Nandavanam,
Chennai – 600035
Tamilnadu.
Respected Sir,

Ref.: SIST-CSE/INT/2021/204 dt. 06th December, 2021

Sub: Permission Request for Internship at Tamil Nadu Urban Finance and Infrastructure Development Corporation Ltd (TUFIDCO) – Reg.

The following are the bonafide students of School of Computing, Sathyabama Institute of Science and Technology. It is part of the curriculum that every student has to undergo Internship during the period of study and these students are willing to undergo project internship at Tamil Nadu Urban Finance and Infrastructure Development Corporation Ltd (TUFIDCO) under the guidance of Dr S. Murugan and Dr J. Albert Mayan Professors, Department of Computer Science and Engineering.

NAME	Register No	Department	Year
VIVEK KRISHNA	39111110	B.E CSE	THIRD
ARYAN BHATT	39110087	B.E CSE	THIRD
ABHINAV KUMAR	39120003	B.TECH IT	THIRD
HEMALATHA.V	39120038	B.TECH IT	THIRD
SHARIN SATHIQ	39120108	B.TECH IT	THIRD
HARIKRISHNA K	39110368	B.E CSE	THIRD

The period of internship will be from December 2021 till the completion of the project. Kindly do the needful. We look forward to hear from you.

Thanking you

Yours Sincerely,

Dr L LAKSHMANAN

Enclosure:
Biodata of students.

Dr. L. LAKSHMANAN., M.E., Ph.D,
Professor and Head,
Dept. of CSE,
Sathyabama Institute of Science and Technology,
Chennai, India.

ABSTRACT

TUFIDCOSCHEMES is a tufidco company website that is government organization who release funds for Urban local bodies (ULBs). This website provides a solution of Schemes that is KNMT and Singara Chennai 2.0. This website provides a solution using Python Framework like Django and HTML, CSS and JavaScript and database like Postgres.

This website provides all the information about the funds that is released for the ULBS like funds for library , roads , Bus Stands ,Street Light etc...,

DGM is the head of this website and is Governed by the Chief Secretary of Tamil Nadu.

There are different login ids for different official person and ULBs. They can see their dashboard as well as they can upload their work.

This website has permission functionalities that is monitored by Admin who has authority to give the permission to the only that part that has required for the person.

For e.g ULB's can only update the bank details and PAN details at only once for further if they want any change then they have to contact with Admin of the website .

Website is fully dynamic and has real time data values and is Hosted in open platform AWS.

Till now more than 6000 people has visited this website.

CHAPTER 1

INTRODUCTION

1.1 ABOUT THE CONCEPT

Django is an extremely popular and fully featured server-side web framework, written in Python. This module shows you why Django is one of the most popular web server frameworks, how to set up a development environment, and how to start using it to create your own web applications.

Prerequisites

Before starting this module you don't need to have any knowledge of Django. Ideally, you would need to understand what server-side web programming and web frameworks are by reading the topics in our Server-side website programming first steps module. A general knowledge of programming concepts and Python is recommended, but is not essential to understanding the core concepts.

The Model Layer

Django provides an abstraction layer (the “models”) for structuring and manipulating the data of your web application. Learn more about it below:

- Models: Introduction to models | Field types | Indexes | Meta options | Model class.
- Query Sets: Making queries | Query Set method reference | Lookup expressions.
- Model instances: Instance methods | Accessing related objects.
- Migrations: Introduction to Migrations | Operations reference | Schema Editor | Writing migrations.
- Advanced: Managers | Raw SQL | Transactions | Aggregation | Search | Custom fields | Multiple databases | Custom lookups | Query Expressions | Conditional Expressions | Database.
- Other: Supported databases | Legacy databases | Providing initial data | Optimize database access | PostgreSQL specific features.

The View Layer

Django has the concept of “views” to encapsulate the logic responsible for processing a user’s request and for returning the response. Find all you need to know about views via the links below:

- The basics: [URL confs](#) | [View functions](#) | [Shortcuts](#) | [Decorators](#) | [Asynchronous Support](#).
- Reference: [Built-in Views](#) | [Request/response objects](#) | [Template Response objects](#).
- File uploads: [Overview](#) | [File objects](#) | [Storage API](#) | [Managing files](#) | [Custom storage](#).
- Class-based views: [Overview](#) | [Built-in display views](#) | [Built-in editing views](#) | [Using mixins](#) | [API reference](#) | [Flattened index](#)
- Advanced: [Generating CSV](#) | [Generating PDF](#)
- Middleware: [Overview](#) | [Built-in middleware classes](#)

The Template Layer

The template layer provides a designer-friendly syntax for rendering the information to be presented to the user. Learn how this syntax can be used by designers and how it can be extended by programmers:

- The basics: [Overview](#)
- For designers: [Language overview](#) | [Built-in tags and filters](#) | [Humanization](#)
- For programmers: [Template API](#) | [Custom tags and filters](#) | [Custom template backend](#)

Forms

Django provides a rich framework to facilitate the creation of forms and the manipulation of form data.

- The basics: Overview | Form API | Built-in fields | Built-in widgets.
- Advanced: Forms for models | Integrating media | Formsets | Customizing validation.

The Development Processes

Learn about the various components and tools to help you in the development and testing of Django applications:

- Settings: Overview | Full list of settings
- Applications: Overview
- Exceptions: Overview
- Django-admin and manage.py: Overview | Adding custom commands
- Testing: Introduction | Writing and running tests | Included testing tools | Advanced topics
- Deployment: Overview | WSGI servers | ASGI servers | Deploying static files | Tracking code errors by email | Deployment checklist.

The Admin

Find all you need to know about the automated admin interface, one of Django's most popular features:

- Admin site
- Admin actions
- Admin documentation generator

Security

Security is a topic of paramount importance in the development of web applications and Django provides multiple protection tools and Mechanisms:

- Security overview
- Disclosed security issues in Django
- Clickjacking protection
- Cross Site Request Forgery protection
- Cryptographic signing
- Security Middleware

Internationalization and Localization

Django offers a robust internationalization and localization framework to assist you in the development of applications for multiple languages and world regions:

Overview | Internationalization | Localization | Localized web UI formatting and form input ,Time zones,Performance and optimization, There are a variety of techniques and tools that can help get your code running more efficiently - faster, and using fewer system resources,Performance and optimization overview.

Geographic Framework

Geo Django intends to be a world-class geographic web framework. Its goal is to make it as easy as possible to build GIS web applications and harness the power of spatially enabled data.

Common Web Application Tools

Django offers multiple tools commonly needed in the development of web applications:

Authentication: Overview | Using the authentication system | Password management | Customizing authentication | API Reference

Caching

Logging

Sending emails

Syndication feeds (RSS/Atom)

Pagination

Messages framework

Serialization

Sessions

Sitemaps

Static files management

Data validation

Other Core Functionalities

Learn about some other core functionalities of the Django framework:

Conditional content processing

Content types and generic relations

Flat pages

Redirects

Signals

System check framework

The sites framework

Unicode in Django

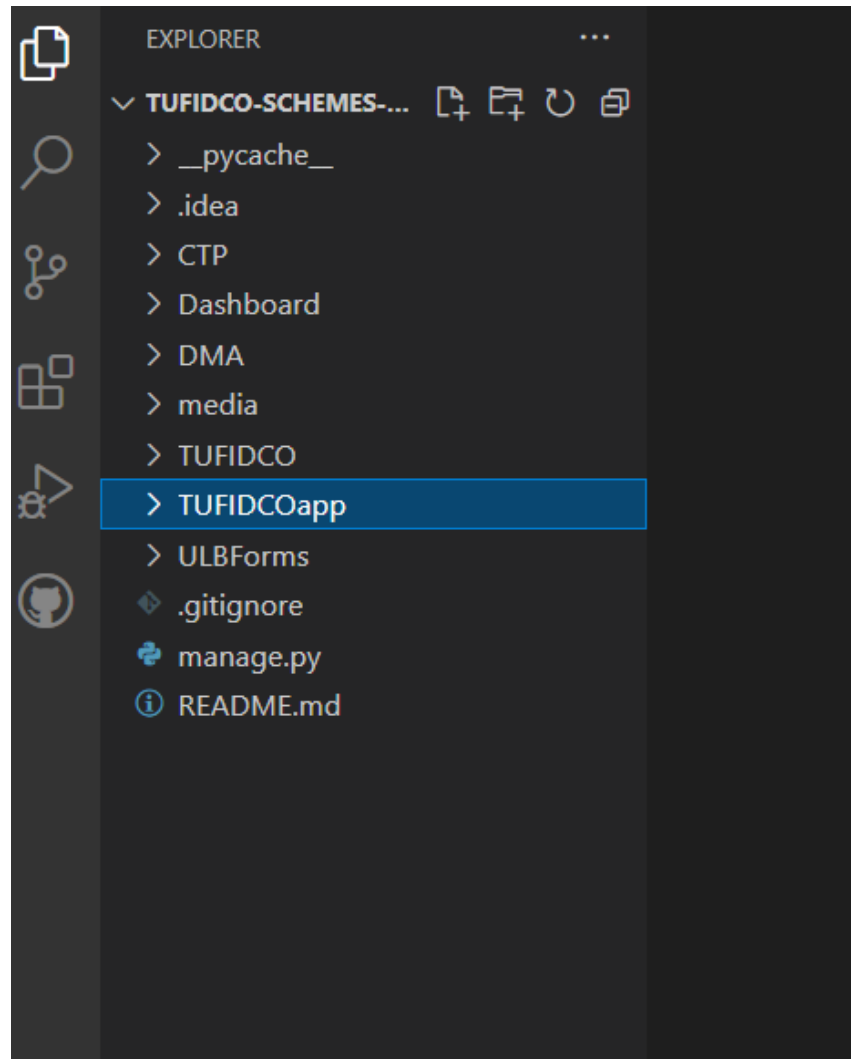

Fig 1.1 components of website

1.2 ABOUT JAVASCRIPT AND OOPs

JavaScript is the programming language of the web. It's easy to learn and becoming more and more prevalent in software development everyday (Netflix, PayPal, and Facebook all use a lot of JavaScript!). In ES6, also referred to as ES6, classes were introduced to JavaScript, which made it much easier for developers to think about and organize their programs. Also, JavaScript can run in any web browser, which means we just need a text editor!

JavaScript classes are a great way to make clean, reusable code and easily track the relationship between one object's properties & functions and another object's properties & functions. Objects have data and functions to manipulate data. The relationships and interactions between well-modelled objects will allow us to create systems of great complexity, and allow us to increase that complexity while keeping a maintainable and organized codebase.

Object modeling is a process that will organically break complex features down into granular components, as you'll see in our example project of creating a text role-playing game.

CHAPTER-2

AIM AND SCOPE OF THE WEBSITE

2.1 AIM :

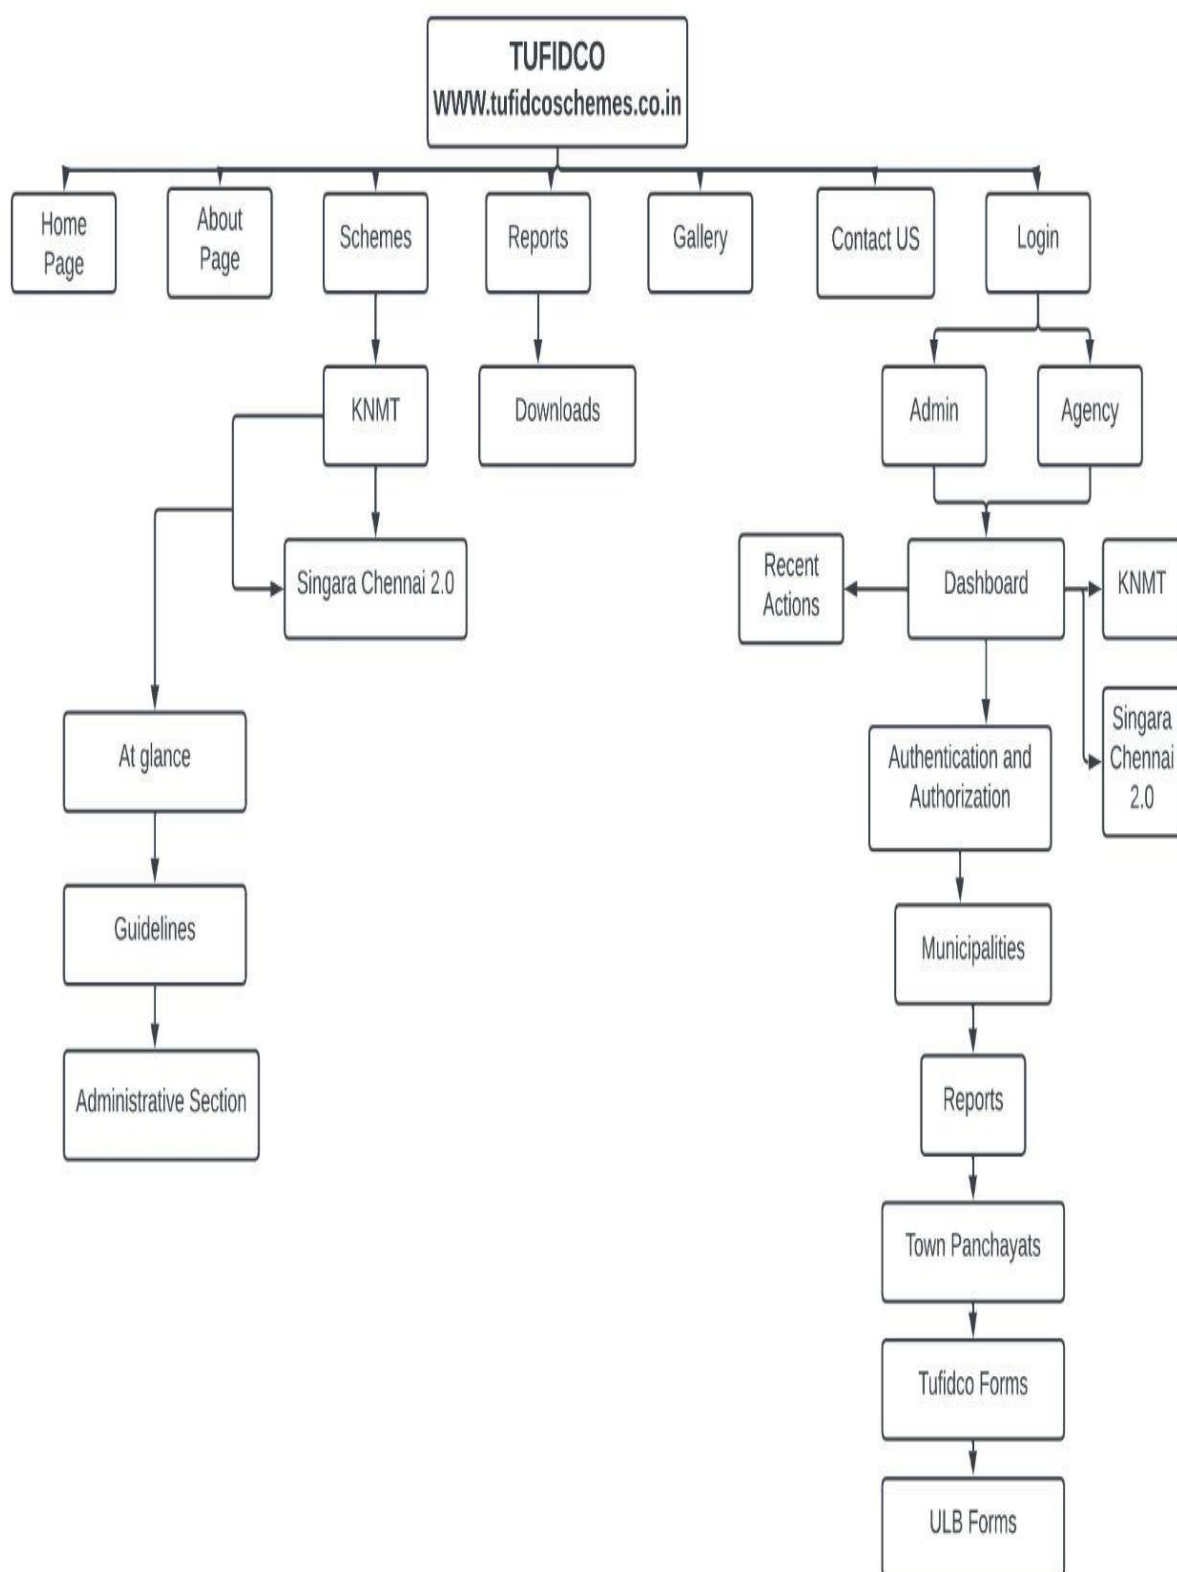

- To develop a website of TUFIDCO Schemes.
- The purpose of this website is to release funds for different ULB's in Tamil Nadu for their respective works that is sanctioned by government.
- ULB's can access information related to the various departments of ministries such as department of economic affair, expenditure, revenue, financial services and these investments will be monitored by the Secretary of Tamil Nadu.
- The main objective of this project to manage the details of ULB details, financial expenditure reports, etc. The project is totally at administrative end and thus only the administrator is guaranteed the access.
- This www.tufidcoschemes.co.in is for all planned schemes, databases of all recipient agencies, integration with core banking solution of banks handling plans funds.
- Now this website is providing details of two Schemes: -
- (1) KNMT
- (2) Singara Chennai 2.0

2.2 SCOPE

This Website scope is to manage and control all data's that is provided to different ULBS in Tamil Nadu and also monitoring the financial funds released for different funds.

- It will be analyzing and monitoring the sources of revenue that are used by ULBS in the State.
- TUFIDCO'S INFRASTRUCTURE FUNDING SCHEME(TIFS) from its share capital, reserves and by availing loan from banks .

2.2.1 Ideation Map

CHAPTER 3

METHODS OR ALGORITHMS USED

3.1 HARDWARE/SOFTWARE REQUIREMENT

- Windows/Mac/Linux Based System
- Any text editor like VSCode, Sublime Text, Atom etc.
- Any chromium-based browser like Google Chrome, Microsoft Edge etc.

3.1.1 *Windows/Mac/Linux System*

Windows , Mac or Linux based operating system for personal computers or any other internet of things devices.

3.1.2 *Any text editor like VSCode, Sublime text, Atom etc.*

Any text editor works. Some of them are:

.VS CODE

PYCHARM

3.2 SETTING UP

Settings.py

```
"""
Django settings for TUFIDCO project.

Generated by 'django-admin startproject' using Django 4.0.

3.3 DEVELOPMENT OF THE WEBSITE

3.3.1 CREATING TUFIDCO

Creating the folder name Tufidco that will responsible for the setting up the libraries and ULBS.

3.3.2 CREATING TUFIDCO APP

- (1) Then there is tufidco app folder that will responsible for all the backend part and in this folder, we will create all the logics that is responsible for all the views in backend part.
- (2) And in this folder, there are many components that are describes in below figure
- (3) This folder contains one more folder that is migrations folder that have deletion and alter statement.

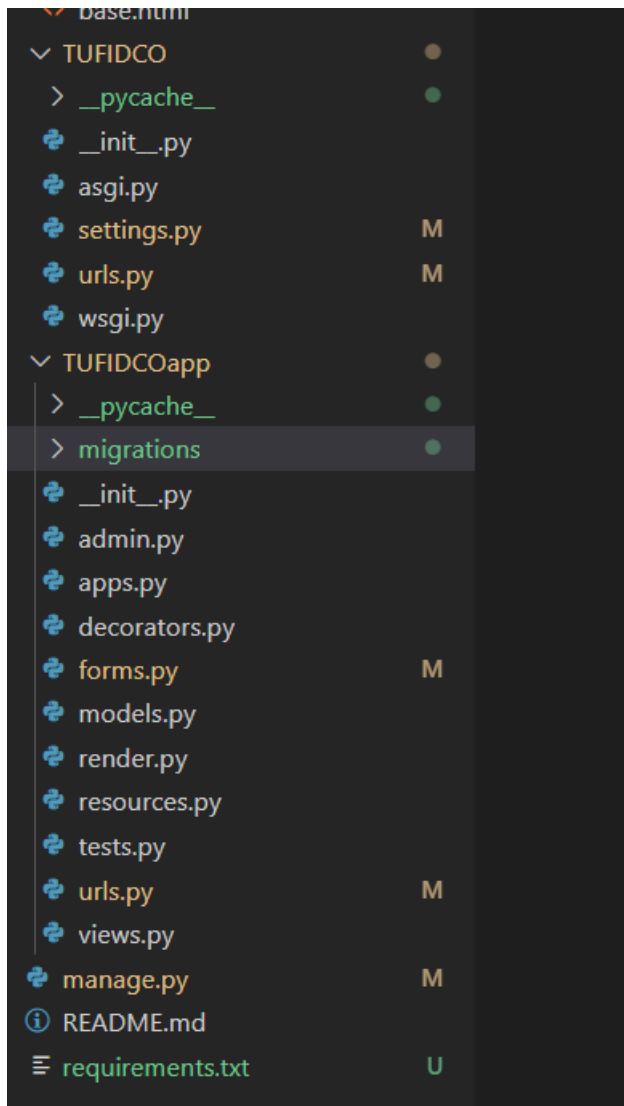

Fig.3.2.2 Tufidco and tufidco app

3.3.3 Templates

- (1) Template folder contains all the html file
- (2) There are 3 more folder inside the template folder that is admin, includes, pages
- (3) In template folder there is one component base.html that is base of all html file
- (4) The base.html file contains the links of Bootstrap CSS, Font- awesome CSS , Map-Box , Custom CSS , Favicon , Bootstrap JS , Custom JS.

Source code of base.html and format of template folder

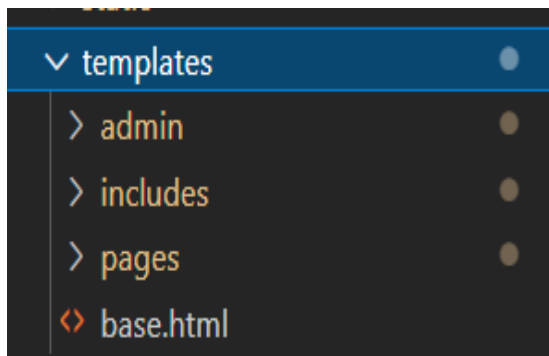

Fig 3.3.3 Templates

Base.html

```
<!DOCTYPE html>
<html lang="en">
  <!-- Head -->
  <head>
    <meta charset="UTF-8">
    <meta http-equiv="X-UA-Compatible" content="IE-edge">
    <meta name="viewport" content="width=device-width, initial-scale=1">
    <title>{% block title %}{% endblock %}</title>
    <!-- Bootstrap CSS -->
    {% load static %}
    <link rel="stylesheet" href="{% static 'vendors/bootstrap5.1.3/dist/css/bootstrap.min.css' %}">
    <!-- Fontawesome CSS -->
    <link rel="stylesheet" href="https://cdnjs.cloudflare.com/ajax/libs/font-awesome/4.7.0/css/font-awesome.min.css">
    <!-- MapBox -->
    <script src="{% static 'vendors/mapbox-gl-js/v0.47.0/mapbox-gl.js' %}"></script>
```

```

<link rel="stylesheet" href="{% static 'vendors/mapbox-gl-js/v0.47.0/mapbox-gl.css' %}' />
<!-- Custom CSS -->
{% load static %}
<link rel="stylesheet" href="{% static 'css/style.css' %}">
<!-- Favicon -->
<link rel="apple-touch-icon" sizes="180x180" href="{% static 'img/apple-touch-icon.png' %}">
<link rel="icon" type="image/png" sizes="32x32" href="{% static 'img/logo_trans.ico' %}">
{% block extrastyle %}{% endblock %}
</head>
<!-- End Head -->
<!-- Start Body -->
<body>
    {% block content %}
    {% endblock %}
    {% load static %}
    <script src="{% static 'vendors/bootstrap5.1.3/dist/js/bootstrap.bundle.js' %}"></script>
    <script src="{% static 'vendors/jquery-3.4.1/jquery-3.4.1.slim.js' %}"></script>
    <script src="{% static 'vendors/popper-1.16.0/dist/umd/popper.min.js' %}"></script>
    <!-- Bootstrap JS-->
    <script src="{% static 'vendors/bootstrap/4.4.1/js/bootstrap.min.js' %}"></script>
    <!-- Custom JS-->
    {% load static %}
    <script src="{% static 'js/plugins.js' %}"></script>
    {% block js-foot %}{% endblock %}
</body>
<!-- End Body -->
</html>

```

3.3.4 Creating Static Folder :

- (1) Static folder contains that is CSS , image , js ,and vendors
- (2) CSS folders is responsible for the stylesheet of admin.css, all.min.css, style.css Imp folders contains the image
- (3) Js contains JavaScript of the pages that is gallery.js , plugins.js
- (4) Vendor folder contains bootstrap jQuery ,
- (5) mapbox – gl , popper , xlsx

3.3.5 Creating media folder

- (1) Media folder contains the folder that is gallery , headerimages , mainslider , pdf , photogallery , reforms
- (2) Gallery folder contains all the jpg images of ULBs
- (3) Header images contains the logo of Indian-flag , logo.png , tamilnadulogo.png
- (4) Mainslider contains the images of slider
- (5) Pdf has downloaded format
- (6) Photogallery is the images of all town Panchayats , Municipality
- (7) We can upload the reform image in this folder

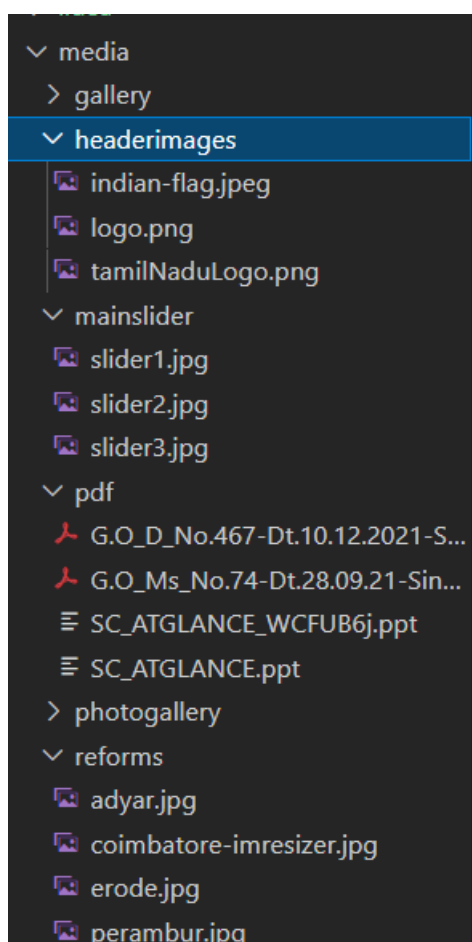

Fig 3.3.5 media folder

3.3.6 UNDER TEMPLATES DESCRIBES ADMIN

- (1) In the admin folder there are all .html pages which are related to admin_index .html all the extended html file in this folder will extend and will contain all the extra code
- (2) Below fig will show the formats of admin folder.

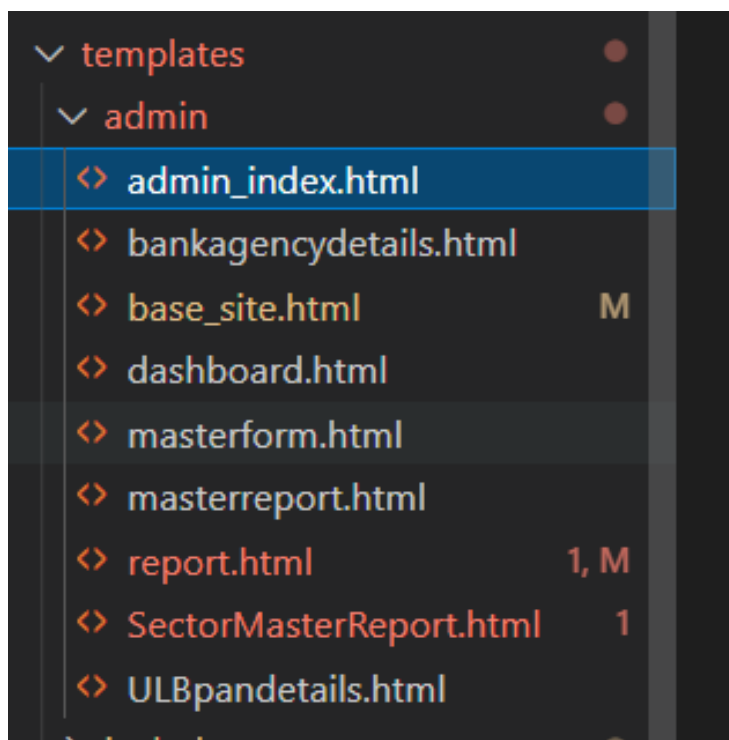

Fig 3.3.6

3.3.7 UNDER TEMPLATES ALL HTML PAGES

- (1) Under the Templates there is page folder that has components of html file .
- (2) That is shown in frontend part
- (3) Below image below show the formats of page

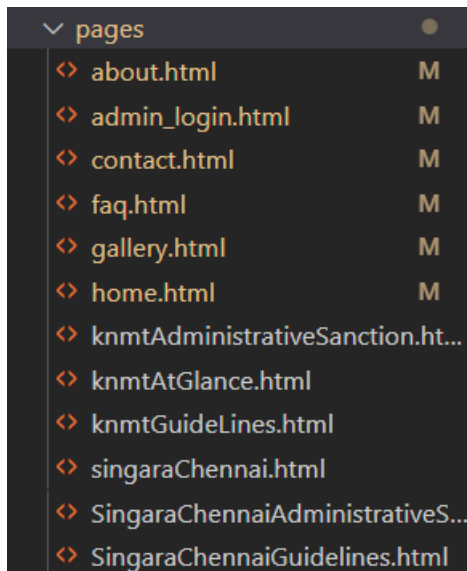

Fig 3.3.7pages

3.3.8 UNDER TUFIDCO CREATING SETTING.PY AND URLS.PY

- (1) In the setting.py there is one secret key that connects the database
- (2) In the setting.py there are section which contains the all installed apps
- (3) API key of MAPBOX also in this.
- (4) Below are the source codes of settings.py

```
from pathlib import Path
import os

# Build paths inside the project like this: BASE_DIR / 'subdir'.
BASE_DIR = Path(__file__).resolve().parent.parent

# Quick-start development settings - unsuitable for production
# See https://docs.djangoproject.com/en/4.0/howto/deployment/checklist/

# SECURITY WARNING: keep the secret key used in production secret!
SECRET_KEY = 'django-insecure-hu5bn)c*&m%n=y-j#n5_$v&)ox^8^f9_9qr7aw-y1_jop@nph^'
```

```

# SECURITY WARNING: don't run with debug turned on in production!
DEBUG = True

ALLOWED_HOSTS = []

INCORPORATION

Tamil Nadu Urban Finance and Infrastructure Development Corporation Ltd (TUFIDCO) was incorporated under the Companies Act, 1956 on 21-03-1990. The main objective of the corporation is providing financial assistance and guidance to Local Bodies, Corporations, Boards, Authorities and parastatal agencies for their development schemes. It is also a Nodal Agency to implement Government programme/schemes in the State. The Corporate Identification Number (CIN) of TUFIDCO is "U65191TN1990SGC018909". TUFIDCO is the Nodal Agency for the following schemes Singara Chennai 2.0 Kalaignar Nagarpura Mempattu Thittam (KNMT).

Kalaingar Nagarpura Mempattu Thittam (KNMT)

AT GLANCE

Introduction

In Tamil Nadu, there are 14 Corporations (except Greater Chennai Corporation), 121 Municipalities and 528 Town Panchayats. Many schemes taken up in the recent years such as Smart Cities Mission, AMRUT are aimed at improving the infrastructure facilities of Corporations and major towns alone. Smart Cities Mission is being implemented only in 11 Corporations. AMRUT is also being implemented in 28 Towns only. The coverage of schemes in Corporations is relatively high when compared to Municipalities and Town Panchayats. Hence it has been decided to introduce a new Scheme "Kalaingar Nagarpura Mempattu Thittam"(KNMT) in all 121 Municipalities and 528 Town Panchayats so as to fulfil the infrastructural gaps in these Urban Local Bodies.

Singara Chennai 2.0

AT GLANCE

Introduction

The Greater Chennai Corporation (GCC) has an area of 426 Sq Km and a population of 66.72 lakh as per the 2011 census. The boundaries of Greater Chennai Corporation were extended by including 42 adjacent Local Bodies in the year 2011. Consequently, the area of the Greater Chennai Corporation increased from 174 sq.km. to 426 sq.km. There are gaps in the basic infrastructure in these added areas, which require special attention. Therefore, with a view to improve basic infrastructure in the Corporation, the Government has decided to launch 'Singara Chennai 2.0' programme. The aim of 'Singara Chennai 2.0' is to provide modern world-class infrastructure and services in Greater Chennai Corporation with a special focus towards added areas.

CHAPTER 5 : SUMMARY AND CONCLUSION

- (1) The website has been created successfully and is hosted on AWS and all the essential data and funds release for KNMT and Singara Chennai 2.0 are also added
- (2) The ULBs are uploading their work continuously on the website
- (3) The ULBs can also see the work that has been sanctioned to them
- (4) The Admin can see all the works that are uploading by ULBs
- (5) The website has functionality that can create the report of all the ULBs so that Admin and other official person can see all the reports
- (6) There are so many work has already in progress and website has functionality that has shown the work progress report images
- (7) All the places are attached with latitude and longitude so that the work place can also be seen on the Map that is Mapbox .
- (8) The website has been created successfully and is hosted on AWS and all the essential data and funds release for KNMT and Singara Chennai 2.0 are also added
- (9) The ULBs are uploading their work continuously on the website
- (10) The ULBs can also see the work that has been sanctioned to them
- (11) The Admin can see all the works that are uploading by ULBs
- (12) The website has functionality that can create the report of all the ULBs so that Admin and other official person can see all the reports
- (13) There are so many work has already in progress and website has functionality that has shown the work progress report images
- (14) All the places are attached with latitude and longitude so that the work place can also be seen on the Map that is Mapbox .
- (15) The website has been created successfully and is hosted on AWS and all the essential data and funds release for KNMT and Singara Chennai 2.0 are also added

- (16) The ULBs are uploading their work continuously on the website
- (17) The ULBs can also see the work that has been sanctioned to them
- (18) The Admin can see all the works that are uploading by ULBs
- (19) The website has functionality that can create the report of all the ULBs so that Admin and other official person can see all the reports
- (20) There are so many work has already in progress and website has functionality that has shown the work progress report images
- (21) All the places are attached with latitude and longitude so that the work place can also be seen on the Map that is Mapbox .
- (22) The website has been created successfully and is hosted on AWS and all the essential data and funds release for KNMT and Singara Chennai 2.0 are also added
- (23) The ULBs are uploading their work continuously on the website
- (24) The ULBs can also see the work that has been sanctioned to them
- (25) The Admin can see all the works that are uploading by ULBs
- (26) The website has functionality that can create the report of all the ULBs so that Admin and other official person can see all the reports
- (27) There are so many work has already in progress and website has functionality that has shown the work progress report images
- (28) All the places are attached with latitude and longitude so that the work place can also be seen on the Map that is Mapbox .

FUTURE WORK

- (1) There are total 6 schemes under tufidco schemes from that 2 schemes has been added successfully and all the other 4 schemes are remaining that we have to add
- (2) Also there are work required to create release and request through the website only

- (3) Verification of all the pan details and bank detail is left
- (4) There are many changes to do according to the requirement of ULBS and TUFIDCO
- (5) Similarly it is also possible that in this website we can able to add the garbage project idea of Tamil Nadu government
- (6) There are total 6 schemes under tufidco schemes from that 2 schemes has been added successfully and all the other 4 schemes are remaining that we have to add
- (7) Also there are work required to create release and request through the website only
- .
- (8) Verification of all the pan details and bank detail is left
- (9) There are many changes to do according to the requirement of ULBS and TUFIDCO

Similarly it is also possible that in this website we can able to add the garbage project

REFERENCES

PROJECT:

- Dr Murugna DGM of tufidco , "On the development website continuously monitoring all the changes and improvement need in website
- DR Shiva Subramaniam also helped in providing all the datas that are needed for the wesite
- DR. Albert Mayan helping in creating the logic behind the forms
- And also DR.Albert is continuously providing support if there is any problem

    <h2>ADMINISTRATIVE SANCTION</h2>
    <p class="scheme-p">
      <span>Introduction<br><br></span>
      In Tamil Nadu, there are 14 Corporations (except Greater Chennai
      Corporation), 121 Municipalities and 528 Town Panchayats. Many schemes taken up
      in the recent years such as Smart Cities Mission, AMRUT are aimed at improving
      the infrastructure facilities of Corporations and major towns alone. Smart
      Cities Mission is being implemented only in 11 Corporations. AMRUT is also
      being implemented in 28 Towns only. The coverage of schemes in Corporations is
      relatively high when compared to Municipalities and Town Panchayats. Hence it
      has been decided to introduce a new Scheme "Kalaingar Nagarpura MEMPATTU
      THITTAM"(KNMT) in all 121 Municipalities and 528 Town Panchayats so as to
      fulfil the infrastructural gaps in these Urban Local Bodies.

                <p class="scheme-p">
                    <span>Introduction<br><br></span>
                    In Tamil Nadu, there are 14 Corporations (except Greater Chennai
                    Corporation), 121 Municipalities and 528 Town Panchayats. Many schemes taken up
                    in the recent years such as Smart Cities Mission, AMRUT are aimed at improving
                    the infrastructure facilities of Corporations and major towns alone. Smart
                    Cities Mission is being implemented only in 11 Corporations. AMRUT is also
                    being implemented in 28 Towns only. The coverage of schemes in Corporations is
                    relatively high when compared to Municipalities and Town Panchayats. Hence it
                    has been decided to introduce a new Scheme "Kalaingar Nagarpura MEMPATTU
                    THITTAM"(KNMT) in all 121 Municipalities and 528 Town Panchayats so as to
                    fulfil the infrastructural gaps in these Urban Local Bodies.</p>
