ACKNOWLEDGEMENT

I am pleased to acknowledge my sincere thanks to Board of Management of **SATHYABAMA INSTITUTE OF SCIENCE AND TECHNOLOGY** for their kind encouragement in doing this project and for completing it successfully. I am grateful to them.

I convey my thanks to **Dr. T.SASIKALA, M.E., Ph.D., Dean, School of Computing** and **Dr. SUBHASHINI, M.E., Ph.D., Head of the Department, Dept. of Information Technology** for providing me necessary support and details at the right time during the progressive reviews.

I would like to express my sincere and deep sense of gratitude to my Project Guide **Dr. JEBERSON RETNA RAJ, M.E., Ph.D.,** for her valuable guidance, suggestions and constant encouragement paved way for the successful completion of my project work.

I wish to express my thanks to all Teaching and Non-teaching staff members of the **Department OF INFORMATION TECHNOLOGY** who were helpful in many ways for the completion of the project.

TRAINING CERTIFICATE

ABSTRACT

Every person who wishes to convey a message to someone has to make sure to choose the right medium first. With most of the population shifting their preference to technology, the mediums for sharing information have also changed to a great extent.

No one could have thought that the internet could become an essential part of marketing but it did. No one could have imagined that the Internet can also act as a medium of expressing thoughts but it no undoubtedly has become one and that too the fastest growing and the most famous one.

Personal Blogs have evolved as a great medium for sharing information or even expressing thoughts online.

A personal blog is that sort of blog that has grown gradually over the span of years. A blog simply is a sort of website that mainly focuses on written content. Personal blogs have gained a lot of popularity with time and have become a great source of sharing experiences, feelings, thoughts or even knowledge about anything and everything.

There is no hard rule as to how to create a personal blog.

Personal [bloggers](#) in today's tend to follow the same trajectory as older times, even though there is no fight to creating a website. With the aim to create a personal blog, budding bloggers can use many blogging networks and start sharing their blogs with the world.

The main success of a personal blog lies in finding others to share the writing. The best way out could be to find people who share common interests with you. As a blogger begins to grow in connection with other bloggers, the personal blog eventually begins to grow too.

Personal blogs differ from other types of blogs because **with a personal blog the focus is on the author**. And pretty much all other kinds of blogs will focus on the user or reader. However, in my opinion, this line is becoming increasingly blurred. Bloggers write because they want to be read. For this to happen, they must know their audience perfectly, in order to adapt their content .

1. Share your thoughts

One of the biggest reasons to start a personal blog is to share your thoughts and ideas. Just make sure to define your target audience (who your ideal audience is) so you can create content accordingly.

2. Networking with others

One more reason people start personal blogs is to build and grow their online connections. When you start a new blog on any topic, you'll find and engage with hundreds of people within a year.

3. Create and grow your personal brand

[Personal branding](#) is something you can't ignore. The best way to build and grow your personal brand is to create a blog, share your views, engage with influencers, and try to make a difference.

4. Do it for fun

Or you can start a personal blog just to have fun. You can keep your blog posts private if you want so you can use them as an online diary. Or you can write whatever comes to your mind and improve your writing skills.

5. Make money online

[Blogging helps you make money online](#). You can sell your products or start offering services such as freelance writing, design, or whatever you're good at to make money. You can also use your blog to monetize with affiliate marketing, display ads, and more.

INTRODUCTION

What is a Personal Blog ?

A personal blog is a blog that's run by an individual author. It's NOT run by a team.

Almost every single article on a personal blog gets published by ONLY one person.

People who run personal blogs share their ideas and thoughts with their audience in a “conversational tone”. Personal blogs aren't blogs with lots of guest contributors as they're run by an individual.

Benefits of Personal Blogging

So what are the benefits of personal blogging? Why should you start a personal blog? Let's talk about all the benefits now.

- You can share your thoughts and ideas with online readers
- You can use your personal blog as an online journal
- It helps you improve your writing skills
- You can network with other bloggers and influencers
- You can build and grow your brand

Above all, personal blogging can help you make money as you can use various strategies like offering services, selling your own products, affiliate marketing, etc.

Role of HTML, CSS, JAVASCRIPT

- A webpage can contain headings, paragraphs, images, videos, and many other types of data. Front end developers use the HTML element to specify what kind of information each item on a webpage contains — for instance, the “p” HTML element indicates a paragraph. Developers also write HTML language code to specify how different items relate to one another in the page’s overall structure or document structure.
- CSS is used for defining the styles for web pages. It describes the look and formatting of a document which is written in a markup language. It provides an additional feature to HTML. ... CSS helps us to control the text color, font style, the spacing between paragraphs, sizing of columns, layout designs, and many more. CSS provides these capabilities through a technical model based on a hierarchical scope of effect, the separation of style from content, and a well-defined set of published standards.
- **JavaScript** to program the behavior of web pages and to interactive
- **Whole character to create carousel font are some website for icons**

Requirements of Application:

- Create a workspace with VS Code
- Design the general layout with HTML & CSS
- Create the required components with JAVASCRIPT.
- Google fonts for font family
- Scrolling animation

Overview

You open this website you will see the amazing home page with curved background image

ON the top you can see the navigation menu which is undoubtedly responsive

And has navigation links

We have simple site title with background image and a button

We have beautiful cards with auto sliding functionality after three seconds card will slide automatically

We applied scrolling animation to the element in the owl carousel

We have blog post with zoom in and zoom out effect

We have footer with black background

4

COMPONENTS:

- ❖ Home
- ❖ Social media link
- ❖ Navigation
- ❖ Sliding cards

❖ Blog post

❖ Category

❖ Mail

❖ Tags

❖ Footer

❖ copyrights

OVERVIEW OF COMPONENTS:

- **Home Page:**

The home page is the first page of the website

- Social media links

SUMMARY AND CONCLUSIONS

- **SUMMARY:**

There are plenty of benefits to blogging .it reach out billions of people the use the internet. For me It more like my own journal .it helps people to who searching and knowledge of my experiences through reading it in my blog.

FEATURES

- A personal blogger with colourful pictures
- A nav bar contain home,services etc
- Different types of news with images
- With social media links to contact the admin

- Interesting blog in my point of view

- **CONCLUSION:**

- The front-end languages such as HTML, CSS are becoming one among the emerging languages.
- This website is connected to mail id
- In today's world, the web development technology is an emerging technique which helps in many real time applications and saves people time and efforts.
