About the course:

FourWeek Internship Program in Geospatial Technology. This course intends to offer the state-of-the-art concepts and practices of advanced QGIS and Sigma plot statistical software's to the learners. The program is designed to accommodate science students and researchers to analyze and model the real World problems and helps in decision making. The applications of Geospatial Technologies is very wide since it deals with physical, social and cultural aspects on the earth surface. It is designed with hands on training to enhance the skills of students to equip them for project work or research work.

Course Content

- Introduction to Remote Sensing and GIS
- Introduction to Sigma plot
- Applications on Water Resources
- Application of RS and GIS for Coastal Zone Management
- Applications on Atmospheric Science Research
- Hands on Exercise
- Mini Projects by Participants
