SIGNATURE OF THE CANDIDATE

ACKNOWLEDGEMENT

I am pleased to acknowledge my sincere thanks to Board of Management of **SATHYABAMA** for their kind encouragement in doing this project and for completing it successfully.

I am grateful to them. I convey my thanks to **Dr. T. Sasikala M.E., Ph.D,** Dean, School of Computing, **Dr. S. Vigneshwari, M.E., Ph.D. and Dr. L. Lakshmanan, M.E., Ph.D.,** Head of the Department of Computer Science and Engineering for providing me necessary support and details at the right time during the progressive reviews.

I would like to express my sincere and deep sense of gratitude to my Project Guide **Dr.B.BHARATHI** for his valuable guidance suggestions and constant encouragement paved way for the successful completion of my project work.

I wish to express my thanks to all Teaching and Non-teaching staff members of the **Department of Computer Science and Engineering** who were helpful in many ways for the completion of the project.

ABSTRACT

Electronic commerce is a process of buying and selling a product through the internet .it is very easy to sell the products without mediator. In this web page will be used to promote the sales of non-branded products using price filtration. It is very useful to the small-scale business and industries and it helps to increase the growth of small-scale business and industries like dress and Accessories.

It would make price filtering, viewing and selection of a product easier. The price filtration provides an easy and convenient way to buy the product in the budget. Shoppers can visit web stores from the comfort of their house and shop as by sitting in front of the computer. Online stores are usually available 24 hours a day and many consumers have internet access both at work and at home. So, it is very convenient for them to shop online.

Now a days the life style of the people is different. People feel uncomfortable and time consuming for going crowded markets. So, E-Shopping is a boon as it saves lot of time.

CHAPTER 1

INTRODUCTION

India has more buying power next to the china. Also, India has millions of internet users it is the big opportunity for e-commerce platform but now a days it promotes only branded items. So, it affects a small-scale business and industry sales and also it increases the unemployment level. In this Web store, it creates a more accessible e-commerce platform for small scale business and industries.

The webstore will be used to promote the sales of non-branded products that do not make it out to the real world. Also, it creates a more small-scale business and job opportunity. It helps people who are going to start a business with in the home. Without any brand name, ads and store. The webstore will also allow people to easily filter between product prices. Also, it helps a poor and middle-class people to buy a product in fixed budget.

Online shopping is becoming increasingly popular for variety of reasons. There are certainly outside factors such as increasing petrol prices, travelling crowded areas in this pandemic. One of the most enticing factors about online shopping, particularly during holiday season is, it alleviates the need to wait in long lines or search from a streets and stores for a particular item. Variety of goods are available in online.

Online shopping sites contain wide variety of goods both high quality and mild quality keeping in mind the level of people. It gives boost up to the startup small scale business and also it can help to increase our GDP (Gross domestic product) growth

CHAPTER 2

Aim and Scope

2.1 Aim of the project

The goal of this project is to develop a web-based interface to promote the sales of non-branded product using price filtration. The shopping system would be easy to use and hence make the shopping experience pleasant for the users. A user can view the complete specification of the product along with various images.

2.2 Scope

The purpose of this web store to provide a selling platform for small scale business and industry without mediator and also create a more opportunities to small scale business and industries. It helps to become part of the GDP. So, it gives big boosts to the small - scale businesses and industries.

CHAPTER 3

System Requirements

3.1 Hardware Requirements:

- RAM: 2 – 4GB
- ROM: 64GB and above
- Processor: Intel i3 and above

3.2 Software Requirements:

- Windows
- Sublime Text 3

3.3 Languages Used

- HTML

HTML (Hypertext Markup Language) is the code that is used to structure a web page and its content. For example, content could be structured within a set of paragraphs, a list of bulleted points, or using images and data tables.

- CSS

CSS (Cascading Style Sheets) is the language for describing the presentation of Web pages, including colors, layout, and fonts. It allows one to adapt the presentation to different types of devices, such as large screens, small screens, or printers.

There are three ways you can use to implement CSS: internal, external, and inline styles.

In this web page implement external method for use the same CSS file for multiple pages

CHAPTER 4

Methods

4.1 Existing System

1. The existing system can be promote only branded items like Levi's, Adidas extra.
2. So the small-scale industry can't able to sale the products without brand name.

Disadvantages

- Consumers can't able to buy the products with in the budget.
- Small scale industry products can sale only in offline.

4.2 Proposed System

1. In this system can promote the non-branded items using price filtration.
2. This type of searching don't want brand names.
3. So the small-scale business and industry can able to sale the products.

Advantages

- The consumers can satisfy with the cost of the product.by filtering the prices while shopping the products.
- It helps the common people to buy the low-cost products through online

4.3 Modules used

4.3.1 Signup & Login page

A signup page is (also known as a registration page) enables users and organizations to independently register and gain access to the webpage

The login page allows a user to gain access to an application by entering their username and password.

4.3.2 Price filtration

It provides an easy and convenient way to buy the product in the budget and also create a more opportunities to small scale business and industries to sale products without brand name.

4.3.3 Product page

It helps customers decide what to buy. It includes different colors and varieties of products in single place.

4.3.4 Product details page

This page used to view the details of the product like colors and quality. It includes quantity of the product, availability of the product and rating of the product.

4.3.5 Cart page

A cart page is an essential part of an e-commerce website. It is the page where the page used can pile up want, they want to buy from the website. Add to Cart is a way to create a temporary list of items by adding them to cart, which will keep track of the items until users leave the website.

4.3.6 Buy page

The payment page is a web page that allows customers to purchase items easily and securely. The payment page contains card holder name, card expiry date, card number and card cvv. The customer enters all the payment details to make the payment to buy the products.

4.4 Architecture Diagram

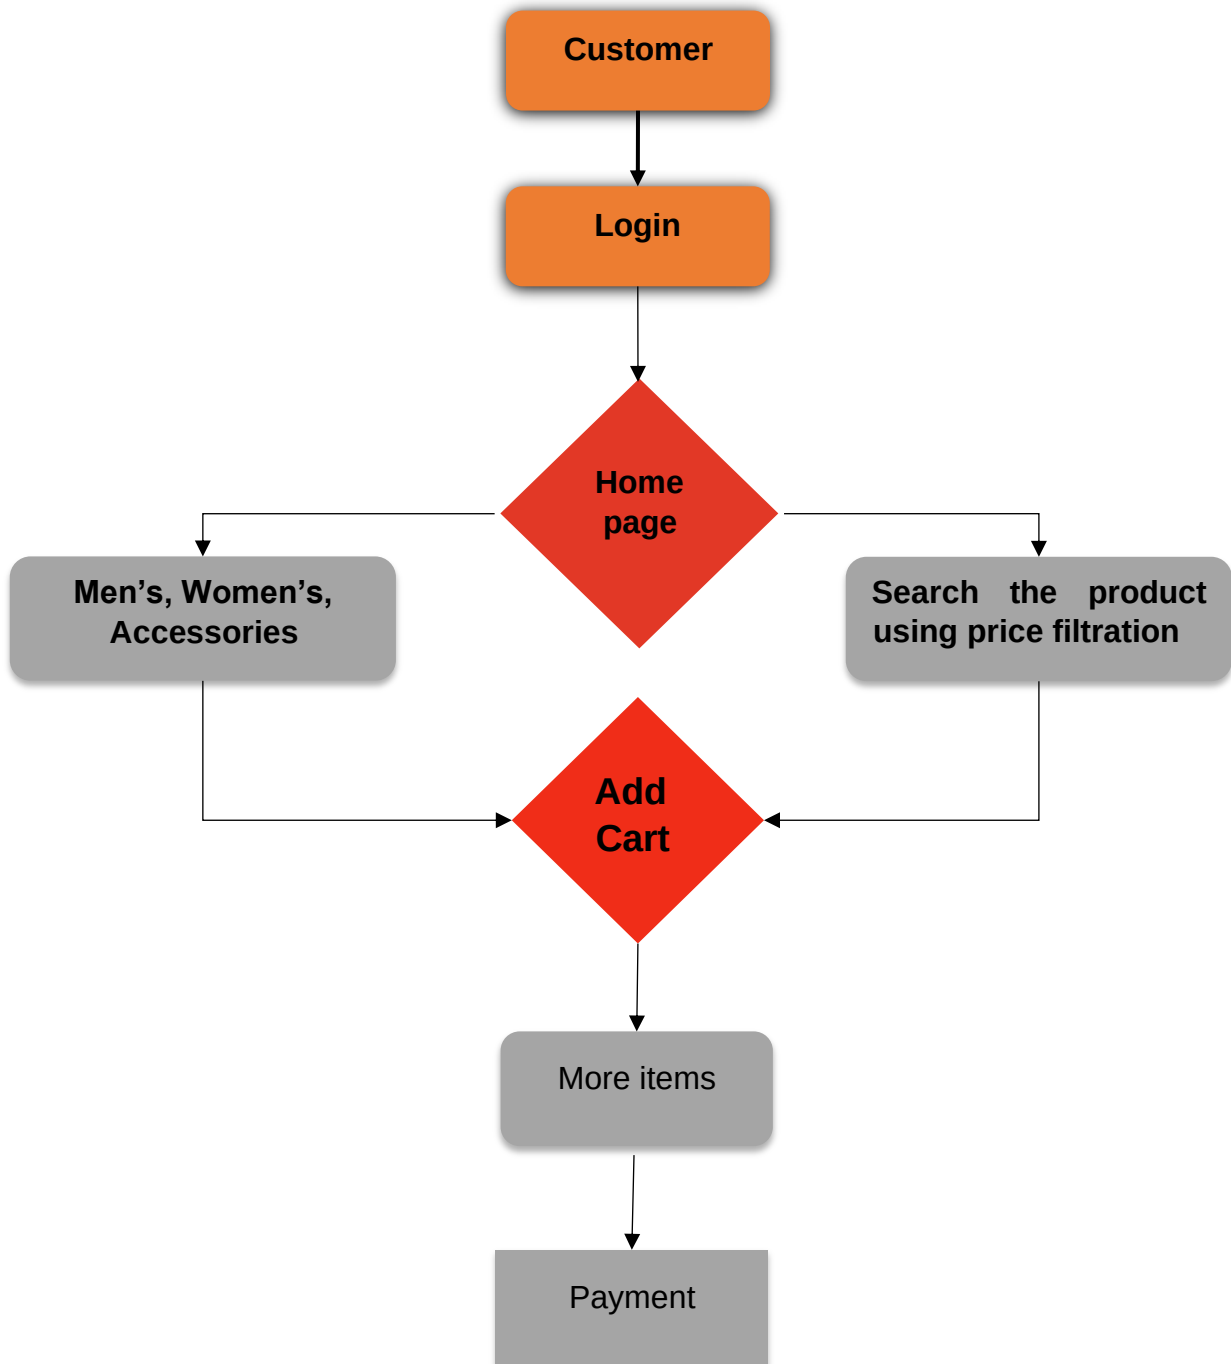

Fig.4.4 Architecture Diagram

Customer login a web store using user name and password and get into the home page
After entering into a home page, search a product using price filtration or Men's, Women's,
Accessories Page and Add items to shopping cart While buying a more items. click buy
button to get into the payment page and enter a card details finely click Make payment to
end shop

CHAPTER 5

RESULTS

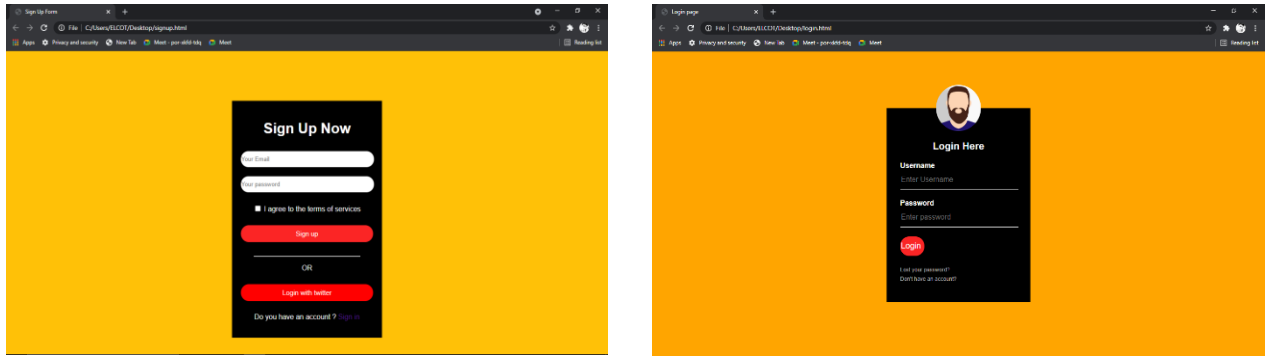

FIG: 5.1 SIGNUP & LOGIN PAGE

A signup page enables users to independently register and gain access to the webstore. Login page is used to enter a webstore using username and password

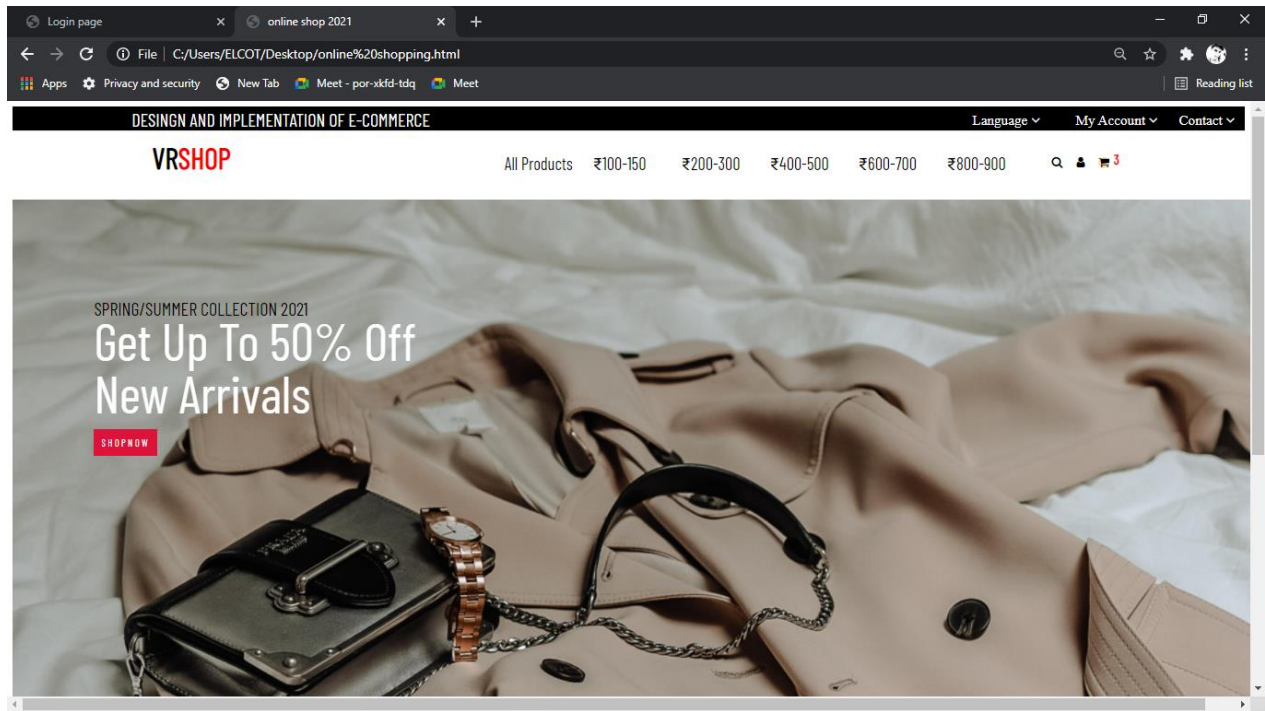

FIG:5.2 HOME PAGE

Homepage is the introductory page of a webstore, typically serving as a table of contents for the store.

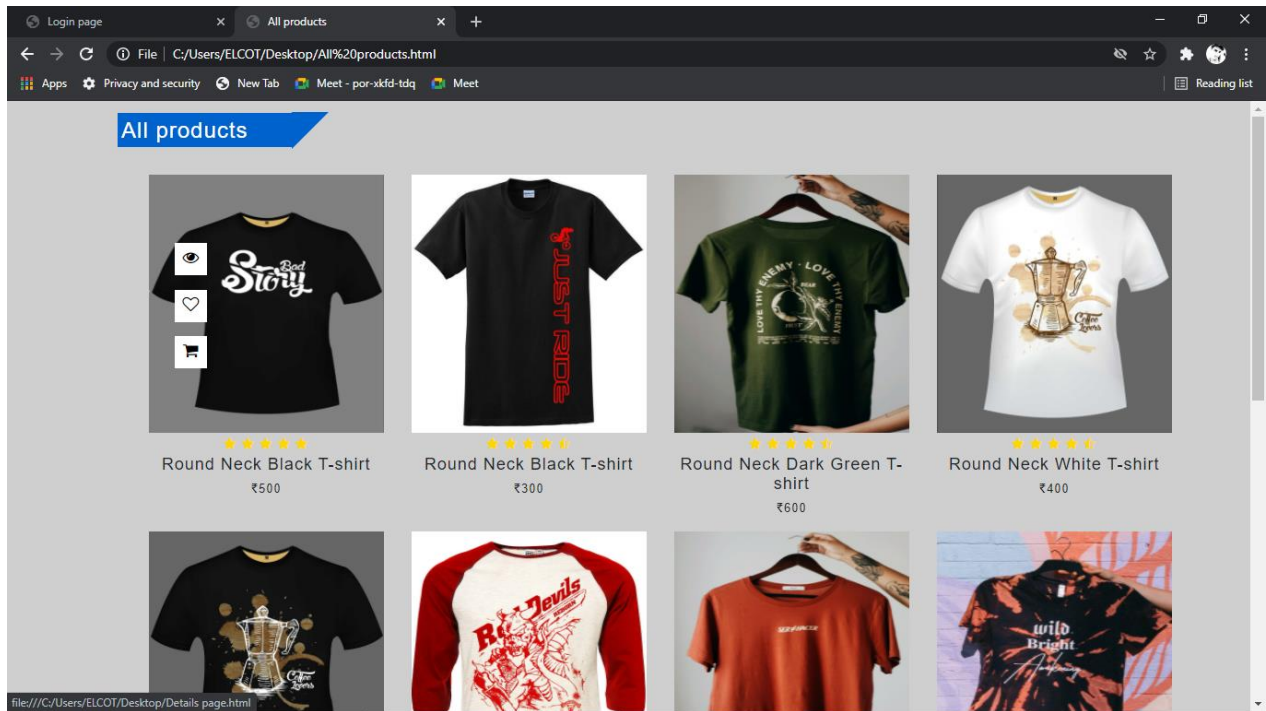

FIG:5.3 PRODUCT PAGE

Product page is used to view the all products in single place. It helps customers to purchase any things in the product page according to their affordable price and favourite colours.

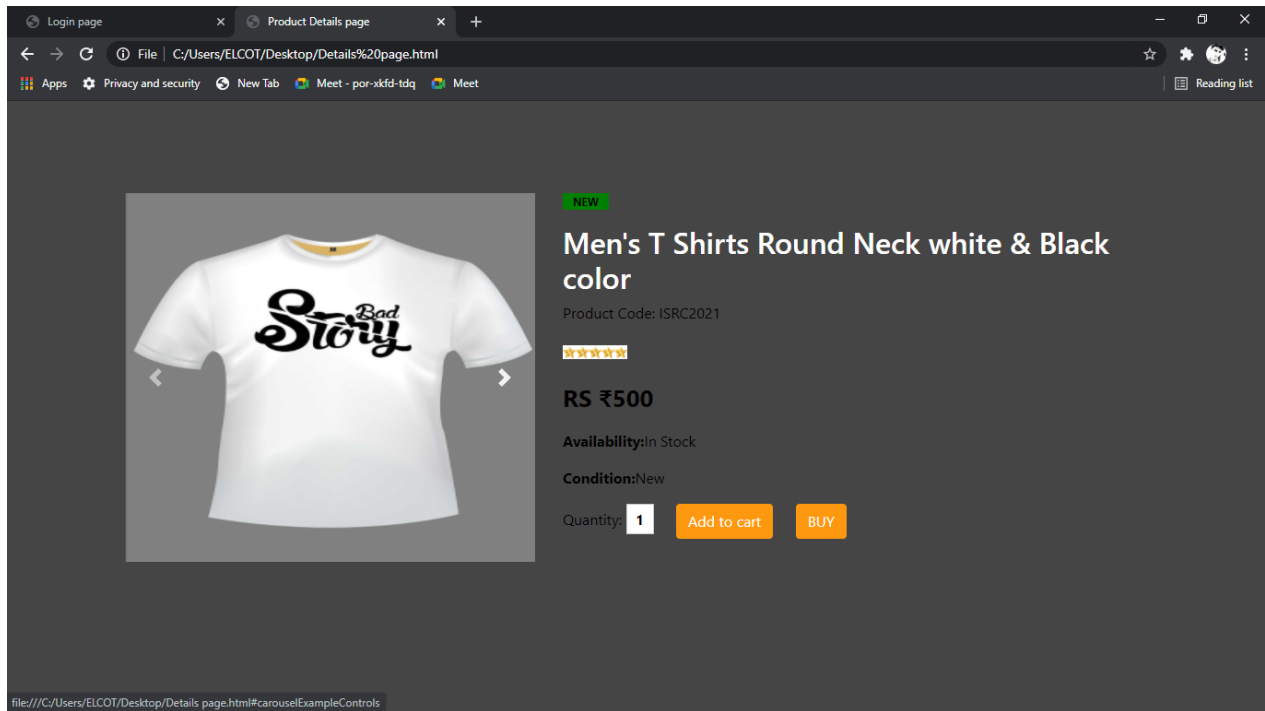

FIG:5.4 PRODUCT DETAIL PAGE

This page is used to view the details of the product like colors and quality. It includes quantity of the product, availability of the product and rating of the product. If we want to purchase immediately, we can click buy option or if we want to buy later means we can give add to cart option. Next time when we purchase the item add to cart item also will be come to the list.

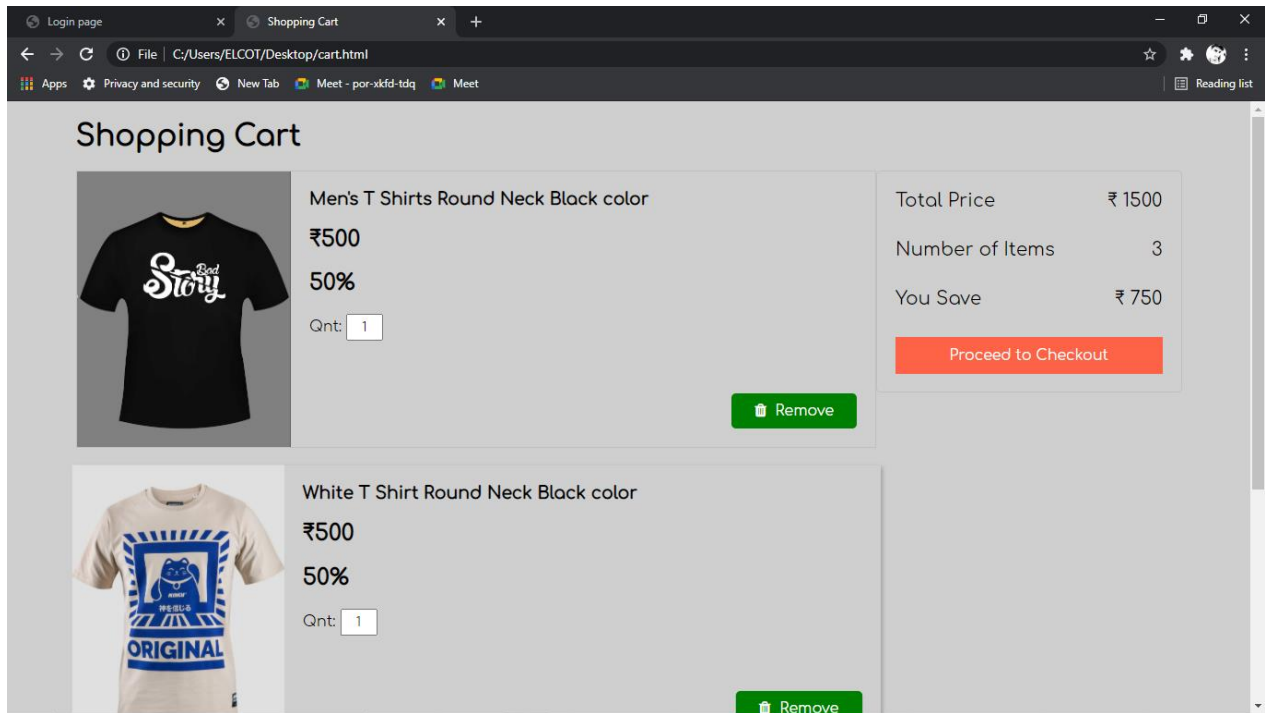

FIG:5.5 CART PAGE

The products that have been added to the shopping cart by the user are listed along with their price and the quantity. The total price of all the products added to cart is displayed. A user can edit the quantity of each product or remove the product from the shopping cart

The image shows a web browser window with a dark theme. The address bar displays 'File | C:/Users/ELCOT/Desktop/payment%20.html'. The browser tabs include 'Login page', 'payment.html', and '+'. The main content area features a 'CREDIT CARD PAYMENT' form with a Visa and Mastercard logo in the top right corner. The form contains the following fields: 'CARD NUMBER' (a single line with 16 dots), 'CARD EXPIRY' (a field with 'MM / YY'), 'CARD CVV' (a field with 4 dots), and 'CARD HOLDER NAME' (a single line). A green button labeled 'MAKE PAYMENT' is positioned at the bottom of the form.

FIG:5.6 PAYMENT PAGE

In payment page customer have to enter the payment details like card number, card holder name, card expiry date and card CVV, to make the payment. After the payment successful, the customer end shopping

CHAPTER 6

CONCLUSION

The purpose of this work to establish a growth of small business and industry. It helps to get good quality of products in low cost and it helps to increase the GDP level. It creates more platform for small business and industries. The products in low cost also attract all kind of people and they can know more about small scale industries production.

E-commerce is continuously progressing and is becoming more and more important to businesses as technology continues to advance and is something that should be taken advantage of and implemented. From the inception of the Internet and e-commerce, the possibilities have become endless for both business and consumers.
