CHAPTER 1

INTRODUCTION

1.1 GENERAL

HTML(Hypertext Markup Language)is used to make web pages.In this project we can find all hollywood trailers in one specific page.

1.2 OUTLINE OF THE PROJECT

User can find the all movies trailer in home page, interesting news in news page, and upcoming movies in coming soon, movies which are playing in cinema hall are listed in in theaters, and in contact page the user can book a movie. At the top of the home page the user can find the login and registration page where user can register their details to login the website. Each and every form pages are well validated of this website but still it doesn't stores the registered user information.

CHAPTER 2

AIM AND SCOPE

2.1 AIM

The main objective of the project is to view the hollywood trailers.

2.2 PROBLEM STATEMENT

People cannot find movie trailer list, their proper review, and booking system online at same website, they have to visit different website for movie information.

CHAPTER 3

SYSTEM ANALYSIS AND DESIGN

3.1GENERAL

User can find the all movies trailer in home page, interesting news in news page, and upcoming movies in coming soon, movies which are playing in cinema hall are listed in in theaters, and in contact page the user can book a movie. At the top of the home page the user can find the login and registration page where user can register their details to login the website.

3.2ALGORITHM

- Type the code on editor.
- Type the css and javascript code in editor
- Execute all the codes using the code editor

3.3SOFTWARES USED

CODE EDITORS USED

VISUAL STUDIO CODE

Visual studio code is a sourcecode editor developed by microsoft for windows,linux and macos.it includes support for debugging,embedded git control and github,syntax highlighting,intelligent code completion and code refactoring.

3.4PROGRAMMING LANGUAGES USED

HTML

Hypertext Markup Language is the standard markup language for documents designed to be displayed in a web browser. It can be assisted by technologies such as Cascading Style Sheets and scripting languages such as JavaScript

CSS

Cascading Style Sheets is a style sheet language used for describing the presentation of a document written in a markup language such as HTML. CSS is a cornerstone technology of the World Wide Web, alongside HTML and JavaScript.

JAVASCRIPT

JavaScript, often abbreviated as JS, is a programming language that conforms to the ECMAScript specification. JavaScript is high-level, often just-in-time compiled, and multi-paradigm. It has curly-bracket syntax, dynamic typing, prototype-based object-orientation, and first-class functions
