Details:

Online webinar on “Intermittent fasting for Heart Health” was conducted by the Department of Basic Medical Sciences, Sathyabama Dental College & Hospital, Chennai on 25.07.2020. The speaker was Dr. Anand Chockalingam, Cardiologist in the University of Missouri, Columbia, United States. The speaker explained the importance of intermittent fasting and its impact on heart health. Participants were from various medical and dental colleges. Public people also participated and benefited by this webinar. Many students and public people asked doubts regarding the food and exercises which are beneficial to the heart.

CBCT in Image Processing and 3D Reconstructions

The cone-beam reconstruction can be referred as an image reconstruction from 2D projections data into 3D volume where the basic fundamental of capture through 2D x-ray area detector and cone-beam geometry. As the CBCT is able to achieve higher longitudinal resolution and relatively higher volume scan speed, many researchers have been working on it for the last two decades.

Programme Co-Ordinators

Department of Conservative Dentistry and Endodontics, Sathyabama Dental college and hospital in association with 3M is organised a webinar on "Cementation protocols for Indirect Restorations" on the 7th of December 2020 from 11 30 am to 1 30 pm by Dr. Manikya Arabolu. The webinar was broadcasted through "Microsoft teams" platform. Dr Manikya Arabolu is currently working with 3M as their Clinical Specialist for South India. She completed her MDS in Prosthodontics in 2011 from Maaruti College of Dental Sciences, Bangalore and BDS in 2006 from M.R Ambedkar Dental College, Bangalore .Prior to 3M , she has been practicing as a Consultant Prosthodontist and a General Dentist for eight years where she worked with several chain dental practices and senior practitioners in Delhi and Mumbai. She has also authored and co-authored some scientific research publications .

Why it matters which ceramic material is used: Pre-treatment differences

X not recommended

	Silicate (glass) ceramics	Oxide Ceramics, e.g. zirconia	Resin-based materials
Hydrofluoric acid etching and silane		 X	 X
Sandblasting with alumina (Grain size 30 or 50 µm, pressure 1 to 2 bar)

How to bond veneers

• Apply a commonly used phosphoric acid etching gel (about 35%), e.g., Scotchbond™ Universal Etchant to the enamel and dentin for 15 seconds.

• Rinse thoroughly with water for 10 seconds.

• Dry with cotton pellets.

• Apply Scotchbond™ Universal Adhesive immediately to the entire surface of the enamel and dentin and rub it in for 20 seconds.

• Gently air dry the adhesive for approximately 5 seconds to evaporate the solvent.

• Do not light cure!

Summary: Cement selection

Conventional cements

- Metal-ceramic crowns and bridges to teeth
- Crowns to implant abutments (facilitated excess removal)

e.g. 3M® RelyX™ Core Plus Resin-Modified Glass Ionomer Cement

Self-adhesive resin cements

- Oxide-ceramic crowns and bridges placed on teeth
- Glass-ceramic restorations with retentive design

e.g. 3M® RelyX™ Unicore 2 Self-Adhesive Resin Cement

Adhesive resin cements

- Restorations with non-retentive design
- Low-strength ceramics
- Bonding to enamel with limited bonding surface (e.g. Maryland bridges)
- Veneers: Light-cure only option preferable

e.g. 3M® RelyX™ Ultimate Adhesive Resin Cement + 3M™ Scotchbond™ Universal Adhesive

e.g. 3M® RelyX™ Veneer Cement + 3M™ Scotchbond™ Universal Adhesive

TIP Select one cement from each category to simplify!

Guest Lecture – Minimally Invasive Periodontal Surgery – 25th May 2021

SUMMARY

Periodontal Therapy is usually associated with simple procedures like Scaling. But beyond this, there exist many sophisticated surgical procedures that use latest techniques to give the patient excellent results. Compared to the traditional techniques, minimally invasive procedures offer many advantages.

To shed light on these techniques, a Guest Lecture was organized by the Department of Periodontics on the topic “**Minimally Invasive Periodontal Surgery**” as part of the 45th E-Clinical Society Program of Sathyabama Dental College & Hospital. The speaker was **Dr. P. S. G. Prakash**, Professor, Department of Periodontics, SRM-Ramapuram Dental College & Hospital, Chennai.

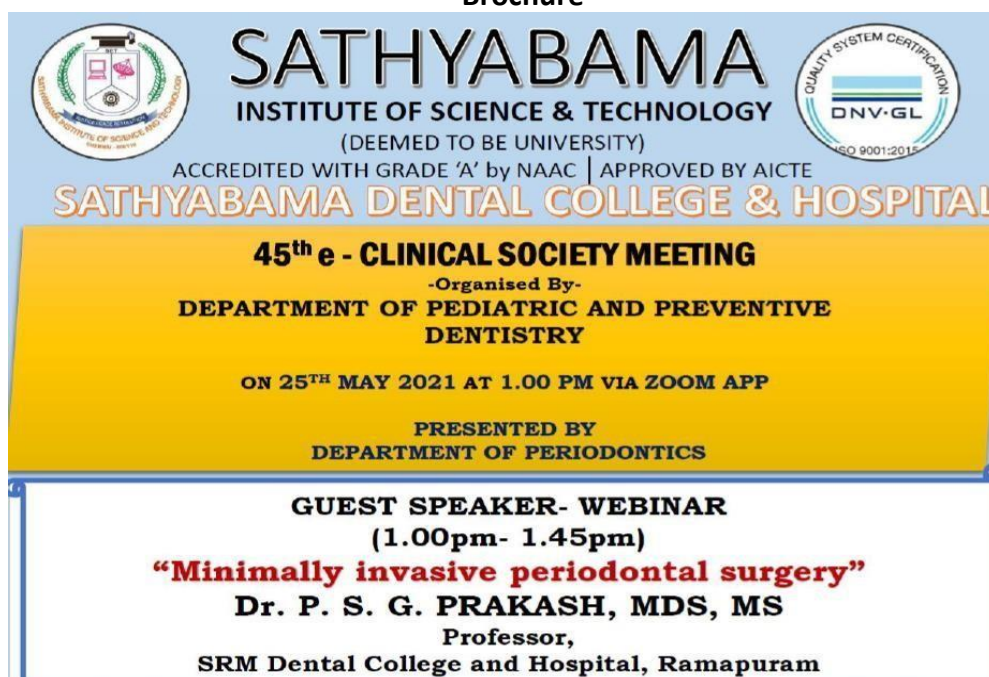

Staff & Clinical Students along with Post-graduates in Periodontology from other Colleges attended the online program, conducted via ZOOM platform and were educated on the various techniques involved via multiple Clinical Photos and Case presentations. The audience gave positive feedback on the lecture.

Date: **25th May 2021**, 1 PM onwards

Platform: **Online, via ZOOM**

Link: **ID 890 1274 5304 & Passcode 260947**
