SABIC'S UPLOAD TO UNDERPRIVILEGED POOR PEOPLE INTO ZERO HUNGER & ECONOMIC GROWTH

INTRODUCTION:

Saudi Basic Industries Corporation known as SABIC is a Saudi Arabian multinational chemical manufacturing company, and a subsidiary of the state-owned petroleum and natural gas company Saudi Aramco. It is active in petrochemicals, chemicals, industrial polymers, fertilizers, and metals. It is the second largest public company in the Middle East and Saudi Arabia.

PROBLEM :

In the beginning, SABIC realized the challenge of extreme hunger and malnutrition has improved in many countries & still suffering many underprivileged people were suffering from hunger and undernourishment worldwide – most of them women and children in developing countries – these challenges remain a barrier to sustainable development. SABIC identified the negatively impacts economies, health, education, equality and social development and came to know that Wars, destruction of the natural environment, poor harvesting practices, food wastage, Unemployment have all contributed to food scarcity not only in Saudi but also in many countries especially due to this covid 19 pandemic.

MAJOR PROBLEM IN OUR SOCIETY : POVERTY & UNEMPLOYMENT

SOLUTIONS:

SABIC plays its part in overcoming this important societal challenge, but also provides SABIC with the opportunity to leverage its innovation know-how to develop a host of solutions to meet future food security needs,

SDG – 2: ZERO HUNGER

- From the latest enhanced efficiency, stable & slow-release agric-nutrients to improve food production yield and forging partnerships to encourage sustainable agricultural practices, to developing advanced packaging solutions to extend shelf lifetimes of food and reducing food waste,
- SABIC is increasing its efforts to supply basic agri-nutrients to African countries where there is low fertilizer use in order to improve crop yield;
- SABIC is promoting the introduction of sustainable agriculture practices through promoting and demonstrating modern greenhouses technologies.
- SABIC is expediting the development of enhanced and customized fertilizer products to increase the efficiency of fertilizers, reducing product waste.

- The problem of hunger faced by the population can be addressed with the practice of planting plants that can provide employment opportunities to population by doing agriculture business in their area,
- The local government must take an initiative to create a program for farmers to help them with seedlings, building proper irrigation, farming materials, finance in assisting farming activities. It is beneficial to raise cooperatives for farmers only where funds are properly used solely by them & lawmakers may pass a bill about farming land protection. Traders should start putting more harvested products from our local farmers in the market.

SDG – 8 : DECENT WORK & ENVIRONMENT GROWTH

- SABIC is strategically aligning our business come to life by helping to contribute to investments and creating employment opportunities in this pandemic.
- SABIC is keeping markets open, helping social entrepreneurs market themselves, adapting new economy, fighting for workers right, building partnerships for the unemployed.
- Foster significant value to the domestic Saudi economy and engage in the development of young Saudis.

SDG – 13: CLIMATE ACTION

- Planting fruits, vegetables, nutritious food to have accessible & sustainable resources which would help in climate action. Planting provides oxygen that can maintain a healthy environment.
- SABIC is running climate programs across all European sites.
- SABIC is committed to reducing its greenhouse gas intensity & collaborates with the Saudi government to achieve its Nationally Determined Contribution (NDC)
- SABIC is launching global sustainability training programs

COVERED SDG'S

SABIC is covering the 2nd, 8th & 13th SDG's Under the 17 interlinked goals through this social business in a sustainable genre.
