Dear Brijitta and Peter,

I hope this email finds you well in this moment, which is again delicate. I am writing to send a first short report on the experiments that we performed on the confined ionic microgels. I am sorry that it took relatively long, however as you can imagine we had to deal with the restrictions related to the COVID.

The results in my opinion are interesting, we need to perform additional analysis and complement with information from your previous investigations on the system in 3D (part of which I tried to extract from publications) and modeling.

However, I would like to share these first findings with you to have your opinion and suggestions.

Best regards,

Marco
